Taylor,2002 Examines the environmental experiences of middle working class whites people of color in the U S during the 19th 20th cent Race class gender had profound effects on people s EV experiences consequently their activism While some middle class whites fled the cities their urban ills to focus on outdoor wilderness wildlife issues some stayed in the cities to develop urban parks help improve urban EV conditions The white working class collaborated with white middle class urban EV activists to improve public health worker health safety whereas people of color developed activist agendas that linked racism oppression to worker health safety issues loss or denial of land ownership infringement on human rights      Environmental Knowledge, Race, and African American Literature Matthias Klestil,2023-04-20 This open access book suggests new ways of reading nineteenth century African American literature environmentally Combining insights from ecocriticism African American studies and Foucauldian theory Matthias Klestil examines forms of environmental knowledge in African American writing ranging from antebellum slave narratives and pamphlets to Charlotte Forten s journals Booker T Washington s autobiographies and Charles W Chesnutt s short fiction The volume highlights how literary forms of environmental knowledge in the African American tradition were shaped by the histories of slavery and race mainstream environmental writing traditions and African American forms of expression and intertextuality Turning to the Underground Railroad debates over education and home building and the aesthetics of the pastoral and the georgic Environmental Knowledge Race and African American Literature provides an original perspective on the African American ecoliterary tradition that uncovers new facets of canonical and understudied texts and offers new directions for ecocriticism and African American studies      Love Canal Revisited : Race, Class, and Gender in Environmental Activism Elizabeth D. the first to examine the intersections between literature and the environment from the perspective of the oppressions of race class gender and nature and the first to review American Indian literature from the standpoint of environmental justice and ecocriticism By examining such texts as Sherman Alexie's short stories and Leslie Marmon Silko's novel Almanac of the Dead Adamson contends that these works in addition to being literary are examples of ecological criticism that expand Euro American concepts of nature and place Adamson shows that when we begin exploring the differences that shape diverse cultural and literary representations of nature we discover the challenge they present to mainstream American culture environmentalism and literature By comparing the work of Native authors such as Simon Ortiz with that of environmental writers such as Edward Abbey she reveals opportunities for more multicultural conceptions of nature and the environment More than a work of literary criticism this is a book about the search to find ways to understand our cultural and historical differences and similarities in order to arrive at a better agreement of what the human role in nature is and should be It exposes the blind spots in early ecocriticism and shows the possibilities for building common ground a middle place where writers scholars teachers and environmentalists might come together to work for social and environmental change

Pests in the City Dawn Day Biehler, 2013-11-01 From tenements to alleyways to latrines twentieth century American cities created spaces where pests flourished and people struggled for healthy living conditions In Pests in the City Dawn Day Biehler argues that the urban ecologies that supported pests were shaped not only by the physical features of cities but also by social inequalities housing policies and ideas about domestic space Community activists and social reformers strived to control pests in cities such as Washington DC Chicago Baltimore New York and Milwaukee but such efforts fell short when authorities blamed families and neighborhood culture for infestations rather than attacking racial segregation or urban disinvestment Pest control campaigns tended to target public or private spaces but pests and pesticides moved readily across the porous boundaries between homes and neighborhoods This story of flies bedbugs cockroaches and rats reveals that such creatures thrived on lax code enforcement and the marginalization of the poor immigrants and people of color As Biehler shows urban pests have remained a persistent problem at the intersection of public health politics and environmental justice even amid promises of modernity and sustainability in American cities Watch the trailer <http://www.youtube.com/watch?v=GG9PFxLY7K4> feature c4 overview list UUge4MONgLFncQ1w1C\_BnHcw *Transformative Sustainability Education* Elizabeth A. Powell, 2016-11-14 Miles Powell explores how early conservationists became convinced that the vitality of America's white races depended on preserving the wilderness. These suburban tales and their everyman protagonists grapple however indirectly with the implications of the apparent decline of the economic, geopolitical and moral authority of the United States. In the context of perceived decay and diminishing influence these novels actively counteract the narrative of American exceptionalism frequently peddled in the wake of 9/11.
