Shaping Images Thorsten Stephan Beck, 2016-09-12 Images play an outstanding role in the transfer of knowledge. They are used in numerous academic disciplines to present scientific results. Digital tools such as Adobe Photoshop make it possible to display the information in images brilliantly and clearly. At the same time, the line between appropriate and inappropriate manipulation is not always easy to draw. Scientific journals have published guidelines for handling and editing images, but they are not always specific enough to provide clarity for all situations. *Shaping Images* examines how scholars from biology, information science, art history, and design deal with this uncertainty, how they process and manipulate images where they see their special potential, and how they draw the line between appropriate and inappropriate image manipulation. The work also looks at scientific journals and lets selected editors have their say. What would have to happen to make it possible to combat image manipulation in science more effectively? The book's interdisciplinary approach makes it clear how different the practices are and how different the views are on what should be allowed in the processing of images. Images, this too, is problematized in the book: they are always a means to a certain end, which is precisely why the handling of images should be thoroughly reflected upon.

Images of Women in Hispanic Culture Teresa Fernandez Ulloa, 2016-08-17 This book studies the ways traditional polarized images of women have been used and challenged in the Hispanic world, especially during the 20th century and the beginning of the 21st century, by writers and the media, but also in earlier time periods. The chapters analyze the image of women in specific political periods, such as Francoism or the Kirchners administration, stereotypes of women in films in Mexico and Chile, and the representation of women in textbooks, among other topics. Contributions also show how two women writers in the 17th and the 19th centuries viewed the role of women in their society.

The Mother of the Sri Aurobindo Ashram Patrick Beldio, 2024-12-15 The Mother of the Sri Aurobindo Ashram Co-Creator of the Integral Yoga analyzes the contributions of the Mother, nee Mirra Alfassa (1878-1973), to the Integral Yoga that she and Sri Aurobindo, nee Aurobindo Ghose (1872-1950), co-created for his ashram. Scholars have ignored Mirra for Aurobindo, which prevents a full understanding of their

spiritual practice Scholars have also avoided examining work Aurobindo produced after they began their partnership in 1920 until his death in 1950 and privileged the written output in his journal *Arya* from 1914 to 1921 In this initial fertile period he put forth his innovative teaching about what he called the Supermind an emergent human faculty that he said would manifest a new humanity and a new earth through Mirra's body Mirra claimed that after his death in 1956 this manifestation happened as he foretold Mirra's work in the ashram from his death until hers in 1973 reveals important ways that she both fulfilled and changed Aurobindo's initial vision These developments are chiefly based on her experiences of mental dissolution while her body gained a new supramental form and consciousness [Popular Photography](#) ,2005-02 **Jesuit**

Weaver, 2016-04-08 Ferdinand III played a crucial role both in helping to end the Thirty Years War and in re-establishing Habsburg sovereignty within his hereditary lands and yet he remains one of the most neglected of all Habsburg emperors The underlying premise of *Sacred Music as Public Image for Holy Roman Emperor Ferdinand III* is that Ferdinand's accomplishments came not through diplomacy or strong leadership but primarily through a skillful manipulation of the arts through which he communicated important messages to his subjects and secured their allegiance to the Catholic Church An important locus for cultural activity at court especially as related to the Habsburgs political power was the Emperor's public image Ferdinand III offers a fascinating case study in monarchical representation for the war necessitated that he revise the image he had cultivated at the beginning of his reign that of a powerful victorious warrior Weaver argues that by focusing on the patronage of sacred music rather than the more traditional visual and theatrical means of representation Ferdinand III was able to uphold his reputation as a pious Catholic reformer and subtly revise his triumphant martial image without sacrificing his power while also achieving his Counter Reformation goal of unifying his hereditary lands under the Catholic church Drawing upon recent methodological approaches to the representation of other early modern monarchs as well as upon the theory of confessionalization this book places the sacred vocal music composed by imperial musicians into the rich cultural political and religious contexts of mid seventeenth century Central Europe The book incorporates dramatic productions such as opera oratorio and Jesuit drama as well as

works in other media but the primary focus is the more numerous and more frequently performed Latin texted paraliturgical genre of the motet which has generally not been considered by scholars as a vehicle for monarchical representation By examining the representation of this little studied emperor during a crucial time in European history this book opens a window into the unique world view of the Habsburgs allowing for a previously untold narrative of the end of the Thirty Years War as seen through the eyes of this important ruling family Quick and Popular Reads for Teens Pam Spencer Holley,2009 Compiles and annotates YALSA s Popular Paperbacks for Young Adults and Quick Picks for Reluctant Readers Includes theme lists **The Image of Christ in Russian Literature** John Givens,2018-05-29 Vladimir Nabokov complained about the number of Dostoevsky s characters sinning their way to Jesus In truth Christ is an elusive figure not only in Dostoevsky s novels but in Russian literature as a whole The rise of the historical critical method of biblical criticism in the nineteenth century and the growth of secularism it stimulated made an earnest affirmation of Jesus in literature highly problematic If they affirmed Jesus too directly writers paradoxically risked diminishing him either by deploying faith explanations that no longer persuade in an age of skepticism or by reducing Christ to a mere argument in an ideological dispute The writers at the heart of this study understood that to reimage Christ for their age they had to make him known through indirect even negative ways lest what they say about him be mistaken for cliché doctrine or naïve apologetics The Christology of Dostoevsky Leo Tolstoy Mikhail Bulgakov and Boris Pasternak is thus apophatic because they deploy negative formulations saying what God is not in their writings about Jesus Professions of atheism in Dostoevsky and Tolstoy s non divine Jesus are but separate negative paths toward truer discernment of Christ This first study in English of the image of Christ in Russian literature highlights the importance of apophaticism as a theological practice and a literary method in understanding the Russian Christ It also emphasizes the importance of skepticism in Russian literary attitudes toward Jesus on the part of writers whose private crucibles of doubt produced some of the most provocative and enduring images of Christ in world literature This important study will appeal to scholars and students of Orthodox Christianity and Russian literature as well as educated general readers interested in religion and nineteenth century Russian novels National Geographic Kids Ultimate U.
