Based on archival sources and oral history this book reconstructs a border building process in Namibia that spanned more than sixty years The process commenced with the establishment of a temporary veterinary defence line against rinderpest by the German colonial authorities in the late nineteenth century and ended with the construction of a continuous two metre high fence by the South African colonial government sixty years later This 1250 kilometre fence divides northern from central Namibia even today The book combines a macro and a micro perspective and differentiates between cartographic and physical reality The analysis explores both the colonial state s agency with regard to veterinary and settlement policies and the strategies of Africans and Europeans living close to the border The analysis also includes the varying perceptions of individuals and populations who lived further north and south of the border and describes their experiences crossing the border as migrant workers African traders European settlers and colonial officials The Red Line s history is understood as a gradual process of segregating livestock and people and of constructing dichotomies of modern and traditional healthy and sick European and African

Colonial Genocide and Reparations Claims in the 21st Century Jeremy Sarkin, 2008-11-30 More and more the descendants of indigenous victims of genocide land expropriation forced labor and other systematic human rights violations committed by colonial powers are seeking reparations under international law from the modern successor governments and corporations As the number of colonial reparations cases increases courts around the world are being asked to apply international law to determine whether reparations are due for atrocities and crimes that might have been committed long ago but whose lasting effects are alleged to injure the modern descendants of the victims Sarkin analyzes the thorny issues of international law raised in such suits by focusing on groundbreaking cases in which he is involved as legal advisor to the paramount chief of the Herero people of Namibia In 2001 the Herero became the first ethnic group to seek reparations under the legal definition of genocide by bringing multi billion dollar suits against Germany and German companies in a number of U S federal courts under the Alien Torts Claim Act of 1789 The Herero genocide conducted in German South West Africa present day Namibia between 1904 and 1908 is recognized by the UN as the first organized state genocide in world history Although the Herero were subjected to Germany's First Genocide they have unlike the victims of the Holocaust received no reparations from Germany By machine gun massacres starvation poisoning and forced labor in Germany's first concentration camps the German Schutztruppe systematically exterminated as many as 105 000 Herero women and children composing most of the Herero population Sarkin considers whether these historical events constitute legally defined genocide crimes against humanity and other international crimes He evaluates the legal status of indigenous polities in Africa at the time and he explores the enduring impact in Namibia of the Germany's colonial campaign

of genocide He extrapolates the Herero case to global issues of reparations apologies and historical human rights violations especially in Africa

Use of Force Arthur Mark Weisburd, 1997-04-04 This book is among the few to develop in detail the proposition that international law on the subject of interstate force is better derived from practice than from treaties Mark Weisburd assembles here a broad body of evidence to support practice based rules of law on the subject of force Analyses of a particular use of force by a state against another state generally begin with the language of the Charter of the United Nations This approach is seriously flawed argues Weisburd States do not in fact behave as the Charter requires If the legal rule regulating the use of force is the rule of the Charter then law is nearly irrelevant to the interstate use of force However treaties like the Charter are not the only source of public international law Customary law too is binding on states If state behavior can be shown to conform generally to what amount to tacit rules on the use of force and if states generally enforce such rules against other states then the resulting pattern of practice strongly supports the argument that the use of force is affected by law at a very practical level This work aims to demonstrate that such patterns exist and to explain their content Weisburd discusses over one hundred interstate conflicts that took place from 1945 through 1991 He focuses on the behavior of the states using force and on the reaction of third parties to the use of force He concentrates upon state practice rather than upon treaty law and does not assume a priori that any particular policy goal can be attributed to the international legal system proceeding instead on the assumption that the system's goals can be determined only by examining the workings of the system

States-in-Waiting Lydia Walker, 2024-05-16 After the Second World War national self determination became a recognized international norm yet it only extended to former colonies Groups within postcolonial states that made alternative sovereign claims were disregarded or actively suppressed Showcasing their contested histories Lydia Walker offers a powerful counternarrative of global decolonization highlighting little known regions marginalized individuals and their hidden or lost archives She depicts the personal connections that linked disparate nationalist struggles across the globe through advocacy networks demonstrating that these advocates had their own agendas and allegiances which she argues could undermine the autonomy of the claimants they supported By foregrounding particular nationalist movements in South Asia and Southern Africa and their transnational advocacy networks *States in Waiting* illuminates the unending of decolonization the unfinished and improvised ways that the state centric international system replaced empire which left certain claims of sovereignty perpetually awaiting recognition This title is also available as Open Access on Cambridge Core

Imperialism in the Modern World William Bowman, Frank Chiteji, J. Megan Greene, 2016-11-03 Imperialism in the Modern World combines narrative primary and secondary sources and visual documents to examine global relations in the nineteenth and twentieth centuries The three co editors Professors Bowman Chiteji and Greene have taught for many years global history classes in a variety of institutions They wrote Imperialism in the Modern World to solve the problem of allowing teachers to combine primary and secondary texts easily and systematically to follow major themes in global history some

readers use primary materials exclusively Some focus on secondary arguments This book is more focused than other readers on the markets for those teachers who are offering more specialized world history courses one important trend in global history is away from simply trying to cover everything to teaching real connections in more chronologically and thematically focused courses The reader also provides a genuine diversity of global perspectives and invites students to study seriously world history from a critical framework Too many readers offer a smorgasbord approach to world history that leaves students dazed and confused This reader avoids that approach and will therefore solve many problems that teachers have in constructing and teaching world history courses at the introductory or upper division levels The reader will allow show students how to read historical documents through a hands on demonstration in the introduction The book also incorporates images as visual documents Finally the book conceives of global history in the widest possible terms it contains pieces on political diplomatic economic and military history to be sure but it also has selections on technology medicine women the environment social changes and cultural patterns Other readers can not match this text s breadth because they are chronologically and thematically so extended
