Race, Politics, and Economic Development James Jennings, 1992-12-17 In April 1992 the world witnessed a renewal in South Central Los Angeles of the urban violence that had exploded there over a quarter of a century earlier As in the Watts rebellion of 1965 the spark that ignited the firestorm was Black rage over police brutality But in both eras the tinder was prepared by decades of social neglect and political disenfranchisement that have left the predominantly non white urban poor trapped and virtually without hope Race Politics and Economic Development examines the underlying causes of Black urban poverty and recommends means to escape the seemingly endless cycle of retributive violence that it spawns The book brings together Black activists and scholars including two former mayors of American cities to analyze the theoretical and practical problems facing the Black community in the United States The essays argue that political influence power and wealth are major factors in determining social welfare policies that both liberal and conservative policies are no longer effective in alleviating a growing human service crisis among Blacks and that political mobilisation of the Black community is absolutely critical in resolving the problem of poverty in urban America Drawing on work in the social sciences political theory and economics and also on the contributors activist

experiences these essays present an agenda for the participation of grassroots Black leaders in developing and implementing urban policy

Entrepreneurship and Self-Help Among Black Americans John Sibley Butler, 1991-01-01 In this book author John Sibley Butler traces the unique development of business enterprises and other community organizations among Black Americans from before the Civil War into the present He compares these efforts to other strong traditions of self help among groups such as Japanese Americans Jewish Americans and Greek Americans The author also shows how the higher education of Black children is already a valued tradition among Black self help groups such that today their offspring are more likely to be third and fourth generation college graduates Butler challenges the myth that nothing can be done to salvage America s underclass without a massive infusion of public dollars and offers a fresh perspective on those community based organizations and individuals who act to solve local social and economic problems

Pan, 2025-05-06 The national racial reckoning that began in 2020 promised to radically restructure American society from the bottom up But five years on it has mainly served to strengthen the ruling class and deliver the rich an opportunity to rehabilitate a profoundly unequal economic order precisely at a moment when the stability of the system and the public s trust in it are drastically deteriorating Corporations have used antiracism to consolidate their political power and evade government regulation Employers have surveilled and undermined workers through counterproductive diversity equity and inclusion trainings Affluent professionals and Democratic politicians have exacerbated a stark class divide by pushing half baked racial equity policies that come at the expense of the majority of working people And the right has reacted to these developments by stoking a toxic culture war against wokeness that serves only as a distraction from the increasing economic hardship faced by Americans of all races Selling Social Justice investigates the rise and spread of contemporary antiracist ideology and shows how the rich came to embrace this particular form of justice In this provocative and thoroughly researched account Jennifer C Pan explores why in a twenty first century economy of increasing scarcity antiracism is the wrong frame for understanding and fighting inequality
