Suksi,2024-02-26 The referendum is not a monolithic method of national decision making There are a multitude of referendum forms which exist under varying constitutional conditions and operate in different ways A global comparison shows that more than half the constitutions of the world provide for the referendum at a national level but referendums are also carried out without explicit constitutional support Two main forms of referendum can be observed the mandatory constitutional referendum and the policy vote This book argues that the referendum does not undermine representative decision making but supplements it in various ways the referendum is not diametrically opposed to representative government and when properly designed and used the institution of the referendum can enhance the legitimacy of a constitutional and political system This book is the first comprehensive constitutional and comparative analysis of the referendum It offers illuminating and intriguing reading for all those interested in national decision making

(1995) Terry Cox, Andy Furlong, 2016-10-04 First published in 1995 the aim of this book is to review various aspects of the process of democratic transition in Hungary over the period of its first post communist freely elected parliament between 1990 and 1994 The studies collected in this book attempt to put them in the context of longer term trends in Hungarian politics Hungary offers an example of the problems of political change common to Eastern Europe following the collapse of the Eastern Bloc but also demonstrates a relatively stable and successful transformation built on a unique experience under communist rule that helped prepare it for a market orientated economy transition and political pluralism Post-Communist Parliaments David M. Olson, Gabriella Ilonszki, 2013-10-18 At the end of the founding or initial decade the new parliaments of post Communist Europe had developed two distinct types democratic and presidentially dominated Whilst in the early years they had been characterised as parliaments in adolescence they have through the second decade continued to improvise but also elaborate their working relationships with both their chief executives and electorates This book examines these adaptations in seven parliaments comparing both among them and with parliaments of west Europe Their changes are traced through four distinct sets in context members internal structure and working relationship with the executive This research develops a common perspective for our understanding of both new and developed legislatures by tracing the steps through which new parliaments begin adapt and become established This book was published as a special issue of Journal of Legislative Studies *A Magyar állam- és jogtudományi irodalom bibliográfiája*, 1989 *Bibliographie Internationale Des Recensions de la Littérature Savante*, 1990 HJIL Viktor Bruns, 1990 **Paperbound Books in Print**, 1992
