Racial State:

The Racial State David Theo Goldberg, 2001-12-21 The Racial State argues that race is integral to the conceptual philosophical and material emergence of modern nation state formation and to its ongoing management *Racial Formation in the United States* Michael Omi, Howard Winant, 1994 Discusses racial formation theory the idea that race is a constructed identity dependent upon social economic and political factors **Beyond the Racial State** Devin O. Pendas, Mark Roseman, Richard F. Wetzell, 2017-11-16 The racial state has become a familiar shorthand for the Third Reich encapsulating its raison d'être ambitions and the underlying logic of its genocidal violence The Nazi racial state's agenda is generally understood as a fundamental reshaping of society based on a new hierarchy of racial value However this volume argues that it is time to reappraise what race really meant under Nazism and to question and complicate its relationship to the Nazis agenda actions and appeal Based on a wealth of new research the contributors show that racial knowledge and racial discourse in Nazi Germany were far more contradictory and disparate than we have come to assume They shed new light on the ways that racial policy worked and was understood and consider race's function content and power in relation to society and nation and above all in relation to the extraordinary violence unleashed by the Nazis **Famine Irish and the American Racial State** Peter D. O'Neill, 2017-02-03 Interdisciplinary and transnational in scope this book analyzes an array of state theories literary figures religious apparatuses cultural artifacts and political movements to demonstrate how the Irish not only fitted into but also helped to form the US racial state The Racial State Rakesh Narpat Bhandari, 2003 **Race and State** Karen Fricker, Ronit Lentin, 2009-01-14 Speaking about racism in the western political climate of the first decade of the twenty first century is more difficult than ever before There is a feeling in post colonial and post immigration societies that the blatant overt racism of the past is no longer as pressing Admitting racism elicits discomfort because common wisdom tells us that racism opposes everything that we believe in as citizens of democratic civilised modern states Yet state racism appears to be here to stay and in many ways is more acceptable than ever before Immigration detention centres the deportation of failed asylum seekers and illegal immigrants racial profiling and the rolling back of liberties won by the civil rights movement are all examples of how state racism impacts on our daily lives *Race and State* contributes to breaking the taboo of discussing the links between race and state The papers collected in this book highlight the interconnections between race and state from historical theoretical or contemporary sociological perspectives Part I of the book looks at theoretical issues in conceptualising the race state relationship Part II examines racism in its most pernicious contemporary manifestation the racialisation of terror Part III on the racial state's of Ireland is an important addition to the debate examining Ireland as a test case for demonstrating and interpreting the relationship between race and state Critical Rhetorics of Race Michael G. Lacy, Kent A. Ono, 2011 In this collection scholars seek to examine the complicated and contradictory terrain of the rhetorics of race while moving the field of communication in a more intellectually productive

Wellman, 1993-09-24 First published in 1977 *Portraits of White Racism* advanced a distinctively sociological theory of racism Based on five case histories it critically assessed the prevailing social psychological paradigm that equated racism with prejudice and provided an alternative interpretation Racism the book argued could be understood as a culturally sanctioned strategy for defending social advantage based on race it was not simply the product of psychological abnormalities In this revised edition the theoretical perspective is updated taking into account recent theorising in the sociology of racism *The*

Race and Crime Elizabeth Brown, George Barganier, 2018-10-02 Criminal justice practices such as policing and imprisonment are integral to the creation of racialized experiences in U S society Race as an important category of difference however did not arise here with the criminal justice system but rather with the advent of European colonial conquest and the birth of the U S racial state Race and Crime examines how race became a defining feature of the system and why mass incarceration emerged as a new racial management strategy This book reviews the history of race and criminology and explores the impact of racist colonial legacies on the organization of criminal justice institutions Using a macrostructural perspective students will learn to contextualize issues of race crime and criminal justice Topics include How coloniality explains the practices that reproduce racial hierarchies The birth of social science and social programs from the legacies of racial science The defining role of geography and geographical conquest in the continuation of mass incarceration The emergence of the logics of crime control the War on Drugs the redefinition of federal law enforcement and the reallocation of state resources toward prison building policing and incarceration How policing courts and punishment perpetuate the colonial order through their institutional structures and policies Race and Crime will help students understand how everyday practices of punishment and surveillance are employed in and through the police courts and community to create and shape the geographies of injustice in the United States today

Race and Multiraciality in Brazil and the United States G. Reginald Daniel, 2007-07-01 Although both Brazil and the United States inherited European norms that accorded whites privileged status relative to all other racial groups the development of their societies followed different trajectories in defining white black relations In Brazil pervasive miscegenation and the lack of formal legal barriers to racial equality gave the appearance of its being a racial democracy with a ternary system of classifying people into whites brancos multiracial individuals pardos and blacks pretos supporting the idea that social inequality was primarily associated with differences in class and culture rather than race In the United States by contrast a binary system distinguishing blacks from whites by reference to the one drop rule of African descent produced a more rigid racial hierarchy in which both legal and informal barriers operated to create socioeconomic disadvantages for blacks But in recent decades Reginald Daniel argues in this comparative study changes have taken place in

both countries that have put them on converging paths Brazil's black consciousness movement stresses the binary division between brancos and negros to heighten awareness of and mobilize opposition to the real racial discrimination that exists in Brazil while the multiracial identity movement in the U S works to help develop a more fluid sense of racial dynamics that was long felt to be the achievement of Brazil's ternary system Against the historical background of race relations in Brazil and the U S that he traces in Part I of the book including a review of earlier challenges to their respective racial orders Daniel focuses in Part II on analyzing the new racial project on which each country has embarked with attention to all the political possibilities and dangers they involve *Power and Inequality* Levon Chorbajian, 2021-05-30 Successfully bringing together accessible readings that cover the broad range of issues of importance to those studying politics and society this new edition of *Power and Inequality* provides a unique mix of theoretical and empirical pieces such as state and electoral politics that address both classic issues in political sociology and more recent developments such as globalization With strong integration of race and gender throughout this collection offers a coherent analysis of power that reflects the contributions of a variety of critical perspectives including Marxism feminism critical race theory postmodernism and power structure theory

What is Islamophobia? Narzanin Massoumi, Tom Mills, David Miller, 2017-06-20 As racist undercurrents in many western societies become manifestly entrenched the prevalence of Islamophobia and the need to understand what perpetuates it has never been greater Critiquing the arguments found in notionally left accounts and addressing the limitations of existing responses *What is Islamophobia* demonstrates that Islamophobia is not simply a product of abstract or discursive ideological processes but of concrete social political and cultural actions undertaken in the pursuit of certain interests The book centres on what the editors refer to as the five pillars of Islamophobia the institutions and machinery of the state the far right incorporating the counterjihad movement the neoconservative movement the transnational Zionist movement and assorted liberal groupings including the pro war left and the new atheist movement The book concludes with reflections on existing strategies for tackling Islamophobia considering what their distinctive approaches mean for fighting back *Southeastern Geographer* David M.
