Leniency in EU Competition Law Ingrid Margrethe Halvorsen Barlund,2020-06-18 Leniency has emerged as one of the main enforcement instruments used by competition authorities to combat cartels Offering immunity from punishment is believed to destabilise already existing cartels and deter undertakings from entering into such arrangements This book offers the first in depth analysis of the scope of leniency in European Union EU

competition law considering three crucial ramifications ensuring a leniency applicant can self report with confidence retaining the right to compensation of those who have suffered losses due to the cartel and furthering the objective of undistorted competition within the internal market With thorough insight into the interaction between the Commission's Leniency Notice and public and private enforcement the author fully explains such aspects of the subject as the following who is eligible for leniency liability of an immunity recipient the EU fining system disclosure of leniency evidence scope of public authorities reaching out to cartel infringers the immunity recipient and follow on damages claimants the immunity recipient and subsequent leniency applicants effect of the Damages Directive and the European Economic Area dimension The author offers cogent suggestions about how the shortcomings of the Commission's leniency offer can be ameliorated and which regulatory steps should be taken to give the policy greater leverage The author calls for increased harmonisation at national level in the EU and compares leniency practice in US antitrust law As a comprehensive analysis of the practical application of current policy and procedure in EU cartel enforcement the book clearly shows the ways in which the scope of leniency is manifest in the interaction between public and private enforcement evaluating which interaction is most effective Its practical character will be recognised and welcomed by competition law practitioners and policymakers who will strengthen their grasp of leniency procedure and clearly discern implications for competition infringement cases

International Competition Enforcement Law Between Cooperation and Convergence Jörg Philipp Terhechte, 2011-03-24 The international dimensions of competition law and policy are most often examined at the level of substantive law In this legal area both intentional and spontaneous assimilation and harmonization trends can be recognized which manifest themselves e.g. in comparable approaches to combating particularly harmful restraints so called hardcore cartels However the complex terrain of enforcement law has been mainly ignored up to date Are there common approaches in this field as well How are the various competition laws linked with each other in respect to procedural norms This book

conceptualizes International Competition Enforcement Law against the backdrop of these issues and at the level of comparative law The ciphers cooperation and convergence will serve as the two principle ideas for this book Collective Redress and EU Competition Law Eda Şahin,2018-12-07 Exploring obstacles to effective compensation of victims of competition infringements this book categorises the types of victims harmed and the types of losses arisen from these infringements to identify to what extent there is a need for enhanced private competition law enforcement in the European Union EU and the best way to address this need It shows that there is a genuine need for facilitating consumer damages actions and that consumer claims are the only claims that can be pursued in a collective redress action In order to compensate consumers and overcome barriers to effective enforcement of their right to damages it structures a collective redress action for consumers by considering the following elements i the formation of the group ii the type of representative party iii funding mechanisms and iv calculation and distribution of damages **International Antitrust Law & Policy:**

Vertical Agreements and Competition Law Sandra Marco Colino, 2010-01-02 This book focuses on the current legal framework for vertical agreements in the EU and the US Over the last ten years antitrust rules governing these agreements have undergone thorough reform In the EU the old sector specific block exemptions were replaced by Regulation 2790/99 applicable to all sectors of the economy In addition changes introduced to the procedural rules have led to the decentralisation of Article 81(3) and the removal of the notification requirement In like manner in the US the Supreme Court has gradually taken vertical restraints out of the per se illegality rule What Sylvania achieved in placing non price vertical restraints under the rule of reason in the late 1970s the Khan judgment did for maximum resale price maintenance in 1997 whilst most recently and most significantly in 2007 the Leegin case followed suit for minimum resale price maintenance The book is divided into four chapters The first chapter considers the double nature of vertical agreements and the regulatory dilemma The second chapter explores the most influential economic theories underpinning current regulatory frameworks and how these theories shape antitrust policy The third chapter questions the adequacy of the current economic analysis in recent EU and US legislation and court decisions The fourth chapter analyses how this maturing economic analysis can be reconciled with what commentators and regulators have identified as a key role for competition policy redressing assumed imbalances between dealers and manufacturers The author concludes by querying the prevailing logic of protecting sectoral interests above the competitive process

The Private Enforcement of Competition Law in Ireland David McFadden, 2014-07-18 Competition is recognised as a key driver of growth and innovation Competition ensures that businesses continually improve their goods and services whilst striving to reduce their costs Anti competitive conduct by businesses such as price fixing causes harm to the economy to other businesses and to consumers It is small businesses and the consumer who ultimately pay the price for anti competitive conduct A coherent competition policy that is both effectively implemented and effectively enforced is essential in driving growth and innovation in a market economy The importance of competition was recently emphasised when the EU ECB IMF Troika included a number of competition specific conditions to the terms of Ireland's bailout Both Irish and Community law recognise the right for parties injured by anti competitive conduct to sue for damages This right to damages in theory allows those that have suffered loss to recover that loss whilst helping to deter others from taking the illegal route to commercial

success However private actions for damages in Ireland are rare This book asks what the purpose of private competition litigation is and questions why there has been a dearth of this litigation in Ireland The author makes a number of suggestions for reform of the law to enable and encourage private competition litigation The author takes as his starting point the European Commission's initiative on damages actions for breach of the EC antitrust rules and compares the position in Ireland to that currently found in the UK and US
