evangelical Christianity and democracy in America In Good News for Common Goods sociologist Wes Markofski explores how multicultural evangelicals across the United States are addressing race poverty inequality politics and religious and cultural difference in America s increasingly plural and polarized public arena Based on extensive original research on multicultural evangelicals active in faith based community organizing community development political advocacy and public service organizations across the country including over 90 in depth interviews with racially diverse evangelical and non evangelical activists community leaders and neighborhood residents Markofski shows how the varieties of public religion practiced by evangelical Christians are not always bad news for non evangelicals people of color and those advancing ethical democracy in the United States Markofski argues that multicultural evangelicals can and do work with others across race class religious and political lines to achieve common good solutions to public problems and that they can do so without abandoning their own distinctive convictions and identities or demanding that others do so Just as ethical democracy calls for a more reflexive evangelicalism it also calls for a more reflexive secularism and progressivism **Sincerely Held** Charles

Beyond Bias Scott Krzych, 2021 Beyond Bias offers the first scholarly study of contemporary right wing documentary film and video Drawing from contemporary work in political theory and psychoanalytic theory the book identifies what author Scott Krzych describes as the hysterical discourse prolific in conservative documentary in particular and right wing media more generally In its hysterical mode conservative media emphasizes form over content relies on the spectacle of debate to avoid substantive dialogue mimics the aesthetic devices of its opponents reduces complex political issues to moral dichotomies and relies on excessive displays of opinion to produce so much mediated noise as to drown out alternative perspectives or viewpoints Though often derided for its reliance on nonsense or hyperbole conservative media marshals incoherence as its prized aesthetic and rhetorical weapon a means to bolster the political status quo precisely by confusing those audiences who come into its orbit As a work of documentary studies Beyond Bias also places conservative non fiction films in conversation with their more conventional counterparts drawing insight from the manner by which conservative media hystericizes such issues as the archive observational methods directorial participation and the often moral imperatives by which documentary filmmakers attempt to offer insight into their subjects

Speculative Theology and Common-Sense Religion Linden J. DeBie, 2008-05-15 Evangelicals in nineteenth century America had a headquarters at Princeton Charles Hodge never expected that a former student of Princeton and his own replacement during his hiatus in Europe John W Nevin would lead the German Reformed Church's seminary in a new and in his mind destructive direction The two along with their institutions would clash over philosophy and religion producing some of the best historical theology ever written in the United States The clash was broad influencing everything from hermeneutics to liturgy but at its core was the philosophical antagonism of Princeton's Scottish common sense perspective and the German speculative method employed by Mercersburg Both Princeton and Mercersburg were the cautious and critical beneficiaries of a century of European Protestant science philosophy and theology and they were intent on adapting that legacy to the American religious context For Princeton much of the new European thought was suspect In contrast Mercersburg embraced a great deal of what the Continent offered Princeton followed a conservative path never straying far from the foundation established by Locke They enshrined an evangelical perspective that would become a bedrock for conservative Protestants to this day In contrast Nevin and the Mercersburg school were swayed by the advances in theological science made by Germany's mediating school of theology They embraced a churchy idealism called evangelical catholicism and emphatically warned that the direction of Princeton and with it Protestant American religion and politics

would grow increasingly subjective thus divided and absorbed with individual salvation They cautioned against the spirit of the growing evangelical bias toward personal religion as it led to sectarian disunity and they warned evangelicals not to confuse numerical success with spiritual success In contrast Princeton was alarmed at the direction of European philosophy and theology and they resisted Mercersburg with what today continues to be the fundamental teachings of evangelical theology Princeton's appeal was in its common sense philosophical moorings which drew rapidly industrializing America into its arms Mercersburg countered with a philosophically defended churchly idealism based on a speculative philosophy that effectively critiqued what many to this day find divisive and dangerous about America's current Religious Right

Common Sense in Early 18th-Century British Literature and Culture Christoph Henke, 2014-10-14 While the popular talk of English common sense in the eighteenth century might seem a by-product of familiar Enlightenment discourses of rationalism and empiricism this book argues that terms such as common sense or good sense are not simply synonyms of applied reason On the contrary the discourse of common sense is shaped by a defensive impulse against the totalizing intellectual regimes of the Enlightenment and the cultural climate of change they promote in order to contain the unbounded discursive proliferation of modern learning Hence common sense discourse has a vital regulatory function in cultural negotiations of political and intellectual change in eighteenth century Britain against the backdrop of patriotic national self-concepts This study discusses early eighteenth century common sense in four broad complexes as to its discursive functions that are ethical which at that time implies aesthetic as well transgressive as a corrective political in patriotic constructs of the nation and repressive of otherness The selection of texts in this study strikes a balance between dominant literary culture Swift Pope Defoe Fielding Johnson and the periphery such as pamphlets and magazine essays satiric poems and patriotic songs
