Sergio Saleem Scatolini,2024-11-26 This edited book looks at society education language and spirituality through international multicultural and critical lenses As the elite now eye the colonisation of biology and outer space we must surmount narratives subservient to privilege and power which explains the book s decolonial agenda The rise of AI and biotechnologies has opened the door to a future where the place of humanity and human intelligence in the universe will be understood and experienced differently Evolution shall move beyond natural human intelligence and biology If we want more inclusive fair and sustainable futures we must articulate new narratives and spiritualities that can harmonise science

technology and religious wisdom But to re evaluate the human self and society and their intersection with the non human world we must recognise and neutralise the underlying currents of privilege and power in education language and religion
