94724 2_20 *Race in the Schoolyard* Amanda E. Lewis, 2003-03-26 *Race in the Schoolyard* is a wonderful book for social scientists studying race education and childhood studies The book showcases the talents of a gifted fieldworker whose theoretically rich work sits on the cutting edge of a growing body of scholarship examining the social worlds of children School officials parents and most especially a new generation of teachers will benefit from these lessons on race American Journal of Sociology Instructors may recommend this book to students to whom the topic is surely vital and engrossing and for whom the text will be lively and engaging Contemporary Sociology Lewis moves beyond traditional research methods used to examine achievement gaps and differences in test scores to look closely at the realities of schooling I highly recommend this work for every person involved in teaching and learning Multicultural Review Through eloquent case studies of three California elementary schools a white majority good school a mostly minority tough school and an integrated alternative school Lewis demonstrates that schools promote racial inequalities through their daily rituals and practices Even the notion of a color blind America an especially popular ideal in the white school perpetuates racism Lewis argues because it denies or dismisses the very real constraints that schools place on minorities Lewis is nevertheless an optimist insisting that schools can change ideas of race Highly recommended Undergraduate collections and above Choice In this pioneering ethnography in elementary schools Lewis shows brilliantly how racism is taught and learned in the small places of everyday life Joe Feagin University of Florida and author of *Racist America* A wonderful and timely book Ethnographically rich theoretically sophisticated and clearly written this book addresses the ubiquitous issue of race in all its complexity Mich le Foster author of *Black Teachers on Teaching* A compelling ethnography of the racial landscape of contemporary schools Barrie Thorne author of *Gender Play Girls and Boys in School* Could your kids be learning a fourth R at school reading writing rithmatic and race *Race in the Schoolyard* takes us to a place most of us seldom get to see in action our children s classrooms and reveals the lessons about race that are communicated there Amanda E Lewis spent a year observing classes at three elementary schools two multiracial urban and one white suburban While race of course is not officially taught like multiplication and punctuation she finds that it nonetheless insinuates itself into everyday life in schools Lewis explains how the curriculum both expressed and hidden conveys many racial lessons While teachers and other school community members verbally deny the salience of race she illustrates how it does influence the way they understand the world interact with each other and teach children This eye opening text is important reading for educators parents and scholars alike

Multiculturalism and Education Richard Race, 2015-02-26 There is a need to rethink education studies in these times of change in terms of literacies and technologies conflict and environmental concerns and a need for authoritative texts addressing the key areas within education sociology child and infant development social justice policy social welfare and development and multiculturalism This popular text provides approaches to the theoretical perspectives and frameworks and focuses on the relevant literature surrounding multiculturalism for today s students This new edition includes a completely

new contemporary chapter on the notion of multicultural citizenship and new integrationist policies in England including the latest research on citizenship immigration and integration as applied to worldwide education policy making Including extensive examples of empirical research study questions updated references and website resources Multiculturalism and Education 2e is essential reading for all those studying multiculturalism at undergraduate and postgraduate levels within education and the wider social sciences today Race Relations in Britain Tessa Blackstone, Bhikhu Parekh, Peter Sanders, 2005-06-27 Bringing together distinguished experts in the field of race relations this book addresses questions which are increasingly relevant in the current socio political context of Great Britain The kind of visions of multicultural Britain which are currently being canvassed and the problems which ethnic minorities continue to face are addressed together with an examination of the new policy initiatives which are needed to tackle these problems Race Relations in Britain falls into three parts which analyse contemporary trends articulating a vision of multicultural Britain and exploring important theoretical controversies identify the obstacles that stand in the way of a racism free Britain looking at current policy in areas such as immigration employment education the criminal justice system as well as the role of the media offer a vision of a multi cultural Britain advancing new policies based on current research Rationing Education David Gillborn, Deborah Youdell, 1999-12-16 This research should make us extremely sceptical that the constant search for higher standards and for ever increasing achievement scores can do much more than put in place seemingly neutral devices for restratification Michael W Apple John Bascom Professor of Curriculum and Instruction and Educational Policy Studies University of Wisconsin Madison Recent educational reforms have raised standards of achievement but have also resulted in growing inequalities based on race and social class School by school league tables play a central role in the reforms These have created an A to C economy where schools and teachers are judged on the proportion of students attaining five or more grades at levels A to C To satisfy these demands schools are embracing new and ever more selective attempts to identify ability Their assumptions and practices embody a new IQism a simple narrow and regressive ideology of intelligence that labels working class and minority students as likely failures and justifies rationing provision to support those often white middle class boys already marked for success This book reports detailed research in two secondary schools showing the real costs of reform in terms of the pressures on teachers and the rationing of educational opportunity It will be important reading for any teacher researcher or policymaker with an interest in equality in education Mixed Matters Denise Williams, 2011 More often than not mixed race pupils are simply referred to as black and tend to be encompassed in a larger more diverse group of black pupils but the increased presence of mixed race pupils in schools needs to focus the efforts of education professionals to address issues of race ethnicity and culture Mixed Matters is essential reading for all educational professionals who want to get to grips with the issues that face mixed families and the pupils themselves as they share their personal experiences of what it is like to be them in the British schooling system The young people featured in this book

challenge some of the commonly held assumptions made about them especially regarding their aspirations This book contains some resources that can be used to support work with mixed race pupils as well as initial training and professional development of teachers The book also details the approach of Mixed formerly the Multiple Heritage Project in organising youth conferences and training youth facilitators of mixed race to lead their peers in discussions about school and identity

Equity and Excellence in Education Kris Van den Branden, Piet Van Avermaet, Mieke Van Houtte, 2010-12-14 Taking an international perspective this volume explores numerous issues gender socio economic and linguistic background teachers expectations pedagogical approaches parental support educational policies e g priority policies multilingual policies early start policies and their effects on equity in education

Structural Injustices in Swedish Education Dennis Beach, 2018-09-17 While Sweden is often viewed as a benchmark for equality within education this book examines this assumption in greater depth The author argues that Sweden's education system even prior to the global spread of neoliberalism in education meta policies and privatization was never particularly equal Instead what became apparent was a system that offered advantages to the upper social classes under a sheen of meritocracy and tolerable inequalities Combining ethnographic and meta ethnographic methodologies and analyses the author examines the phenomenon of structural injustice in the Swedish education system both vertically and diachronically across a period of intensive transformation and reform This revealing volume offers a mode of engagement that will be of value and interest to researchers and students of injustices within education as well as policy makers and practitioners

International Handbook of Migration, Minorities and Education Zvi Bekerman, Thomas Geisen, 2011-10-06 Migrants and minorities are always at risk of being caught in essentialized cultural definitions and being denied the right to express their cultural preferences because they are perceived as threats to social cohesion Migrants and minorities respond to these difficulties in multiple ways as active agents in the pedagogical political social and scientific processes that position them in this or that cultural sphere On the one hand they reject ascribed cultural attributes while striving towards integration in a variety of social spheres e g school and workplace in order to achieve social mobility On the other hand they articulate demands for cultural self determination This discursive duality is met with suspicion by the majority culture For societies with high levels of migration or with substantial minority cultures questions related to the meaning of cultural heterogeneity and the social and cultural limits of learning and communication e g migration education or critical multiculturalism are very important It is precisely here where the chances for new beginnings and new trials become of great importance for educational theorizing which urgently needs to find answers to current questions about individual freedom community cultural affiliations and social and democratic cohesion Answers to these questions must account for both political and learning perspectives at the macro mezzo and micro contextual levels The contributions of this edited volume enhance the knowledge in the field of migrant minority education with a special emphasis on the meaning of culture and social learning for educational processes

Racism and Antiracism in

Real Schools David Gillborn, 1995-02-16 How are race and racism implicated in education policy and practice What does effective antiracism look like in practice How can teachers and school students be encouraged to think critically about their racialized assumptions and actions In exploring these questions David Gillborn makes a vital contribution to the debate on race and racism in education He focuses on racism in the policy research theory and practice of education and includes the first major study of antiracism at the level of whole school management and classroom practice The voices of teachers and school students bring the issues to life and illustrate the daily problems of life in urban schools This is a fascinating picture of the key matters facing managers classroom teachers and their students as schools struggle to develop strong and workable approaches to anti racist education It is accompanied by a critical review of current debates and controversies concerning race ethnicity and identity Arguing for a critical return to the concept of race Racism and Antiracism in Real Schools represents an important addition to the literature on the theory and practice of education in a racist society
