Heroism and the Changing Character of War S. Scheipers, 2014-04-01 Post heroism is often perceived as one of the main aspects of change in the character of war a phenomenon prevalent in western societies According to this view demographic

and cultural changes in the west have severely decreased the tolerance for casualties in war This edited volume provides a critical examination of this idea Electrospinning: Nanofabrication and Applications Bin Ding,Xianfeng Wang,Jianyong Yu,2018-11-12 Electrospinning Nanofabrication and Applications presents an overview of the electrospinning technique nanofabrication strategies and potential applications The book begins with an introduction to the fundamentals of electrospinning discussing fundamental principles of the electrospinning process controlling parameters materials and structures Nanofabrication strategies including coaxial electrospinning multi needle electrospinning needleless electrospinning electro netting near field electrospinning and three dimensional macrostructure assembling are also covered Final sections explore the applications of electrospun nanofibers in different fields and future prospects This is a valuable reference for engineers and materials scientist working with fibrous materials and textiles as well as researchers in the areas of nanotechnology electrospinning nanofibers and textiles Explores controllable fabrication of electrospun nanomaterials and their multifunctional applications Explains the electrospinning technique as used in nanofabrication and nanofibers Outlines the applications of electrospun nanofibrous materials in tissue engineering filtration oil water separation water treatment food technology supercapacitors sensors and so on Homeland Security Assessment Manual Donald C. Fisher,2005-01-07 Many organizations have embraced the concept of improving overall performance by using the Malcolm Baldrige National Quality Award criteria as a benchmark to gauge their strengths and opportunities for improvement and as a measurement of their overall alignment and integration of key processes Since the terrorist attacks of September 11 2001 America has made great strides in improving homeland security Individual citizens industry and government leaders from all spectrums of our society have become involved in ensuring national security This comprehensive and hands on manual will help organizations align the Baldrige Award Criteria for Performance Excellence with homeland security issues These are issues that both public and private organizations must address in order to ensure a safe work environment for their employees and the customers of their products and services *The Handbook of Nanotechnology* John C. Miller,Ruben Serrato,Jose Miguel Represas-Cardenas,Griffith Kundahl,2004-11-11 In the first attempt to fully explore the controversial issues associated with the commercial application of nanotechnology you ll find a thorough analysis of intellectual property and patents financing and legal concerns regulatory measures particularly in the field of nanomedicine and environmental regulations The authors include a set of guideposts you can follow in your due diligence of the business and legal issues pertaining to the technology

Geopolitics and the Great Powers in the 21st Century C. Dale Walton,2007-06-11 This book argues that in the twenty first century Eastern Eurasia will replace Europe as the theatre of decision in international affairs and that this new geographic and cultural context will have a strong influence on the future of world affairs For half a millennium the great powers have practised what might be called world politics yet during that time Europe and small portions of the Near East and North Africa strategically vital to Europe were the centres of gravity in international politics This book argues that the unipolar

moment of the post Cold War era will not be replaced by a US China Cold War but rather by a long period of multipolarity in the twenty first century Examining the policy goals and possible military political strategies of several powers this study explains how Washington may play a key role in eastern Eurasian affairs if it can learn to operate in a very different political context Dale Walton also considers the rapid pace of technological change and how it will impact on great power politics Considering India China the US Russia Japan and other countries as part of a multipolar system he addresses the central questions that will drive US policy in the coming decades Geopolitics and the Great Powers in the 21st Century will be of interest to students of international security military history geopolitics and international relations

The Ethics of Nanotechnology, Geoengineering, and Clean Energy Andrew Maynard, Jack Stilgoe, 2020-07-26 Nanotechnology clean technology and geoengineering span the scale of human ingenuity from the imperceptibly small to the unimaginably large Yet they are united by a commonality of ethics that permeates how and why they are developed and how the resulting consequences are managed The articles in this volume provide a comprehensive account of current thinking around the ethics of development and use within each of the technological domains and addresses challenges and opportunities that cut across all three In particular the collection provides unique insights into the ethics of noumenal technologies technologies that are impossible to see or detect or conceive of with human senses or conventional tools This collection will be of relevance to anyone who is actively involved with ensuring the responsible and sustainable development of nanotechnology geoengineering or clean technology

PC Magazine, 2004 *Emerging Technologies* Nora Savage, Michael E. Gorman, Anita Street, 2013-05-07 Traditional Life Cycle Analysis LCA methodologies affect the public health and environmental impacts from a material product process or activity The authors of this book suggest that a more holistic approach that incorporates societal and behavioral dimensions will create better results They discuss how to develop an adaptive framework that would include a wider range of perspectives and disciplines The book will also include discussions about Technological Black Swans trading zones ethics behavioral nanotechnology governance risk green design tools for practitioners and conclude with a chapter presenting a strategic outlook
