Global Perspectives on Catholic Religious Education in Schools Michael T. Buchanan, Adrian-Mario Gellel, 2019-03-01 This book shares global perspectives on Catholic religious education in schools chiefly focusing on educational and curriculum issues that take into account the theology and the pedagogy which support learning in connection with Catholic religious education Further it offers insights into the distinctive contribution that Catholic religious education makes to religious education and education in general across diverse schooling contexts Bringing together insights from leading scholars and experts on Catholic religious education around the globe the book offers an essential reference guide for all those involved in researching planning and designing curricula for Catholic religious education as well as developing related theories in the field

Readiness for Religion Ronald Goldman, 2018-12-07 In this study first published in 1965 the author explores the implications of research for an alternative approach to religious education The book deals with the psychological bases of religious development reviewing the natural limitations as well as the basic needs of the young and how religious education should be affected by educational theory and practice The author also examines what content and methods of teaching are consistent with the healthy development of children and adolescents Teachers in schools students in training lecturers clergy and ministers and local education authority committees will welcome the book as an important aid to the task of rethinking syllabuses and the need for more child centred methods of teaching

Handbook of Preschool Religious Education Donald Ratcliff, 2008-06-01 Handbook of Preschool Religious Education is an exhaustive and comprehensive treatment of the

entire field of early childhood religious education This encyclopedic volume is an indispensable guide and resource for all those involved in the religious education of young children The Routledge International Handbook of Religious Education Derek Davis,Elena Miroshnikova,2013-02-01 How and what to teach about religion is controversial in every country The Routledge International Handbook of Religious Education is the first book to comprehensively address the range of ways that major countries around the world teach religion in public and private educational institutions It discusses how three models in particular seem to dominate the landscape Countries with strong cultural traditions focused on a majority religion tend to adopt an identification model where instruction is provided only in the tenets of the majority religion often to the detriment of other religions and their adherents Countries with traditions that differentiate church and state tend to adopt a separation model thus either offering instruction in a wide range of religions or in some cases teaching very little about religion intentionally leaving it to religious institutions and the home setting to provide religious instruction Still other countries attempt managed pluralism in which neither one nor many but rather a limited handful of major religious traditions are taught Inevitably there are countries which do not fit any of these dominant models and the range of methods touched upon in this book will surprise even the most enlightened reader Religious instruction by educational institutions in 53 countries and regions of the world are explored by experts native to each country These chapters discuss Legal parameters in terms of subjective versus objective instruction in religion Constitutional statutory social and political contexts to religious approaches Distinctions between the kinds of instruction permitted in elementary and secondary schools versus what is allowed in institutions of higher learning Regional assessments which provide a welcome overview and comparison This comprehensive and authoritative volume will appeal to educators scholars religious leaders politicians and others interested in how religion and education interface around the world Global Perspectives on Spirituality and Education Jacqueline Watson,Marian de Souza,Ann Trousdale,2013-12-04 In recent decades and around the world much attention has been given to the role of spirituality in the education of children and young people While educationalists share many common goals and values in nurturing the spiritual lives of children and young people national and regional cultures religions and politics have impacted on the approaches scholars and practitioners have adopted in their investigations and practices The different contexts across nations and regions mean that educators face quite distinct conditions in which to frame their approaches to spiritual education and research and the nature and impact of these differences is not yet understood This book brings together thinkers from around the globe and sets them the task of explaining how their research on children s spirituality and education has been shaped by the historical cultural religious and political contexts of the geographic region in which they work The book presents contributions in three sections Europe and Israel Australasia and The Americas and concludes with a chapter highlighting what is common and what is contextually unique about global approaches to spirituality and education

The Role of Subject Knowledge in the Early Years of Schooling Carol Aubrey,2022-11-21 Originally published in

1994 the aim of the authors was to provide a comprehensive introduction to recent advances in research which had been made in learning and teaching in the early years of schooling at the time Emphasis is placed on how subject knowledge is constructed or acquired and the organization of teaching to promote the learner's active construction of meaning through the integration of new knowledge with existing understanding The National Curriculum is founded in subject knowledge though little examination appears to have been made of this in terms of how subject matter is transformed into the content of teaching that young children can understand It this remains for the teacher to develop instruction through the creation of a curriculum content and sequence which both reflects and advances the structure of existing forms of representation problem solving and knowledge which the child brings to the school The whole thrust of the book challenges the conventional early years ideology with its emphasis on child centred concrete and empirical approaches to learning with a view of teaching which is concerned with making sense of children's understanding and allowing their active construction of knowledge and information processing to develop expertise in context

EBOOK: FIRST YEARS AT SCHOOL Angela Anning, 1997-01-16 Review of 1st edition I found the whole account a model of clarity with a good blend of theory and practice which many authors would do well to note Ted Wragg TES The First Years at School 2nd Edn is a practical and reflective discussion of the education of 4 to 8 year olds based on a sympathetic recognition of the complexities of being an early years teacher Angela Anning begins by reviewing the historical and

ideological traditions of British infant and primary schools tracing how we have reached the position where teachers feel themselves to be torn between child centered and utilitarian demands in educating young children She then provides a detailed and authoritative critique of recent thinking about the cognitive social and emotional development of children and explores the complexities of teachers roles She discusses the organization of the classroom the structuring of learning in the school day and the content of the curriculum She tackles the implications of the series of changes in the National Curriculum Orders and the national assessment systems for seven year olds and their impact on pre fives and children with special educational needs The second edition brings the debate about the post Dearing Key Stage One curriculum and its implications for pre school education bang up to date This will be vital reading for both student and practising teachers of young children

EBOOK: National Curriculum for the Early Years Angela Anning,1995-10-16 What does the National Curriculum mean to pupils and teachers at Key Stage One How have teachers and children coped with the ongoing changes How has subject teaching altered in infant classrooms In A National Curriculum for the Early Years Angela Anning and her team of contributors set out to examine these issues Infant teachers and their pupils were the guinea pigs for the introduction of the National Curriculum over a five year period Despite many reservations about a subject based curriculum for young children teachers struggled to interpret the National Curriculum Orders into a workable if not manageable curriculum in their classrooms The contributors to this book each experts in a subject discipline have kept in close touch with practising and intending infant teachers as the National Curriculum was operationalized in primary schools They have used their teacher networks as well as research evidence to tap into the strategies used by infant teachers to cope with the planning delivery and assessment of the National Curriculum subjects and the effects of government policy changes on young children s learning Together the contributors provide a timely analysis of subject discipline based education for young children and look ahead to the prospects for those subjects at Key Stage One in the second half of the 1990s This book will be essential reading for anyone involved in the education of young children

Early Childhood Jewish Education Sigal Achituv,Meir Muller,Shelley T. Alexander,Hanan Alexander,2022-12-29 Early Childhood Jewish Education explores some of the fundamental questions of early childhood Jewish education in today s societal moral and educational debates The book examines the challenges of transmitting Jewish heritage using developmentally appropriate pedagogy in the context of modern democratic society through the lenses of multiculturalism gender awareness and constructivism Researchers from Israel and the United States consider some of the core Jewish foundational subjects including teaching the Bible holidays and ceremonies Hebrew Jewish literature and spirituality as well as leadership issues in relation to these contemporary debates The book represents the ongoing collaboration of leading researchers from Israel and the United States who have worked together since 2010 as the International Research Group on Jewish Education in the Early Years

The Fourth 'R' Veronica King,2004 A multifaceted approach seemed appropriate for this study the purpose of which was to investigate the teaching of

Catholic Religious Education in Early Years The methodology used was eclectic and designed to accommodate the exploratory nature of the investigation The elements of the study consisted of activities with the children participating in the study interviews with the diocesan Re co ordinator principals teachers and parents in conjunction with questionnaires for teachers and second class pupils Other elements of the study involved surveys of classrooms and schools and data obtained from available documents and religious textbooks The results of the children s activities demonstrated that the majority of the Irish Catholic children studied have a positive attitude toward religious education The comparison of the current Irish Catholic RE programme with other programmes showed that the programme is child centred and attempts to foster children s faith Interviews with the principals teachers and parents also suggested a positive attitude toward RE on the part of the significant adults in these children s lives The children s attitudes were interpreted as potential interest waiting to be developed The study concluded that a partnership approach to Catholic religious education is now needed This partnership should include children parents teachers clergy and the local parish community and is needed to support parents in their role as primary educators of their children especially with respect to religious education Finally some recommendations are made with regard to the development of a more home and parish based religious education for young children

Religious Education ,1923 Available on microfilm from University Microfilms **Faith Development in Early Childhood** Doris A. Blazer,1989-03 Essays which have grown out of the experience of the December 1987 Kanuga National Symposium on Faith Development in Early Childhood P 4 of cover Includes bibliographical references p 155 169 *Re-Enchanting Education and Spiritual Wellbeing* Marian de Souza,Anna Halafoff,2017-09-14 Education is in a constant state of renewal internationally where it responds to a number of pressing social political and cultural issues Processes of globalization a number of conflicts and acts of terror economic and environmental crises have led to large waves of migration and asylum seekers arriving in countries with the hope of finding safer and more stable places to settle This in turn has led to cultural and religious pluralism being a key characteristic of many societies with corresponding issues of belonging and identity As well for many people there has been a shifting influence of and allegiance away from traditional religious frameworks with the emergence of new religious movements both peaceful and violent and a rise in popularity of spirituality and non religious worldviews which provide alternate frameworks for living healthy and ethical lives In order to prepare today s student for tomorrow s world one which is confronted by a range of risks and crises and which is being shaped by rapidly changing technologies educators and researchers are investigating new ways of equipping students to deal with these challenges and opportunities including the nurturing of spiritual wellbeing This book brings together the voices of many experienced educators to discuss ways to re enchant education and re enliven learning programs in response to these 21st century issues in an increasingly global and interconnected world It examines a range of international contexts including secular and religious educational settings and provides an avenue for visionary voices that identify problems and offer solutions to help shape a more

promising education system that will prepare children more constructively and beneficially to flourish in their future worlds
