Radar Cross Section, Second Edition Eugene F. Knott, John F. Shaeffer, Michael T. Tuley, 1993 **Who's who in Engineering**, 1995 **The Federal Index**, 1978 **Bibliography of Agriculture**, 1991-04 *Radar Foundations for Imaging and Advanced Concepts* Roger Sullivan, 2004 Through courses internally taught at IDA Dr Roger Sullivan has devised a book that brings readers fully up to speed on the most essential quantitative aspects of general radar in order to introduce study of the most exciting and relevant applications to radar imaging and advanced concepts Synthetic Aperture Radar 4 chapters Space time Adaptive Processing moving target indication MTI bistatic radar low probability of intercept LPI radar weather radar and ground penetrating radar Whether you are a radar novice or experienced professional this is an essential reference that features the theory and practical application of formulas you use in radar design every day With this book you are taken step by step through the development of modern airborne microwave radar up to the cutting edge of emergent technologies including new results on theoretical 2D and 3D ISAR point spread functions PSF and current discussions concerning dechirp deskew SAR processing layover in SAR images vibrating targets foliage penetration image quality parameters and more Plus for students of electrical engineering physics and radar this book provides the best source for basic airborne radar understanding as well as a broad introduction to the field of radar imaging **Guide to U.S. Government Publications**, 2008-08 This comprehensive yet concise annual annotated reference source catalogs the important series periodicals and reference tools published by U S government agencies Over the years the index section of the Guide to U S Government Publications has expanded to more than 40 000 entries Agencies and titles are indexed followed by a keyword title index for quick and easy referencing No other single resource provides historical and current information on U S government publications in one place **Japanese Technical Periodical Index**, 1986 **Radar Principles for the Non-Specialist** John C. Toomay, 1989-04-27 What This Book Is This book is about radar It will teach you the essentials of radar the underlying principles It is not like an engineering handbook which provides detailed design equations without explaining either derivation or rationale It is not like a graduate school textbook which may be abstruse and esoteric to the point of incomprehensibility And it is not like an anthology of popular magazine articles which may be gaudy but superficial It is an attempt to distill the very complex rich technology of radar into its fundamentals tying them to the laws of nature on one end and to the most modern and complex systems on the other Who It's For If your work requires you to supervise or meet as equals with radar systems engineers or designers this book will allow you to understand them to question them intelligently and perhaps to provide them with a perspective a dispassionate yet competent view that they lack If you are trained in another discipline but have been made the manager of a radar project or a system program that has one or more radars as subsystems this book will provide you with the tools you need not only to give your team members confidence but also to make a substantive technical contribution yourself **The SciTech Radar and Defense Series**,
