Photography A Concise History:

PHOTOGRAPHY: A CONCISE HISTORY Donald Kahn, 2014-07-10 A dedicated amateur photographer all my adult life I have often thought of writing a concise history of the subject It isn't that there are no other histories of the subject But most of these are reference works or just specialized studies dedicated to one or a few photographers I know of no work that pretends to cover the entire subject yet could be read over a weekend One might think of including enough references so that a potential reader could track down all the further details There is no longer a need for a Monster Book where every thought is illustrated by a picture Photography Ian Jeffrey, 1981 This brilliant study provides a unique guide to the photographers in the world from Fox Talbot the father of photography to the masters of today **A Concise History of Photography** Helmut Gernsheim, 1986-01-01 Highly acclaimed scholarly volume examines technological advances and artistic development with nearly 300 examples of photographic art 285 black and white photos A Concise History of Photography Helmut Gernsheim, Alison Gernsheim, 1965 Photography Liz Wells, 2004 This seminal text for photography students identifies key debates in photographic theory stimulates discussion and evaluation of the critical use of photographic images and ways of seeing This new edition retains the thematic structure and text features of its predecessors but also expands coverage on photojournalism digital imaging techniques race and colonialism The content is updated with additional international and contemporary examples and images throughout and the inclusion of colour photos Features of this new edition include Key concepts and short biographies of major thinkers Updated international and contemporary case studies and examples A full glossary of terms a comprehensive bibliography Resource information including guides to public archives and useful websites **Concise History of Photography** a Gernsheim Helmut, 1986 **The Photography Book 2nd Edition Mini Format** Tom Wilson, 2017-08-07 The second edition of this landmark A Z guide to the world's greatest photographers now available in a mini format **Photography and Its Origins** Tanya Sheehan, Andres Zervigon, 2014-11-20 Recent decades have seen a flourishing interest in and speculation about the origins of photography Spurred by rediscoveries of first photographs and proclamations of photography's death in the digital age scholars have been rethinking who and what invented the medium Photography and Its Origins reflects on this interest in photography's beginnings by reframing it in critical and specifically historiographical terms How and why do we write about the origins of the medium Whom or what do we rely on to construct those narratives What's at stake in choosing to tell stories of photography's genesis in one way or another And what kind of work can those stories do Edited by Tanya Sheehan and Andres Zervigon this collection of 16 original essays illustrated with 32 colour images showcases prominent and emerging voices in the field of photography studies Their research cuts across disciplines and methodologies shedding new light on old questions about histories and their writing Photography and Its Origins will serve as a valuable resource for students and scholars in art history visual and media studies and the history of science and technology *Reading Photographs* Richard

Salkeld,2020-09-02 Reading Photographs is a clear and inspiring introduction to theories of representation and visual analysis and how they can be applied to photography Introducing the development of photography and different approaches to reading images the book looks at elements such as identity gaze psychoanalysis voyeurism and aesthetics Striking visual examples are used to illustrate the text and engaging case studies delve deeper into issues raised within each chapter with brief activity points to allow the reader to apply relevant theories to their own practice The Photograph Graham Clarke,1997 In this rich and fascinating work Clarke gives a clear and incisive account of the photograph s historical development elucidating the insights of the most engaging thinkers on the subject including Roland Barthes and Susan Sontag The Photograph offers a series of discussions of major themes and genres providing an up to date introduction to the history of photography 130 illustrations 16 in color The Reconfigured Eye William J. Mitchell,1994-07-25 Continuing William Mitchell s investigations of how we understand reason about and use images The Reconfigured Eye provides the first systematic critical analysis of the digital imaging revolution An intelligent and readable approach to the digitization of images A useful overview of a critical subject New York Times Book Review Enhanced Or faked Today the very idea of photographic veracity is being radically challenged by the emerging technology of digital image manipulation and synthesis photographs can now be altered at will in ways that are virtually undetectable and photorealistic synthesized images are becoming increasingly difficult to distinguish from actual photographs Continuing William Mitchell s investigations of how we understand reason about and use images The Reconfigured Eye provides the first systematic critical analysis of the digital imaging revolution It describes the technology of the digital image in detail and looks closely at how it is changing the way we explore ideas at its aesthetic potential and at the ethical questions it raises **Nature Exposed** Jennifer Tucker,2013-08-15 In Nature Exposed Jennifer Tucker studies the intersecting trajectories of photography and modern science in late Victorian Britain She examines the role of photograph as witness in scientific investigation and explores the interplay between photography and scientific authority Almost immediately after the invention of photography in 1839 photographs were characterized as offering objective access to reality unmediated by human agency political ties or philosophy This mechanical objectivity supposedly eliminated judgment and interpretation in reporting and picturing scientific results But photography is a labor intensive process that allows for and sometimes requires manipulation In the late nineteenth century the nature of this new technology sparked a complex debate about scientific practices and the value of the photographic images in the production and dissemination of scientific knowledge Recovering the controversies and commentary surrounding the early creation of scientific photography and drawing on a wide range of new sources and critical theories Tucker establishes a greater understanding of the rich visual culture of Victorian science and alternative forms of knowledge including psychical research On Video Roy Ames,2006-05-23 Though video systems are now growing ever more accessible and practical video work is undertaken at every level of education this is the first book length

historical and theoretical study of the medium On Video explores video on two levels first it examines the relationship between technology and society and second it probes the connection between production methods and the communication of meaning

The Image of the Popular Front Simon Dell, 2006-11-17 During the 1930s Europe was convulsed by political violence The National Socialists rose to power in Germany and Fascists campaigned in Britain Spain and France Yet Europe was also transformed in this decade through new applications of film photography and radio In fact these political and technological developments were closely intertwined

The Oxford History of Western Art Martin Kemp, 2000 The Oxford History of Western Art is the new authority on the development of visual culture in the West over the last 2700 years from the classical period to the end of the twentieth century OHWA is an innovative and challenging reappraisal of how the history of art can be presented and understood None of the currently available general histories of art offers the wealth of perspectives and cross media references of this book Through a carefully devised modular structure readers are given insights not only into how and why works of art were created but also how works in different media relate to each other across time Here uniquely is not the simple linear story of art but a rich series of stories told from varying viewpoints The founding principle of the book has been to use carefully selected groupings of pictures to give readers a sense of the visual texture of the various periods and episodes covered The 167 illustration groups supported by explanatory text and picture captions create a sequence of visual tours not merely a procession of individually great works viewed in isolation but juxtapositions of significant images that powerfully convey a sense of the visual environments in which works of art need to be viewed in order to be understood and appreciated The aim throughout has been to make the shape and nature of these visual presentations a stimulating and rewarding experience allowing readers to become active participants in the process of interpretation and synthesis Another key feature of the narrative is the re definition of traditional period boundaries Rather than relying on conventional labels such as Medieval Renaissance Baroque etc five major phases of significant historical change are established that unlock longer and more meaningful continuities The art of classical antiquity from c 600 BC to the fall of Rome in AD 410 The establishment of visual culture in Europe from 410 to 1527 the sack of papal Rome European visual regimes from 1527 to 1770 The era of revolutions 1770 to 1914 Modernism and after 1914 to 2000 This new framework shows how the major religious and secular functions of art have been forged sustained transformed revived and revolutionized over the ages how the institutions of Church and State have consistently aspired to make art in their own image and how the rise of art history itself has come to provide the dominant conceptual framework within which artists create patrons patronize collectors collect galleries exhibit dealers deal and art historians write The text has been written by a team of 50 specialist authors working under the direction of Professor Martin Kemp one of the UK's most distinguished art historians Whilst bringing their own expertise and vision to their sections each author was also asked to relate their text to a number of unifying themes and issues including written evidence physical contexts patronage viewing and reception

techniques gender and racial issues centres and peripheries media and condition the notion of art and current presentations Though the coverage of topics focuses on European notions of art and their transplantation and transformation in North America space is also given to cross fertilizations with other traditions including the art of Latin America the Soviet Union India Africa and Afro Caribbean Australia and Canada Professor Kemp and his team similarly deal generously with the applied arts and reproductive media such as photography and prints The result is a vibrant vigorous and revolutionary account of Western art serving both as an inspirational introduction for the general reader and an authoritative source of reference and guidance for students

Photography: A Critical Introduction Liz Wells, 2015-01-30 Photography A Critical Introduction was the first introductory textbook to examine key debates in photographic theory and place them in their social and political contexts and is now established as one of the leading textbooks in its field Written especially for students in higher education and for introductory college courses this fully revised edition provides a coherent introduction to the nature of photographic seeing Individual chapters cover Key debates in photographic theory and history Documentary photography and photojournalism Personal and popular photography Photography and the human body Photography and commodity culture Photography as art This revised and updated fifth edition includes New case studies on topics such as materialism and embodiment the commodification of human experience and an extended discussion of landscape as genre 98 photographs and images featuring work from Bill Brandt Susan Derges Rineke Dijkstra Fran Herbello Hannah Hoch Karen Knorr Dorothea Lange Chrystel Lebas Susan Meiselas Lee Miller Martin Parr Ingrid Pollard Jacob Riis Alexander Rodchenko Andres Serrano Cindy Sherman and Jeff Wall Fully updated resource information including guides to public archives and useful websites A full glossary of terms and a comprehensive bibliography Contributors Michelle Henning Patricia Holland Derrick Price Anandi Ramamurthy and Liz Wells

Voices in the History of Madness Robert Ellis, Sarah Kendal, Steven J. Taylor, 2021-05-12 This book presents new perspectives on the multiplicity of voices in the histories of mental ill health In the thirty years since Roy Porter called on historians to lower their gaze so that they might better understand patient doctor roles in the past historians have sought to place the voices of previously silent marginalised and disenfranchised individuals at the heart of their analyses Today the development of service user groups and patient consultations have become an important feature of the debates and planning related to current approaches to prevention care and treatment This edited collection of interdisciplinary chapters offers new and innovative perspectives on mental health and illness in the past and covers a breadth of opinions views and interpretations from patients practitioners policy makers family members and wider communities Its chronology runs from the early modern period to the twenty first century and includes international and transnational analyses from Europe North America Asia and Africa drawing on a range of sources and methodologies including oral histories material culture and the built environment Chapter 4 is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com

Photography: History and Theory Jae Emerling,2013-03-01 Photography History and Theory introduces students to both the history of photography and critical theory From its inception in the nineteenth century photography has instigated a series of theoretical debates In this new text Jae Emerling therefore argues that the most insightful way to approach the histories of photography is to address simultaneously the key events of photographic history alongside the theoretical discourse that accompanied them While the nineteenth century is discussed the central focus of the text is on modern and contemporary photographic theory Particular attention is paid to key thinkers such as Baudelaire Barthes and Sontag In addition the centrality of photography to contemporary art practice is addressed through the theoretical work of Allan Sekula John Tagg Rosalind Krauss and Vil m Flusser The text also includes readings of many canonical photographers and exhibitions including Atget Brassai August Sander Walker Evans The Family of Man Diane Arbus Lee Friedlander Cindy Sherman Bernd and Hilla Becher Sebastiao Salgado Jeff Wall and others In addition Emerling provides close readings of key passages from some major theoretical texts These glosses come between the chapters and serve as a conceptual line that connects them Glosses include Roland Barthes The Rhetoric of the Image 1964 Susan Sontag Regarding the Pain of Others 2002 Michel Foucault on the archive 1969 Walter Benjamin Little History of Photography 1931 Vil m Flusser Towards a Philosophy of Photography 1983 A substantial glossary of critical terms and names as well as an extensive bibliography make this the ideal book for courses on the history and theory of photography

Photography and Other Media in the Nineteenth Century Nicoletta Leonardi,Simone Natale,2018-02-05 In this volume leading scholars of photography and media examine photography s vital role in the evolution of media and communication in the nineteenth century In the first half of the nineteenth century the introduction of telegraphy the development of a cheaper and more reliable postal service the rise of the mass circulation press and the emergence of the railway dramatically changed the way people communicated and experienced time and space Concurrently photography developed as a medium that changed how images were produced and circulated Yet for the most part photography of the era is studied outside the field of media history The contributors to this volume challenge those established disciplinary boundaries as they programmatically explore the intersections of photography and new media during a period of fast paced change Their essays look at the emergence and early history of photography in the context of broader changes in the history of communications the role of the nascent photographic press in photography s infancy and the development of photographic techniques as part of a broader media culture that included the mass consumed novel sound recording and cinema Featuring essays by noteworthy historians in photography and media history this discipline shifting examination of the communication revolution of the nineteenth century

is an essential addition to the field of media studies In addition to the editors contributors to this volume are Geoffrey Batchen Geoffrey Belknap Lynn Berger Jan von Brevern Anthony Enns Andr Gaudreault Lisa Gitelman David Henkin Erkki Huhtamo Philippe Marion Peppino Ortoleva Steffen Siegel Richard Taws and Kim Timby
