Racism And Human Rights Nijhoff Law Specials 58:

The Ethical Economy of Conflict Prevention And Development Ralf Bredel, 2007 Central to the current development debate is the importance of human welfare in the context of group conflict. When considering ethnic racial and religious conflict, this debate draws us toward a political economy of conflict. Moreover, notions of an economic paradigm have become prominent when international organizations debate conflict prevention. In looking closer at the political economy of conflict, this publication argues the need to assimilate into our thinking distinct social and ethical economies of conflict prevention. A social economy of conflict prevention considers the interplay of economic with structural and cultural factors in conflict, explaining a much neglected category of conflict, i.e. hidden conflict. The ethical economy of conflict prevention considers implicit ethical statements development practitioners use. From these statements arise ethical paradoxes that influence the evolving economic paradigm in such way as to contradict one of its intrinsic desires, namely to restrict conflict prevention strategies to effective technical interventions. Eventually, such narrow focus on technical interventions could identify this evolving paradigm as an economical paradigm. In contrast, a rethinking of the ethical economy of conflict prevention provides a useful tool for international organizations when implementing a human rights based approach to development and long term conflict prevention.

Property Rights in Blood, Genes and Data Jasper A. Bovenberg, 2006 Taking a case and context driven approach and backing up traditional legal analysis with historical analogies, web surveys and practical experience, Jasper Bovenberg provides counter intuitive, provocative and practical answers and recommendations for such controversial issues as how to share the benefits of DNA research, whether or not to recognize personal property rights in bodily material and access to biomedical datasets in academia.

Disability in International Human Rights Law Gauthier de Beco, 2021-08-12 This book examines what international human rights law has gained from the new elements in the UN Convention on the Rights of Persons with Disabilities (CRPD). It explores how the CRPD is intricately bound up with other international instruments by studying the relationship between the Convention rights and those protected by other human rights treaties as well as the overall objectives of the UN. Using a social model lens on disability, the book shows how the Convention sheds new light on the very notion of human rights. The book provides a theoretical framework which explicitly integrates disability into international human rights law. It explains how the CRPD challenges the legal subject by drawing attention to distinct forms of embodiment before introducing the idea of the disabled subject, which stems from a recognition that all individuals encounter disability related issues during their lives. The book also shows how to apply this theoretical framework to several rights and highlights the consequences for the implementation of human rights treaties as a whole. It builds upon the literature of disability studies and legal and political theory as well as drawing upon the recommendations of treaty bodies and reports of UN agencies and disabled people's organisations. This book thereby provides an agenda setting analysis for all human rights experts by showing the benefits of placing disabled people at the

heart of international human rights law *The Right to National Self-Determination* Sjúður Skaale,2005-01-01 What are the Faroese and the Greenlanders Are they peoples in their own right indigenous peoples or Danish minorities And what is their status under international law Do they have the right to national self determination And if so what does this right include This volume describes the constitutional history of the Faroes and Greenland it analyses the current international status of the two countries and compares it to countries in similar situations and looks at how Denmark has administered the sovereignty of its dependencies It thus sheds new light on a constitutional arrangement that by some is described as democratic creative and imaginative and by others is deemed colonial But the book also deals with the status of non sovereign polities and the right to self determination in general as well as with the current attitude of the UN towards such matters It thus offers insights which can be of value for other countries struggling with the issue as well as scholars working in this field **Human Rights and the UN: Practice Before the Treaty Bodies** Michael O'Flaherty,2021-11-22 *The Rule of Law, Freedom of Expression and Islamic Law* Hossein Esmaeili,Irmgard Marboe,Javaid Rehman,2017-12-14 The importance of the rule of law is universally recognised and of fundamental value for most societies Establishing and promoting the rule of law in the Muslim world particularly in the Middle East North Africa and Central Asia has become a pressing but complicated issue These states have Muslim majority populations and the religion of Islam has an important role in the traditional structures of their societies While the Muslim world is taking gradual steps towards the establishment of rule of law systems most Muslim majority countries may not yet have effective legal systems with independent judiciaries which would allow the state and institutions to be controlled by an effective rule of law system One important aspect of the rule of law is freedom of expression Given the sensitivity of Muslim societies in relation to their sacred beliefs freedom of expression as an international human rights issue has raised some controversial cases This book drawing on both International and Islamic Law explores the rule of law and freedom of expression and its practical application in the Muslim world **Accountability, Investigation And Due Process in International Organizations** Chris De Cooker,2005 This work brings together a number of papers written by experts mostly senior and active international civil servants but also retired staff analyzing the measures taken in international organizations in order to obtain greater accountability Codes of conduct have been introduced as well as more detailed measures of control This has also required review of due process and dispute resolution provisions The main objective of these codes of conduct is to foster appropriate behaviour of staff but ideally these codes should also be instrumental in avoiding disputes since staff knew more clearly what is expected of them This book is a reflection of exchanges of views and information between administrative lawyers and to some extent investigators prosecutors to ensure that the organizations become more transparent corruption free and respective of the highest standards Accountability and transparency have now become the rule and increasingly also the practice Much is still to be done however Discussions are ongoing in many organizations This work s purpose is also to contribute to these

discussions In addition to the analytic and frank contributions this work contains various documents of international organizations reflecting the codes of conduct and charters of values now in place

Democratising Development Peris Jones, Kristian Stokke, 2005-11-01 What are the prospects and means of achieving development through a democratic politics of socio economic rights Starting from the position that socio economic rights are as legally and normatively valid as civil and political rights this anthology explores the politics of acquiring and transforming socio economic rights in South Africa The book brings together an interdisciplinary group of leading scholars in an examination of the multifaceted politics of social and economic policy making rights based political struggles and socio economic rights litigations The post apartheid South African experience shows that there is no guarantee that democracy will eliminate poverty or reduce social inequality but also that democratic institutions and politics may provide important means for asserting interests and rights in regard to development Thus it is argued that democratic politics of socio economic rights may democratise development while also developing democracy

The September 11 Terrorist Attacks and the Invasion of Iraq in Contemporary International Law Edward McWhinney, 2004-11-01 The US administration's pursuit of the Al Qaeda organisation and Taliban regime in Afghanistan responsible for the September 11 2001 international terrorist attacks was supported by an international coalition of the willing and backed by the full legal authority of UN Security Council Resolutions The US bid to follow this successful multilateral initiative with similar armed intervention against Saddam Hussein's government failed to rally support in the Security Council The US then proceeded to act unilaterally and with British military support to invade Iraq The problems for contemporary international law and the UN Charter based World Order system posed by the conflicts within the Security Council and the assorted legal claims advanced such as a revived doctrine of Humanitarian Intervention regime change as a justification for intervention Preemptive military strikes as an

exercise in Self defence and Multilateralism versus Unilateralism in the exercise of the Peace and Security powers under the UN Charter are canvassed in the present collection of legal opinions *Swords Into Plowshares* Roy S.K. This volume reflects legal philosophical and international perspectives, addresses numerous unanswered questions and offers an effective overview of the current literature and debate in this aspect of the discipline of law and religion.

The Right to Protection from Incitement to Hatred Mona Elbahtimy, 2021-10-28. Against the backdrop of the new globalized hate speech dynamics, the nature and scope of States' obligations pursuant to international human rights law on prohibiting incitement to hatred have taken on increased importance and have become a controversial issue within multilateral human rights diplomacy. Key questions being posed in the on-going debates over how best to respond to the new wave of hatred include whether the international legal norm against incitement to hatred as it currently stands is suitable to address the contemporary challenges of this phenomenon. Alternatively, does it need to be developed further? This book traces the journey of this norm in three analytical domains: its emergence, relevant supranational jurisprudence and the recent standard setting attempts within the UN. The book argues that five internal features of the norm had a strong influence on its difficult path within international human rights law.

Caste-based Discrimination in International Human Rights Law Mr David Keane, 2013-02-28. With particular focus on the Hindu caste system, this book represents a comprehensive analysis of the elimination of all forms of racial discrimination in international law. It evaluates the strategies that have informed the work of the United Nations in this area, mapping a new path that moves from standard setting to implementation. Combining legal analysis with the meaning and origin of caste, it explores the remedies human rights law can propose towards the prohibition of caste-based discrimination and the abolition of the caste system itself. The book provides a benchmark on the achievements of the international community in combating all forms of racial discrimination and the policies that must inform future measures. With its clear and accessible style, this volume will be of interest to scholars of law and human rights as well as policy makers and practitioners working in this area.

Religion, Secular Beliefs and Human Rights Natan Lerner, 2006-06-30. Religion and beliefs related to religion are today a central factor in international life and politics. International law and human rights law in particular have to take into consideration the religious dimension and have done it to some extent. A body of positive law has already been developed for the protection of freedom of religion and from religion by the UN and regional organizations. This book, incorporating previously published as well as unpublished materials, discusses the legal meaning of religion and belief, the UN work in this respect, religious minorities, relevant regional and special arrangements, the issues of proselytism, religion and terrorism, the use of religious symbols, international criminal law and some particular situations such as the state and religious communities in Israel and this country's agreement with the Holy See. Law schools, human rights scholars and activists and international organizations will find interest in the book.
