Cultivating Creativity through World Films David Campos, Ericka Knudson, 2019-11-01 With the aim to help teachers design and deliver instruction around world films featuring child protagonists Cultivating Creativity through World Films guides readers to understand the importance of fostering creativity in the lives of youth It is expected that by teaching students about world films through the eyes of characters that resemble them they will gain insight into cultures that might be otherwise unknown to them and learn to analyze what they see Teachers can use these films to examine and reflect on differences and commonalities rooted in culture social class gender language religion etc through guided questions for class discussion The framework of this book is conceived to help teachers develop students ability to evaluate analyze synthesize and interpret The proposed activities seek to incite reflection and creativity in students and can be used as a model for teachers in designing future lessons on other films

Societies in Space Gary Westfahl, 2025-01-21 Science fiction films and television programs about space travel have undergone a significant transformation since their inception In contrast to the early depictions of small spaceship crews on exploratory missions recent film and television portrayals depict much larger societies in space as well as the obstacles that arise with them This collection of essays examines many aspects of making space travel films from the process of screenwriting to the impact of Greek myth on modern film with illuminating commentary on contemporary problems including class distinction racism and sexism Contributors to this volume including several extensively published scholars and science fiction writers analyze a wide variety of relevant science fiction films and television programs ranging from Star Trek Silent Running the Alien films and Japanese anime to more recent works like Battlestar Galactica Avatar Elysium The Martian Passengers and Ad Astra

Young Adult Science Fiction C. W. Sullivan III, 1999-03-30 At the close of the nineteenth century American youths developed a growing interest in electricity and its applications machines and gadgetry When authors and publishers recognized the extent of this interest in technology they sought to create reading materials that would meet this market need The result was science fiction written especially for young adults While critics tended to neglect young adult science fiction for decades they gradually came to recognize its practical and cultural value Science fiction inspired many young adults to study science and engineering and helped foster technological innovation At the same time these works also explored cultural and social concerns more commonly associated with serious literature Nor was young adult science fiction a peculiarly American phenomenon authors in other countries likewise wrote science fiction for young adult readers This book examines young adult science fiction in the U S and several other countries and explores issues central to the genre The first part of the book treats the larger contexts of young adult

science fiction and includes chapters on its history and development Included are discussions of science fiction for young adults in the U S and in Canada Great Britain Germany and Australia These chapters are written by expert contributors and chart the history of young adult science fiction from the nineteenth century to the present The second section of the book considers topics of special interest to young adult science fiction Some of the chapters look at particular forms and expressions of science fiction such as films and comic books Others treat particular topics such as the portrayal of women in Robert Heinlein s works and representations of war in young adult science fiction Yet another chapter studies the young adult science fiction novel as a coming of age story and thus helps distinguish the genre from science fiction written for adult readers All chapters reflect current research and the volume concludes with extensive bibliographies **Activities Linking**

Science With Math, 5-8 John Eichinger,2009-05-30 Science does not exist in a vacuum and therefore shouldn t be taught that way In that spirit Activities Linking Science With Math 5 8 is a hands on guide for preservice and inservice elementary and middle school teachers who want to connect science instruction with other areas of study including visual arts social sciences language arts and especially math Fantastic Voyages Leroy W. Dubeck,Suzanne E. Moshier,Judith E.

Boss,2006-05-31 By revealing the facts behind the fiction of some of the finest films in the sci fi genre Fantastic Voyages offers a novel approach to teaching science using scenes from science fiction films to illustrate fundamental concepts of physics astronomy and biology **Reaction!** Mark Griep,Marjorie Mikasen,2009 ReAction Chemistry in the Movies gives a scientist s and artist s response to the dark and bright sides of chemistry found in 140 films most of them contemporary Hollywood feature films but also from a few others This book explores the two movie faces of this supposedly neutral science

Resources in Education ,1990 *Little Horrors* T.S. Kord,2016-07-25 Zombies werewolves and chainsaw wielding maniacs are tried and true staples of horror films But none can match the visceral dread evoked by a child with an innocent face and a diabolical stare Cinema s evil children attack our cherished ideas of innocence and our innocent bystander status as the audience A good horror film is a scary ride a devil child movie is a guilt trip This book examines 24 international films with discussions of another 100 that in effect indict viewers for crimes of child abuse and abandonment greed social and ecological negligence and political and war crimes and for persistent denial of responsibility for them all For 75 years evil children have ritually rebuked audiences and in playing on our guilt established a horror subgenre that might be described as a blood spattered rampage on an ethical mission Routledge Handbook of Public Communication of Science and

Technology Massimiano Bucchi,Brian Trench,2021-02-28 Communicating science and technology is a high priority of many research and policy institutions a concern of many other private and public bodies and an established subject of training and education In the past few decades the field has developed and expanded significantly both in terms of professional practice and in terms of research and reflection At the same time particularly in recent years interactions between science and society have become a topic of heated public and political debates touching issues like quality and credibility of information

trust in science and scientific actors and institutions and the roles of experts in crises and emergencies This book provides a state of the art review of this fast growing and increasingly important area through an examination of research done on the main actors issues and arenas involved The third edition of the Handbook brings the reviews up to date and deepens the analysis As well as substantial re working of many chapters it includes four new chapters addressing enduring themes science publics science media theories recent trends art science interactions and new proposed insights on science communication as culture and as the social conversation around science New contributors are added to the group of leading scholars in the field featured in the previous editions The Handbook is a student friendly resource but its scope and expert contributions will equally appeal to practitioners and professionals in science communication Combining the perspectives of different disciplines and of different geographical and cultural contexts this original text provides an interdisciplinary as well as a global approach to public communication of science and technology It is a valuable resource notably an indispensable guide to the published work in the field for students researchers educators and professionals in science communication media and journalism studies sociology history of science and science and technology studies Chapter 8 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Internationalisation and Globalisation in Mathematics and Science Education Bill Atweh, Angela Calabrese Barton, Marcelo C. Borba, Noel Gough, Christine Keitel-Kreidt, Catherine Vistro-Yu, Renuka Vithal, 2008-07-14 This book aims to develop theoretical frameworks of the phenomena of internationalisation and globalisation and identify related ethical moral political and economic issues facing mathematics and science educators It provides a wide representation of views some of which are not often represented in international publications This is the first book to deal with issues of globalisation and internationalisation in mathematics and science education
