Narrative Based Health Care Sharing Stories A Multi Professional Workbook:

Narrative Based Healthcare Trisha Greenhalgh, Anna Collard, 2003-08-01 This is a workbook for health professionals working with diabetic patients It is based on the experiences of one group of health care workers in an inner city area It illustrates how using individual patients stories can inform and help health care workers to understand and manage their patients difficulties better In this way it has similar aims to the narrative based medicine books It also provides the interactive learning element with suggested learning objectives assignments and further reading in each unit **Based Health Care** Trisha Greenhalgh, Anna Collard, 2003 Based on the sound methodology of using patients stories to better understand and manage their disease this should be an ideal learning aid across all disciplines Examples focus on the Values-Based Health & Social Care Jill McCarthy, Pat Rose, 2010-07-14 Is evidence based care of diabetic patients practice really best practice. This is a hotly debated question in health and social care circles and the starting point for this book Engaging firmly in the debate Values Based Health Social Care calls into question the dominance of evidence based practice and sets out an alternative vision of care which places holism professional judgement intuition and client choice at its centre Bringing together writers from a range of health and social care backgrounds the book describes the rise of evidence based practice and explores major criticisms of the approach It argues that evidence should be seen as part of a broader vision of practice which places equal value on a holistic vision of the needs of patients and clients professional knowledge and intuition and seeing patients and clients as partners in their care Examples are used throughout the book to help readers link the concepts to practice The book concludes with suggestions on how to develop a values based approach in practice and through professional education Values Based Health Social Care sets out key debates surrounding the nature of practice which will be of interest to students and practitioners alike The Patient's Wish to Die Christoph Rehmann-Sutter, Heike Gudat, Kathrin Ohnsorge, 2015-06-04 Wish to die statements are becoming a frequent phenomenon in terminally ill patients Those confronted by these statments need to understand the complexity of such wishes so they can respond competently and compassionately to the requests If misunderstood the statements can be taken at face value and the practitioner may not recognise that a patient is in fact experiencing ambivalent feelings at the end of life or they may misinterpret the expressed wish to die as a sign of clinical depression Public debate about the morality and ethics of various end of life care options has exploded in recent years However it has never been sensitive to the finer aspects of clinical reality or the experiences of patients The Patient's Wish to Die Research Ethics and Palliative Care brings together that reality and the patient's voice combining them with different research approaches It presents the best available knowledge and research methodologies about patients wishes at the end of life together with a series of ethical views and a discussion about the clinical implications for palliative care The book presents material in an open and unbiased manner whilst remaining sensitive to the spiritual and existential dimensions of dying and to the different cultural views that provide

meaning to the individual Written by the best specialists and ethics scholars from around the world including palliative care practitioners and end of life scholars from countries where assisted dying practices are legalized and from those where it isn t The The Patient's Wish to Die Research Ethics and Palliative Care will prove essential reading for all those working or studying in the field of palliative care Communities in Action Graeme Johanson, Larry Stillman, 2009-05-05 ICTs have become a very powerful community resource viewed by many authors in this volume as two way mechanisms facilitating the perpetuation of and reflecting esteemed community values The contents of this volume make it clear that ICTs have a huge capacity for incorporation into different forms of community action including social change community learning community connection and community development Through studying the papers in this volume readers can learn about multiple forms of ICTs and action and how action is understood and improve their grasp of the complexities of social technical relations The chapters in this volume began life as papers at the Conference on Community Informatics prospects for communities and action in 2007 the fourth successful community informatics conference held at the Monash University Centre Prato Italy This book creates a platform for exchanging experiences case studies and possible solutions to address the difficulties in deploying ICT in many contexts and will be of interest to all researchers and practioners who engage with ICT particularly those in the community and developmental informatics field Service User and Carer Involvement in Education for Health and Social Care Michael McKeown, Lisa Malihi-Shoja, Soo Downe, 2011-06-09 Service user and carer engagement in health and social care and in the education of practitioners in this area is emerging as one of the most important new drivers within government policy in a number of countries However beyond the rhetoric there are few guides that address the practicalities of setting up and running such a project This book is unique in that it will appeal to practitioners policy makers and commissioners in health and social care practice and education who buy in to the principles of service user engagement but who find it hard to know how to progress the practicalities Based on the set up and running of the unique and very successful Comensus project this practical and accessible text will provide a framework for building authentic and sustainable community engagement in health and social care education and practice **Sterbenarrative** Simon Peng-Keller, Andreas Mauz, 2018-10-08 Vom eigenen und fremden Sterben zu erz hlen ist popul rer denn je Oft sind es unheilbar Erkrankte die erz hlend von ihrem nahen Lebensende berichten und es auf diese Weise gestalten Doch auch Hinterbliebene und professionelle Begleiterinnen und Begleiter erz hlen vom Sterben Die Lebensendforschung hat die Bedeutung des Erz hlens am Lebensende seit Langem erkannt Dennoch sind die Eigent mlichkeiten von Sterbenarrativen bislang nur punktuell in den Blick gekommen Der vorliegende Band lotet das Erz hlen am und vom Lebensende aus unterschiedlichen wissenschaftlichen ethischen und praktischen Perspektiven aus Was zeichnet dieses Erz hlen aus Was unterscheidet Sterbeerz hlungen von breiter angelegten biographischen Narrationen und insbesondere von Krankheitserz hlungen Ist die Rede von Sterbenarrativen geeignet die vielf ltigen kontextuell bestimmten Formen des Erz hlens vom
