Schmelzer, Ameenah Gurib-Fakim, Gabriella Harriet Schmelzer, PROTA Foundation, 2008 *Plants, People, and Culture* Michael J. Balick, Paul Alan Cox, 2020-08-19 Is it possible that plants have shaped the very trajectory of human cultures? Using riveting stories of fieldwork in remote villages, two of the world's leading ethnobotanists argue that our past and our future are deeply intertwined with plants. Creating massive sea craft from plants, indigenous shipwrights spurred the navigation of the world's oceans. Today, indigenous agricultural innovations continue to feed, clothe, and heal the world's population. One out of four prescription drugs, for example, were discovered from plants used by traditional healers. Objects as common as baskets for winnowing or wooden boxes to store feathers were ornamented with traditional designs, demonstrating the human ability to understand our environment and to perceive the cosmos. Throughout the world, the human body has been used as the ultimate canvas for plant-based adornment, as well as indelible design using tattoo inks. Plants also garnered religious significance, both as offerings to the gods and as a doorway into the other world. Indigenous claims that plants themselves are sacred is leading to a startling reformulation of conservation. The authors argue that conservation goals can best be achieved by learning from, rather than opposing, indigenous peoples and their beliefs.

The Folk-lore of Plants T. F. Thiselton-Dyer, 2019-11-25 In *The Folk-lore of Plants*, T. F. Thiselton-Dyer meticulously explores the rich tapestry of botanical folklore, delving into the intricate relationship between plants and human culture through the ages. The work combines a compelling narrative with a scholarly approach, examining the etymology, myths, and traditions surrounding various plants across different cultures. Thiselton-Dyer's literary style is characterized by a blend of anecdotal evidence and rigorous research, situated within the context of late 19th-century Victorian interests in natural history and folklore, reflecting a period when the study of cultural traditions and the natural world were gaining scholarly attention. T. F. Thiselton-Dyer was an eminent British folklorist and a key figure in the

classification of folklore deeply influenced by his background in botany and his fascination with the intersection of nature and myth His keen observations and in depth analyses stemmed from an era that celebrated both scientific inquiry and cultural exploration leading him to compile this exhaustive examination of plant folk lore This personal and academic convergence underscores the significance of plants in sustaining human mythology and cultural practices I highly recommend *The Folklore of Plants* to readers interested in the confluence of botany and folklore as this seminal work illuminates how plants are woven into the very fabric of human experience It is an indispensable resource for scholars botanists and anyone passionate about understanding the cultural significance of the natural world
