**Heritability** Neven Sesardic, 2005-10-13 In this book Neven Sesardic defends the view that it is both possible and useful to measure the separate contributions of heredity and environment to the explanation of human psychological differences He critically examines the view very widely accepted by scientists social scientists and philosophers of science that heritability estimates have no causal implications and are devoid of any interest In a series of clearly written chapters he introduces the reader to the problems and subjects the arguments to close philosophical scrutiny His conclusion is that anti heritability arguments are based on conceptual confusions and misunderstandings of behavioural genetics His book is a fresh and compelling intervention in a very contentious debate **Christianity, Education and Modern Society** William

Jeynes, Enedina Martinez, 2007-10-01 The issues that these authors address in this book are some of the most salient in American society It is imperative that Americans today address these issues and establish an appropriate world view There is little question that how people resolve these issues will have a long lasting impact on the future of civilization **Real Black** John L. Jackson Jr., 2005-11-15 New York s urban neighborhoods are full of young would be emcees who aspire to keep it real and restaurants like Sylvia s famous soul food eatery that offer a taste of authentic black culture In these and other venues authenticity is considered the best way to distinguish the real from the phony the genuine from the fake But in Real

Black John L Jackson Jr proposes a new model for thinking about these issues racial sincerity Jackson argues that authenticity caricatures identity as something imposed on people imprisoning them within stereotypes turning them into racial objects and inanimate things instead of living breathing human beings Contending that such assumptions deny people agency not to mention humanity in their search for identity Jackson counterposes sincerity an internal and more productive analytical model for thinking about race Moving in and around Harlem and Brooklyn Jackson offers a kaleidoscope of subjects and stories that directly and indirectly address how race is negotiated in today s world including tales of name changing hip hop emcees book vending numerologists urban conspiracy theorists corrupt police officers mixed race neo Nazis and high school gospel choirs forbidden to catch the Holy Ghost Enlisting Anthroman his cape crusading critical alter ego Jackson records and retells these interconnected sagas in virtuosic detail and in the process shows us how race is defined and debated imposed and confounded every single day **Killer Apes, Naked Apes, and Just Plain Nasty People** Richard J.

**Magical Thinking, Fantastic Film, and the Illusions of Neoliberalism** Michael J. Blouin, 2016-06-29 This book analyzes how contemporary popular films with fantastic themes including Candyman Frozen The Cabin in the Woods and The Incredible Burt Wonderstone cultivate neoliberal subjectivities These films promise dramatic change but they too often deliver more of the same Although proponents maintain the illusion that the militant enforcement of freemarket economics will resolve racism climate change and imperialism their magical thinking actually fuels the crises Magical Thinking Fantastic Film and the Illusions of Neoliberalism explores the ways in which the visual economies of Hollywood fantasy compliment this particular political economy [Viewpoints](#) Mary Strong, Laena Wilder, 2013-05-01 Early in its history anthropology was a visual as well as verbal discipline But as time passed visually oriented professionals became a minority among their colleagues and most anthropologists used written words rather than audiovisual modes as their professional means of communication Today however contemporary electronic and interactive media once more place visual anthropologists and anthropologically oriented artists within the mainstream Digital media small sized and easy to use equipment and the Internet with its interactive and public forum websites democratize roles once relegated to highly trained professionals alone However having access to a good set of tools does not guarantee accurate and reliable work Visual anthropology involves much more than media alone This book presents visual anthropology as a work in progress open to the myriad innovations that the new audiovisual communications technologies bring to the field It is intended to aid in contextualizing explaining and humanizing the storehouse of visual knowledge that university students and general readers now encounter and to help inform them about how these new media tools can be used for intellectually and socially beneficial purposes Concentrating on documentary photography and ethnographic film as well as lesser known areas of study and presentation including dance painting architecture archaeology and primate research the book s fifteen contributors feature populations living on all of the world s continents as well as within the United States The final chapter gives readers practical advice about how to use the most current digital and interactive technologies to present research findings

Ideological and Political Bias in Psychology Craig L. Frisby, Richard E. Redding, William T. O'Donohue, Scott O.

Lilienfeld, 2023-09-13 This book examines the traditional assumptions made by academics and professionals alike that have embedded sociopolitical biases that impede practice and undermine efforts to achieve an objective scientific status. If allowed to go unchallenged, the credibility of psychology as a discipline is compromised. This contributed volume thoroughly and comprehensively examines this concern in a conceptually and empirically rigorous manner and offers constructive solutions for minimizing undue political influences within the field of psychology. Societies in the 21st century desperately need reliable psychological science, but we don't have it. This important volume explains one of the main reasons why we are making little progress on any issue that gets contaminated by the left-right culture war: because the field of psychology is an enthusiastic member of one of the two teams, so it rejects findings and researchers who question its ideological commitments. The authors of this engaging volume also show us the way out. They diagnose the social dynamics of bias and point to reforms that would give us the psychology that we need to address 21st-century problems. Jonathan Haidt, Thomas Cooley Professor of Ethical Leadership, NYU Stern School of Business and author of *The Righteous Mind: The boundaries of free speech, censorship, moral cultures, social justice, and ideological biases* are among the many incendiary topics discussed in this book. If you are looking for a deep dive into real-world contemporary controversies, *Ideological and Political Bias in Psychology* fits the bill. The chapters are thoughtful and thought-provoking. Most readers will find something to agree with and something to rage at in almost every chapter. It just may change how you think about some of these topics. Diane F. Halpern, Professor of Psychology, Emerita, Claremont McKenna College and Past President, American Psychological Association. Unless the political left is always correct about everything, in which case we wouldn't need to do research, we could just ask a leftist: the growing political monoculture of social science is a major barrier to our search for the truth. This volume shows how ideological bias should be treated as a source of research error, up there with classic methodological flaws like non-random assignment and non-blind measurement. Steven Pinker, Johnstone Professor of Psychology, Harvard University and the author of *Rationality*. An important read for academics curious about how their politics/fashions/beliefs that too often are uncritically taken for granted, and for non-academics wondering why we can't shake off the politics that so influences scientific work. Vernon Smith, Nobel Laureate in Economic Sciences and George L. Argyros Chair in Finance and Economics, Chapman University. Advances and deepens empirically rigorous scholarship into biased political influences affecting academic and professional psychology. Offers constructive solutions for minimizing undue political influences within psychology and moving the field forward. Serves as a resource for psychological academicians, researchers, practitioners, and consultants seeking to restore the principles of accurate science and effective practice to their respective areas of research. *Anthropology and the Racial Politics of Culture* Lee D. Baker, 2010-03-03 An account of how anthropology has responded to and helped shape ideas about race and culture in the United States and how its ideas have been appropriated to different ends. *The Cost of Inclusion* Blake R.

Silver,2020-07-17 Young people are told that college is a place where they will find themselves by engaging with diversity and making friendships that will last a lifetime This vision of an inclusive diverse social experience is a fundamental part of the image colleges sell potential students But what really happens when students arrive on campus and enter this new social world The Cost of Inclusion delves into this rich moment to explore the ways students seek out a sense of belonging and the sacrifices they make to fit in Blake R Silver spent a year immersed in student life at a large public university He trained with the Cardio Club hung out with the Learning Community and hosted service events with the Volunteer Collective Through these day to day interactions he witnessed how students sought belonging and built their social worlds on campus Over time Silver realized that these students only achieved inclusion at significant cost To fit in among new peers they clung to or were pushed into raced and gendered cultural assumptions about behavior becoming the cool guy the nice girl the funny one the leader the intellectual or the mom of the group Instead of developing dynamic identities they crafted and adhered to a cookie cutter self one that was rigid and two dimensional Silver found that these students were ill prepared for the challenges of a diverse college campus and that they had little guidance from their university on how to navigate the trials of social engagement or the pressures to conform While colleges are focused on increasing the diversity of their enrolled student body Silver s findings show that they need to take a hard look at how they are failing to support inclusion once students arrive on campus
