**Wilson Library Bulletin** Stanley Kunitz,Marie Duvernoy Loizeaux,1922 *People of the Image* Marc Michael Epstein,2025-06-24 The Middle Ages provide us with one of the richest repositories of art in the West Yet the rise in the production of art made for and by Jews especially in the form of illuminated manuscripts is often neglected in general surveys or viewed as a mere emulation of Christian art during this period In *People of the Image* Marc Michael Epstein demonstrates how medieval Jews transformed their visual art into a vital site of critical commentary Through bold speculation and radical interpretation Epstein considers how viewers might have empathized with depicted emotions how they envisioned the relationship between the monstrous and the human and how they could effectively perpetrate subversive acts merely by anticipating what might occur next in a given image were it to be set in motion Examining these artworks and imagining the circumstances of their production and reception Epstein uncovers otherwise inaccessible social political and theological perceptions among Europe s major medieval minority He goes on to illuminate the afterlives of medieval Jewish art in its reimaginations by postmodern Jews struggling to establish a conceptual as well as a political space for themselves as a minority in majority Christian society Bringing together diverse currents from various fields and bodies of literature *People of the Image* reveals how medieval Jews understood themselves the world and God Provocative and engagingly written the book will appeal to audiences across medieval studies cultural studies art history and Jewish studies

Brain Neuroscience Evolution and Nature by David Williams addresses the premise that humans are a biological species stemming from the long process of evolution and that we do exhibit a universal human nature given to us through our genes. From this perspective literature is shown to be a product of our biological selves. By exploring central ideas in neuroscience, evolutionary biology, linguistics, music, philosophy, ethics, religion, and history, Williams shows that it is the circuitry of the brain's hard-wired dispositions that continually create similar tales around the world, archetypal stories reflecting ancient tensions that arose from our evolutionary past and the very construction of our brains. The book asserts that to truly understand literature one must look at the biological creature creating it. By using the lens of science to examine literature, we can see how stories reveal universal aspects of the biological mind. The Trickster character is particularly instructive as an archetypal character who embodies a raft of human traits and concerns. For Trickster is often god, devil, musical, sexual, silver-tongued, animal, and human at once, treading upon the moral dictates of culture. Williams brings together science and the humanities, demonstrating a critical way of approaching literature that incorporates scientific thought.

### **Andersonville Violets**

Herbert Winslow Collingwood, 2000. Within the walls of the infamous Andersonville prisoner of war camp, a Confederate guard and his Northern captive find their fates intertwined. When John Rockwell, a Yankee captive at Andersonville, reaches across the prison's dead line to pluck a bunch of violets, Confederate guard Jack Foster is supposed to shoot him. Conflicted over thoughts of Lucy Moore, his girl back home, Foster lowers his gun. Spared, Rockwell lives to escape Andersonville, and Foster is discharged in disgrace. After the war, the paths of the two men are predictably divergent. Foster, as a symbol of the Confederacy, is a burned-out bitter shell. Rockwell, as an emblem of the North, is thrifty and eager to make something of himself. When Rockwell's ambitions lead him to take charge of a rundown plantation in Foster's native Mississippi, the prisoner and guard find their paths crossing once again. The struggle of these men represents the post-war chasm between North and South and raises issues of forgiveness and renewal.

**Holy Writ** Dr Arie-Jan Kwak,2013-02-28 It has often been remarked that law and religion have much in common One of the most conspicuous elements is that both law and religion frequently refer to a text that has authority over the members of a community In the case of religion this text is deemed to be holy in the case of law some such as the American constitution are widely held as sacred In both examples priests and judges exert a duty to tell the community what the founding document has to say about contemporary problems This therefore involves an element of interpretation of the relevant authoritative texts and this book focuses on such methods of interpretation in the fields of law and religion As its starting point scholars from different disciplines discuss the textualist approach presented here by American Supreme Court Judge and academic scholar Justice Antonin Scalia not only from the perspective of law but also from that of theology The result is a lively discussion which presents a range of diverse perspectives and arguments with regard to interpretation in law and religion
