Garth, Austin Sarat, 1998 The question of how law matters has long been fundamental to the law and society field Social science scholarship has repeatedly demonstrated that law matters less or differently than those who study only legal doctrine would have us believe Yet research in this field depends on a belief in the relevance of law no matter how

often gaps are identified The essays in this collection show how law is relevant in both an instrumental and a constitutive sense as a tool to accomplish particular purposes and as an important force in shaping the everyday worlds in which we live Essays examine these issues by focusing on legal consciousness the body discrimination and colonialism as well as on more traditional legal concerns such as juries and criminal justice

*Is Killing Wrong?* Mark Cooney, 2009-10-07 Thou shalt not kill is arguably the most basic moral and legal principle in any society Yet while some killers are pilloried and punished others are absolved and acquitted and still others are lauded and lionized Why The traditional answer is that how killers are treated depends on the nature of their killing whether it was aggressive or defensive intentional or accidental But those factors cannot explain the enormous variation in legal officials and citizens responses to real life homicides Cooney argues that a radically new style of

thought pure sociology can be conceived by the sociologist Donald Black pure sociology makes no reference to psychology to any single person's intent or even to individuals as such. Instead pure sociology explains behavior in terms of its social geometry its location and direction in a multidimensional social space. *Is Killing Wrong* provides the most comprehensive assessment of pure sociology yet attempted. Drawing on data from well over one hundred societies including the modern day United States it represents the most thorough account yet of case level social control or the response to conduct defined as wrong. In doing so it demonstrates that the law and morality of homicide are neither universal nor relative but geometrical as predicted by Black's theory.
