conceptual reassessment of architectural conservation through the study of the intimate relationship between architecture and fire Stamatis Zografos expands on the general agreement among many theorists that the primitive hut was erected around fire locating fire as the first memory of architecture at the very beginning of architectural evolution Following the introduction Zografos analyses the archive and the renewed interest in the study of archives through the psychoanalysis of Jacques Derrida He moves on to explore the ambivalent nature of fire employing the conflicting philosophies of Gaston Bachelard and Henri Bergson to do so before discussing architectural conservation and the relationship between listed buildings the function of archives and the preservation of memories from the past The following chapter investigates how architecture evolves by absorbing and accommodating fire while the penultimate chapter examines the critical moment of architectural evolution the destruction of buildings by fire with a focus on the tragic disaster at London s Grenfell Tower in 2017 Zografos concludes with thoughts on Freud s drive theory He argues the practice of architectural conservation is an expression of the life drive and a simultaneous repression of the death drive which suggests controlled destruction should be an integral part of the conservation agenda Architecture and Fire is founded in new interdisciplinary research navigating across the boundaries of architecture conservation archival theory classical mythology evolutionary theory thermodynamics philosophy and psychoanalysis It will be of interest to readers working in and around these disciplines **The Collected**

The Fire of the Jaguar Terence S. Turner, 2017-12-15 Not since Clifford Geertz's Deep Play Notes on the Balinese Cockfight has the publication of an anthropological analysis been as eagerly awaited as this book Terence S Turner's The Fire of the Jaguar His reanalysis of the famous myth from the Kayapo people of Brazil was anticipated as an exemplar of a new dynamic materialist action oriented structuralism one very different from the kind made famous by Claude Lévi Strauss But the study never fully materialized Now with this volume it has arrived bringing with it powerful new insights that challenge the way we think about structuralism its legacy and the reasons we have moved away from it In these chapters Turner carries out one of the richest and most sustained analysis of a single myth ever conducted Turner places the Fire of the Jaguar myth in the full context of Kayapo society and culture and shows how it became both an origin tale and model for the work of socialization which is the primary form of productive labor in Kayapo society A posthumous tribute to Turner's theoretical erudition ethnographic rigor and respect for Amazonian indigenous lifeworlds this book brings this fascinating Kayapo myth alive for new generations of anthropologists Accompanied with some of Turner's related pieces on Kayapo cosmology this book is at once a richly literary work and an illuminating meditation on the process of creativity itself
