Race And The Rise Of Standard American:

Race and the Rise of Standard American Thomas Paul Bonfiglio, 2010-12-14 This study examines the effect of race consciousness upon the pronunciation of American English and upon the ideology of standardization in the twentieth century. It shows how the discourses of prescriptivist pronunciation, the xenophobic reaction against immigration to the eastern metropolises especially New York, and the closing of the western frontier together constructed an image of the American West and Midwest as the locus of proper speech and ethnicity. This study is of interest to scholars and students in linguistics, American studies, cultural studies, Jewish studies, and studies in race, class, and gender.

The emergence of American English as a discursive variety Ingrid Paulsen, 2022. Do speakers' identity constructions influence the emergence of new varieties of a language? This question is at the heart of a debate about how the process of the emergence of postcolonial varieties of English can best be modeled. This volume contributes to the debate by linking it to models and theories proposed by anthropological linguists, sociolinguists, and discourse linguists who view identity as a social and cultural phenomenon that is produced through linguistic and other social practices. Language is seen as essential for identity constructions because speakers use linguistic forms that index social personae as well as specific social practices and values to convey an image of self to other speakers. Based on the theory of enregisterment that models the cultural and discursive process of the creation of indexical links between linguistic forms and social values, the argument is made that any model of the emergence of new varieties needs to differentiate carefully between a structural level and a discursive level. What emerges on the discursive level as a result of processes of enregisterment is a discursive variety. The volume illustrates how the emergence of a discursive variety can be systematically studied in a historical context by focusing on the enregisterment of American English as it can be observed in nineteenth-century U.S. newspapers. Using a discourse linguistic methodological framework and two large databases containing close to 78 million newspaper articles, the study reveals a complex pattern of indexical links between the phonological forms *h*-dropping and insertion, *yod*-dropping, a lengthened and backened bath vowel, non-rhoticity, a realization of prevocalic *r* as a labiodental approximant, as well as the lexical items *baggage* and *pants* on the one hand, and social values centering around nationality, authenticity, and non-specificity on the other hand. Qualitative analyses uncover the social personae associated with the linguistic forms, e.g. the American cowboy, the African American mammy, and the Anglo maniac American dude, while quantitative analyses trace the development over time and show that the enregisterment processes were widespread and not restricted to a particular region.

You Talkin' to Me? E. J. White, 2020. *You Talkin' to Me* explores the hidden history of English in New York City, a history that encompasses social class, immigration, culture, economics, and of course real estate. E. J. White illuminates a new dimension of the city's landscape through entertaining stories of New York's most famous characters and cultural institutions from Broadway to the newsroom.
