Research in Law and Economics Richard O. Zerbe, Richard O. Zerbe, Jr., 1995 Part of a series focusing on research into law and economics this volume discusses a variety of topics in the field *40 Years of Research on Rent Seeking 2* Roger D. Congleton, Arye L. Hillman, Kai A. Konrad, 2008-08-01 The last survey of the rent seeking literature took place more than a decade ago Since that time a great deal of new research has been published in a wide variety of journals covering a wide variety of topics The scope of that research is such that very few researchers will be familiar with more than a small part of contemporary research and very few libraries will be able to provide access to the full breadth of that research This two volume collection provides an extensive overview of 40 years of rent seeking research The volumes include the foundational papers many of which have not been in print for two decades They include recent game theoretic analyses of rent seeking contests and also applications of the rent seeking concepts and methodology to economic regulation international trade policy economic history political competition and other social phenomena The new collection is more than twice as large as any previous collection and both updates and extends the earlier surveys Volume I contains previously published research on the theory of rent seeking contests which is an important strand of contemporary game theory Volume II contains previously published research that uses the theory of rent seeking to analyze a broad range of public policy and social science topics The editors spent more than a year assembling possible papers and although the selections fill two large volumes many more papers could have been included [Proceedings of the International Conference on Advance Research in Social and Economic Science \(ICARSE 2022\)](#) Hyeyun Ku, Bobur Sobirov, Dyah Sugandini, Mochammad Tanzil Multazam, 2023-04-26 This is an open access book Theme Optimizing the use of social science and economics in the post pandemic revival era The Covid 19 pandemic is slowly starting to be overcome Contributions from various disciplines are also needed in the context of post pandemic recovery including the fields of social science and economics Thus the International Conference on Advanced Research in Social and Economic Science is a forum for researchers and practitioners to exchange ideas and advances on how emerging research methods and sources are applied to various fields of the social sciences as well as discuss current and future challenges Join the social sciences conference as we explore the latest trends in social sciences and discuss common challenges in politics social communication humanities networking society business sustainable development and international relations **Report of Research Activities** Yale University. Cowles Foundation for Research in Economics, 1954 **Research On Efficiency And Fairness Of Resources Allocation By China's Governmental Administration** Hong Sheng, Pu Qian, 2019-06-13 In China the government controls a large part of resources such as land energy bank savings and so on This book studies the efficiency and fairness of resources allocation by governmental administration in China The book states that it is neither fair nor efficient to allocate resources by the governmental administrations These resources should be allocated by the market The book analyzes the resources allocation by

government administration in three key areas namely education health care and land A quantitative analysis is developed for describing more precisely the situation of unfairness in fiscal resources allocation This book also describes how ordinary people address the misposition of resources by governmental administrations by migrating from the provinces with less resources to the provinces with more resources in education or health care Thus the book concludes that the actual allocation of resources is determined by the interactions between ordinary people and the government

in accounting research Zahirul Hoque, 2018-03-26 What is my theory How do I choose a theory Why and how should I employ a particular method for collecting the empirical data These basic questions concern everyone involved in research A research study can be a voyage of discovering or choice of theoretical perspective as well as gathering empirics or facts on a problem or situation This book provides a good guideline as to why and how to choose a particular theory or method to study an organisational phenomenon such as accounting All the chapters provide both retrospective and contemporary views by scholars in the field Each chapter documents the latest developments and research in accounting and control systems and provides valuable insights into methodological perspectives in accounting research This second edition has also introduced a number of new chapters covering strategy management control as practice grounded theory approach institutional logic and rhetoric social interaction theory actor network theory and practice theory The book is primarily intended for research students and academic researchers It can also be used for undergraduate Honours course as well as postgraduate accounting and business methodology courses Research organisations and consulting firms in accounting and business fields may also find this book useful The principal aims of this second edition are 1 to update the chapters previously published in 2006 and 2 to introduce new chapters documenting recent developments in accounting research *Knowledge Capital and the "New Economy"* Pontus Braunerhjelm, 2012-12-06 According to its proponents the new economy is associated with sustainable growth increased demand for labor and zero inflation On the micro level this bright avenue into the future is propelled by knowledge capital flexibility and new ways of organizing production such as clusters and networks Progress in information technology together with massive deregulation on the national and the international levels have been credited with setting this development into motion The concept of the new economy has been rapidly embraced by politicians as it seems to offer a way out of the traditional trade off between unemployment and wage inflation However empirical evidence regarding the microeconomic mechanisms of the new economy is scarce Knowledge Capital and the New Economy Firm Size Performance and Network Production intends to narrow this gap by empirically analyzing the composition of knowledge capital and how knowledge capital is distributed across firms of different size Moreover the impact of knowledge capital on firms profitability and international competitiveness is also examined Finally we compare cluster dynamics and the institutional set up in Europe and the U S with the purpose of identifying regulations that seem to hinder a conducive environment for expanding and dynamic European clusters The results of this study emphasize the role of knowledge capital and flexibility Thus irrespective of how sustainable the new economy turns out to be the policy implications in terms of providing institutions that facilitate knowledge enhancing economic activities flexible markets and transparent incentive structures are undeniable Countries that fail in this respect may find themselves trailing in the international growth and welfare rankings **Law, Economics and Antitrust** Paddy McNutt, 2005-01-01 those who are dealing with antitrust issues the book is very useful and if somebody has already acquired the basic economic principles underlying antitrust regimes one
