Religion The Modern Theories:

Religion Seth Daniel Kunin,2003 Over the course of the twentieth century the way we understand the religious experience has been transformed Various thinkers and intellectual approaches have shaped the ways in which scholars examine rituals symbols and belief systems In **Understanding Theories of Religion** Ivan Strenski,2015-03-30 Featuring comprehensive updates and additions the second edition of Understanding Theories of Religion explores the development of major theories of religion through the works of classic and contemporary figures A new edition of this introductory text exploring the core methods and theorists in religion spanning the sixteenth century through to the latest theoretical trends Features an entirely new section covering religion and postmodernism race sex and gender and religion and postcolonialism Examines the development of religious theories through the work of classic and contemporary figures from the history of anthropology sociology psychology philosophy and theology Reveals how the study of religion evolved in response to great cultural conflicts and major historical events Student friendly features include chapter introductions and summaries biographical vignettes a timeline a glossary and many other learning aids Theories of Religion Seth Daniel Kunin,Jonathan Miles-Watson,2006 This book provides a comprehensive selection of readings that relate to and explore the definition of religion The texts come from a wide range of approaches unified both by the questions they are addressing and their broadly social scientific perspective The disciplines covered include anthropology phenomenology psychology and sociology The editors have also included some key texts relating to the feminist approach to and critique of religion The first section of the book includes some of the foundational texts such as materials by Marx Freud and Durkheim The remaining sections look at more recent discussions of the issues from the different disciplinary perspectives Each reading is introduced by a biographical sketch of the author The book also includes introductory discussions to each section that both raise the key issues developed in a particular discipline and address the disciplinary approaches from a more critical stance Theories of Religion A Reader is an invaluable critical resource accessible to a broad audience as well as students of theology and religious studies **Modern Theories in Philosophy and Religion** John Tulloch,1884 **Modern Theories of Religion** Eric S. Waterhouse,1977-04 **Secular Theories on Religion** Tim Jensen,Mikael Rothstein,2000 Scholars of religious studies from Europe and North America explore what a secular or scientific study of religion should be like what methods it should apply what aims and what kind of scientific thinking should be pursued They also consider scholars as public intellectuals operating within and influenced by general societal developments The 18 essays provide a survey of current thinking in the field Distributed in the US by ISBS c Book News Inc **Modern Religion, Modern Race** Theodore Vial,2016-06-16 Religion is a racialized category even when race is not explicitly mentioned In Modern Religion Modern Race Theodore Vial argues that because the categories of religion and race are rooted in the post Enlightenment project of reimagining what it means to be human we cannot simply will ourselves to stop using them Only by acknowledging that

religion is already racialized can we begin to understand how the two concepts are intertwined and how they operate in our modern world It has become common to argue that the category religion is not universal or even very old but is a product of Europe s Enlightenment modernization Equally common is the argument that religion is not an innocent category of analysis but is implicated in colonial regimes of control and as such plays a role in Europe s process of identity construction of itself and of non European others Current debates about race follow an eerily similar trajectory race is not an ancient but a modern construction It is part of the project of colonialism and race discourse forms one of the cornerstones of modern European identity making Why can t we stop using them or re construct them in less toxic ways By examining the theories of Kant Herder and Schleiermacher among others Vial uncovers co constitutive nature of race and religion describes how they became building blocks of the modern world and shows how the two concepts continue to be used today to form identity and to make sense of the world He shows that while we disdain the racist language of some of the founders of religious studies the continued influence of the modern worldview they helped create leads us often unwittingly to reiterate many of the same distinctions and hierarchies Although it may not be time to abandon the very category of religion with all its attendant baggage Modern Religion Modern Race calls for us to examine that baggage critically and to be fully conscious of the ways in which religion always carries with it dangerous ideas of race

material on contemporary societies as well as new coverage of topics such as pilgrimage and paganism Images a glossary and questions for discussion are now included and additional resources are provided via a companion website **A Short**

Introduction to World Religions Tim Dowley, 2018-07-01 This leading textbook for world religions is now available in a more concise version Many of the features of Introduction to World Religions are retained in this volume but with focus on the religious traditions themselves The section on religions of antiquity has been removed and key content in each chapter streamlined to increase accessibility for students in their study and research of the world's religious traditions Known and valued for its balanced approach this book offers an arresting layout with rich illustrations It continues to provide broad coverage of diverse religions including indigenous religions Hinduism Buddhism Jainism Judaism Christianity Islam Sikhism and Chinese Korean and Japanese religions The user friendly content is enhanced by charts of religious festivals historic timelines updated maps of the world's religions and a useful glossary Both historical overviews and modern perspectives for each religion are included This edition includes several updates made to the new third edition including a new design a new section on women and religion and a newly revised section on religions in today's world Religion in the Twenty-first century and beyond: A Social sciences perspective Sujay Rao Mandavilli, 2024-04-19 The term Religion refers to a wide range of social cultural systems which include beliefs morals ethics religious practices thought worlds worldviews holy texts and scriptures sanctified holy places and institutions that typically relate to the general belief in a God or a supernatural entity Religion has been known in a wide variety of geographical contexts and situations and attested since very early times as a matter of fact even before the dawn of human civilization As a matter of fact there have been very few known human societies without some form of an organized or an informal religion In the past few centuries technology has progressed at a rapid pace and at a rate that would have been unimaginable just two centuries ago Many pundits predicted that the role played by religion in society would invariably and inevitably diminish alas such prophecies have not come to pass Religion and the role played by it in society remains as deeply entrenched as ever before As a matter of fact globalization has unleashed a clash of civilizations and has brought different and widely differing ideologies into direct contact with each other often unleashing waves of terror In the wide array and assortment of papers that we have been publishing over the years we have introduced many different concepts that we believe can greatly help in understanding the role religion plays in relation to society Readers can easily reference these papers In this paper we attempt to take our endeavours to a much higher level to analyse how the beneficial aspects of religion can be magnified and amplified and the negative implications of religion curtailed We also lay out the contours of social science research that can effectively tackle the menace of religious fanaticism and hatred and draw out a road map and a course of action other researchers and scholars can easily relate to This is far from an easy task but sociologists and anthropologists have a major role to play here Hence this oeuvre Other researchers and scholars must contribute in no small measure and those belonging to different parts of the world and hailing from

different backgrounds and cultures There are fundamental schisms in today's scholarship and interdisciplinary and cross cultural enterprise is still sparse The Author once had a Muslim friend highly educated who was more interested in Greek civilization than in Islam The Author had another Muslim friend less educated who was a devout Muslim He did not even know how old Islam was and neither had he read the Qu ran fully Therefore we must avoid stereotypes and accept the fact that we are living in a multicultural world and in a multispeed civilization The clash of civilizations is also a fact though it must be eventually mitigated Halloween parties in Saudi Arabia and anti Mullah rhetoric in Iran may be reactionary belligerent displays of wrath meaningful and permanent change must be brought about only through the realm of social sciences Many eminent sociologists of yore studied different forms of religion studiously and diligently even with some kind of an implicit or a feverish reverence or veneration yet many other scholars today are of an atheistic disposition tending to write of the utility of religion in the modern world Why this disconnect These are all issues we need to ruminate and ponder over if we are to solve social problems and build a meaningful and a deep rooted edifice of research We also need original thinkers not legions of camp followers of the west to use an aphorism by Sir CV Raman who was the first Indian to bring home the Nobel prize in science Intellectuals and thinkers must be aligned to social requirements and must be sensitive to cultural factors Otherwise the words of Carl Jung will come into play The deep critical thinker has become the misfit of the world this is not a coincidence To maintain order and control you must isolate the intellectual the sage the philosopher the savant before their ideas awaken people or as CS Lewis states The greatest evils in the world are not carried out by men with guns but by men in suits sitting behind desks Esoterism and nerdism appear to be the bane in various academic disciplines As Daniel Dennett put it many philosophers pursue isolated paths and dedicate their intellect purely to age old ideas without considering the advancements of modern science Scholars also do not think through issues deeply and comprehensively enough However change must be brought about slowly and in a graduated fashion It must be brought about tactfully and diplomatically without trampling on people's sensitivities As William Shakespeare put it Go wisely and slowly Those who rush stumble and fall We also need objectivity in mindset otherwise all attempts at scientific progress will fail Even the best or the most advanced and uptodate software cannot date the Ramayana or the Mahabharata accurately if objectivity in mindset does not exist Change can however be brought about As Jose Andres once famously stated The modernity of yesterday is the tradition of today and the modernity of today will be tradition tomorrow
