**Preserving Power Through Coalitions** Maria Sampanis, 2003-11-30

Sampanis argues that the United States uses agricultural trade liberalization as a bonding issue with middle and weak countries that the US then uses this relationship to improve its bargaining position with its challengers that the US uses this relationship to enhance its competitiveness vis a vis its challengers and that the US also uses this relationship to improve its access into middle and weak countries Sampanis also shows that Britain before it also used negotiated arrangements with weaker states to gain bargaining power and improve competitiveness with challengers What do you do if after years of doing what you want getting others to do what you want and essentially calling the shots you can no longer simply do what you wish convince others to do as you prefer and dictate agendas Sampanis examines through the lens of agricultural policy this dilemma faced by hegemonies in decline those once preeminent states whose dominance is gradually eroded by the very

successes they encouraged As a self preservation measure the United States and Great Britain before it negotiated arrangements with weaker states to gain bargaining power with challengers Forming a coalition with those previously ignored these declining hegemons maneuvered survival Britain transformed its empire into a commonwealth it used trade incentives to curry continued allegiance In a significant policy shift the United States seeks common ground with middle and weak states to rejuvenate its economic competitiveness in those economies as well as in those of its developed competitors The tactic worked better for the United States since a coalition of numbers translates into a coalition of votes in the institutional frameworks its hegemonic leadership fosters As Sampanis shows for both the United States and Great Britain the prize has been an extended lease on influence Capacity for Choice George Hoberg,2002-01-01 Examines North American integration and its potential future impact on Canadian life in eight areas trade the labour market the brain drain macroeconomics federalism social welfare the environment and culture *Congressional Record* United States.

**North American Regionalism and Global Spread** I. Hussain,R. Dominguez,2015-02-19 Was the 1993 North American Free Trade Agreement NAFTA designed as a definitive trade agreement or as a stepping stone This book reviews NAFTA s performances on trade investment intellectual property rights dispute settlement as well as environmental and labor side agreements within a theoretical construct Interests, Institutions, and Information Helen V. Milner,2020-06-30 Increasingly scholars of international relations are rallying around the idea that domestic politics matters Few however have articulated precisely how or why it matters In this significant book Helen Milner lays out the first fully developed theory of domestic politics showing exactly how domestic politics affects international outcomes In developing this rational choice theory Milner argues that any explanation that treats states as unitary actors is ultimately misleading She describes all states as polyarchic where decision making power is shared between two or more actors such as a legislature and an executive Milner constructs a new model based on two level game theory reflecting the political activity at both the domestic and international levels She illustrates this model by taking up the critical question of cooperation among nations Milner examines the central factors that influence the strategic game of domestic politics She shows that it is the outcome of this internal game not fears of other countries relative gains or the likelihood of cheating that ultimately shapes how the international game is played out and therefore the extent of cooperative endeavors The interaction of the domestic actors

preferences given their political institutions and levels of information defines when international cooperation is possible and what its terms will be Several test cases examine how this argument explains the phases of a cooperative attempt the initiation the negotiations at the international level and the eventual domestic ratification The book reaches the surprising conclusion that theorists neo Institutionalists and Realists alike have overestimated the likelihood of cooperation among states
