While debate continues in the fields of the sciences and humanities as to the nature of consciousness and the location of consciousness in the brain or as a field phenomenon in the Vedic tradition consciousness has been understood and continues to be articulated as an infinite field of intelligence at the basis of all forms of existence This infinite field of intelligence is accessible to human awareness being the very nature of the mind and the structuring dynamics of the physiology from the DNA to the cell tissues organs and to the whole body and its sophisticated functioning This two part volume *The Big Fish* Consciousness as Structure Body and Space considers in Part One the Vedic approach to consciousness specifically referencing Maharishi Vedic Science and discusses themes pertinent to the arts including perception and cognition memory as awareness history and culture artistic performance and social responsibility observatory instruments as spaces and structures to enhance consciousness and beyond metaphor architectural sites as multi layered enclosures of the brain detailed in the *Shrimad Devi Bhagavatam* and as cosmic habitat or *Vastu* aligned to the celestial bodies Presenting some more general consciousness based readings Part Two includes essays by various authors on Agnes Martin and her views on art perfection and the Classic unified field based education and freedom of expression versus censorship in art prints from the Renaissance to the contemporary era as allegories of consciousness the work of Australian artist Michael Kane Taylor as beyond a modern postmodern dichotomy the photographic series *The Ocean of Beauty* by Mark Paul Petrick referencing the Vedic text the *Saundarya Lahari* a Deleuzian analysis of the dual screen multi arts work *Reverie I* and an account of the making of *Reverie II* a single screen video projection inspired by the idea of dynamics of awareness This book therefore presents a broad range of interests and reading while offering a unique yet profoundly transformative perspective on consciousness      Forthcoming Books Rose Arny,1992      **Bibliography of Asian Studies** ,1988      **Ideal India** ,2001

**Subject Guide to Books in Print** ,1971      *IDSA News Review on China/Koreas/Mongolia* ,1985      Humanistic Management and Sustainable Tourism Maria Della Lucia,Ernestina Giudici,2021-02-25 Tourism is a fast growing and changing industry which has become a driver of economic development in both developed and underdeveloped countries While the tourism industry s potential for shared value creation and sustainable development is acknowledged the concerns around the environmental and social pressures remain a challenge for businesses organizations and destinations This is because sustainable tourism arguably conflicts with the predominant neoliberal structure of the economy and with the hierarchical profit and consumption driven societies The emphasis on competition growth and profitability may undermine economic viability itself by consuming unreproducible resources and by undermining the six essential elements dignity people prosperity social justice planet and partnership that are conceptually linked to sustainable development The crises recurrently challenging the global travel and tourism environment including climate change bushfires extreme weather

disasters pandemics and the financial crisis show the weaknesses of neoliberal approaches and the collective economic dependency of countries on tourism that is vulnerable if not completely unsustainable This vulnerability asks for understanding that the collective future depends on developing entirely new approaches and interpretation of tourism to effectively respond to the human societal social and climate challenges This book offers a novel and original perspective entailing the application of a humanistic management approach to sustainable tourism which is centered on the value of human life the protection of human dignity and the promotion of well being Multiple theoretical approaches methods and practical cases on an international scale shed light on shared value creation and human dignity as a necessary condition for its achievement in different contexts Implicitly and explicitly they respond to the current urgency to implement strategies to recover from the worldwide impact of the pandemic crisis and to provide a vision of what tourism could and should be when it recovers It will be of interest to researchers academics professionals and postgraduates in the fields of management sustainability and tourism development

Reimagining higher education around the world lessons from the creation of eight new colleges and universities in Africa Asia the Middle East and North America Higher education is perpetually in crisis buffeted by increasing costs and a perceived lack of return on investment campus culture that is criticized for stifling debate on controversial topics and a growing sense that the liberal arts are outmoded and irrelevant Some observers even put higher education on the brink of death The New Global Universities offers a counterargument telling the story of educational leaders who have chosen not to give up on higher education but to reimagine it The book chronicles the development and launch of eight innovative colleges and universities in Africa Asia the Middle East and North America describing the combination of intellectual courage entrepreneurial audacity and adaptive leadership needed to invent educational institutions today The authors both academic leaders who have been involved in launching ventures similar to the ones described offer a unique inside perspective on these efforts Bryan Penprase and Noah Pickus show how the founders of new colleges and universities establish distinctive brands in a sector dominated by centuries old institutions secure creative sources of funding attract stellar faculty and students and design appealing curriculums and campuses all while managing tradeoffs and setbacks balancing local needs and global aspirations and wrestling with challenges to academic freedom These new educational institutions include two universities in Asia and the Middle East built by well established American parent institutions others in Africa and North America that offer holistic reform from the ground up and leverage new technologies to lower costs and still others that adapted the American liberal arts model to Asian and African contexts Their experiences offer lessons for future founders of new universities and for those who want to renew and rejuvenate existing ones
