analysis of the features the material culture and in depth scientific studies The new evidence offers not only hints about local crafts food production and environmental conditions in Balat but also represents a new contribution to ongoing discussions on subsistence and patterns of mobility of non sedentary groups in the Western Desert This has given archaeologists a glimpse of the lifestyle of the Sheikh Muftah group and also for the first time shone a spotlight on daily life in a camp site in the oasis depression The date of this occupation in the Early Old Kingdom falls into a period when Egyptian Pharaonic presence was just beginning to be evident in archaeological data Cross cultural contacts between the Balat Sheikh Muftah community and the Egyptian Pharaonic population both within the oasis and into the Nile Valley are also in evidence and contribute to the discussions on transcultural exchange and assimilation processes in the oasis
