Air Force Junior ROTC.,1994 This book examines our Earth the Moon and the planets the latest advances in space technology and continuing challenges of space and manned spaceflight Unit 1 discusses the elements beyond the Earth s atmosphere surviving and living in space and physiological results of manned spaceflights Unit 2 discusses the space programs of America the creation of the National Aeronautics and Space Administration NASA working and scientific satellites the space programs of the former Soviet Union and the space programs of Europe Canada China Australia and Japan Unit 3 discusses issues critical to travel in the upper atmosphere such as orbits and trajectories unmanned satellites space probes guidance and control systems and commercial use of the space program Unit 4 covers major milestones in the endeavor to land on the Moon and to safely orbit humans and crafts in space for prolonged and temporary periods It also covers the development of space stations the Space Shuttle and its future and international laws for the use of and travel in space Pref *Reason in Revolt* Alan Woods ,Ted Grant ,2015-12-15 The achievements of science and technology during the past century are unparalleled in history They provide the potential for the solution to all the problems faced by the planet and equally for its total destruction Allegedly scientific theories are being used to prove that criminality is caused not by social conditions but by a criminal gene Black people are alleged to be disadvantaged not because of discrimination but because of their genetic make up Of course such science is highly convenient to right wing politicians intent on ruthlessly cutting welfare In the field of theoretical physics and cosmology there is a growing tendency towards mysticism The Big Bang theory of the origin of the universe is being used to justify the existence of a Creator as in the book of Genesis For the first time in centuries science appears to lend credence to religious obscurantism Yet this is only one side of the story *Riding Rockets* Mike Mullane,2007-02-06 Selected as a Mission Specialist in 1978 in the first group of shuttle astronauts Mike Mullane completed three missions and logged 356 hours aboard the Discovery and Atlantis shuttles It was a dream come true As a boy Mullane could only read about space travel in science fiction but the launch of Sputnik changed all that Space flight became a possible dream and Mike Mullane set out to make it come true In this absorbing memoir Mullane gives the first ever look into the often hilarious sometime volatile dynamics of space shuttle astronauts a class that included Vietnam War veterans feminists and propeller headed scientists With unprecedented candour Mullane describes the chilling fear and unparalleled joy of space flight As his career centred around the Challenger disaster Mullane also recounts the heartache of burying his friends and colleagues And he pulls no punches as he reveals the ins and outs of NASA frank in his criticisms of the agency A

blast from start to finish *Riding Rockets* is a straight from the gut account of what it means to be an astronaut just in time for this latest generation of stargazers *Swinging Single* Hilary Radner, Moya Luckett, 1999 Critics and defenders alike connect today's widespread anxieties about sexuality and culture to the political activism of the 1960s and the counterculture's preoccupation with the individual pursuit of pleasure In contrast the essays in *Swindling Single* attribute the new sexual mores of that era not to its political upheavals but to a confluence of social cultural and economic factors that encouraged personal gratification and altered traditionally defined gender roles Contributors analyze a broad range of topics the commercialization of avant garde and exploitation films new visions of female sexuality in *That Girl* and *The Avengers* the social context of such cultural icons as Hugh Hefner and Charles Manson the intersection of race and sexuality in Eldridge Cleaver's *Soul on Ice* and depictions of sexual pleasure in pornography and scientific films **The Artstars** Anne Elliott, 2019-10-01 These stories about struggling artists are a fierce and funny exploration of creation and its discontents Steve Almond author of *My Life in Heavy Metal* Set in various creative communities an art school an illegal loft studio a guerrilla street performance troupe where teamwork and professional jealousy mix these interconnected short stories by prizewinning author Anne Elliot follow artists as they grapple with economic realities and evolving expectations A middle aged poet reeling from 9/11 fights homesickness writer's block and ladybugs at an artist's colony A new empty nester finds a creative outlet in her community garden but gets tangled up in garden politics As the characters pass through each other's stories making messes and helping mop them up some find inspiration in accidents and others are ready to quit art completely Together they stumble through the creative process struggling to make art and find the spark of something new and original within themselves In a world where the odds of becoming a star are nearly impossible *The Artstars* tells the darkly humorous yet moving stories of those who dare to dream **Us**, 1969 *The Global Frontier* Eric Strand, 2023-06-20 *The Global Frontier* argues that midcentury American writers were not straitjacketed by the anticommunist Red Scare but rather pioneered a transnational sensibility Enabled by air travel and the expansion of the tourist industry they departed from the West/East binaries criticized by postcolonial writers and academics American novelists and poets imagined themselves as egalitarian and culturally borderless an ideology that Strand associates with the frontier Although we associate the heterosexual white male with the Ugly American stereotype a wide variety of literary travelers sought personal freedom and cultural enrichment outside their nation's borders including Black female and queer writers However while minorities as well as straight white males went abroad to achieve autonomy and creativity they were complicit in imperialism and the formation of global inequality This book thus takes a critical view of the postwar frontier a paradigm that displaced the collectivist ethos of the New Deal era For American writers the price of incorporation into a transnational professional class was not only forswearing communism but also rejecting 1930s social commitments and the concept of an interventionist state Even Richard Wright who questions the privilege of white flight himself enjoyed the privilege of the American traveler

leading to a blurring of racial identities In our day the explosion of mass air travel communications and various subcultures has threatened to discredit the nation state form altogether The Global Frontier concludes that a progressive orientation toward state based reform has never been more important especially in a new era of ethnocentric nationalisms
