Security for Libraries Marvin Brand, 1984 Offers advice on the development of a plan for protecting a library's collection building users and staff and discusses the legal aspects of library security      **Library Crime and Security** Alan Jay Lincoln, Carol Zall Lincoln, 2019-12-06 This book first published in 1987 focuses on the patterns of library crime and disruption in Great Britain Canada and the United States In addition to important data on these problems there is extensive information on the characteristics of the institutions and the communities in which they are found The impact of crime on the institution and the individual is examined The authors present vital insights into the design of crime control programs in libraries of varying sizes that have or anticipate problems with crime such as book theft vandalism problem patrons and attacks against staff Major issues in the measurement incidence and consequences of crime are included as well as relevant materials from the fields of library science management criminology victimology and security An extensive security checklist is included that can serve as a guide for making the library a safer and more secure setting for staff patrons and contents

**The Library Security and Safety Guide to Prevention, Planning, and Response** Miriam B. Kahn, 2008 Security planning part of disaster response and continuous operations planning is the key to proactively addressing potential safety issues      **Building Security and Personal Safety**, 1989      Security and Crime Prevention in Libraries Michael Chaney, Alan F. MacDougall, 2019-05-23 First published in 1992 the purpose of this book is to identify and describe the most important factors that must be considered in making decisions about the optimal ways to provide access to information in short the best way to use the humans the machines and the intangible resources known as information particularly at the organizational level In recent years executives have begun to outsource computing and telecommunications functions primarily to control costs Traditional libraries and information centres have been disbanded in favour of service contracts or outright leasing of staff Both the private and public sector are examining their information service operations from the point of view of cost effectiveness Decisions about owning versus leasing of information are being made daily Decision makers are finding that they must deal differently with funding and budgeting of information systems and libraries than they have in the past New paradigms for these service functions already exist Not only have corporations and governments begun to contract out entire information service operations but libraries themselves have begun to consider the costs effectiveness and implications of outsourcing some of their operations and services This book provides a framework for decision makers to view and review information services within their organizations Entire units components of libraries and information centres are defined and untangled so that the widest variety of organizations can analyse their own environments Although there is a minimal use of library and computing jargon a short glossary at the end explains terms for which there is no simple English language substitute Each chapter is accompanied by comments from a broad range of experts in the information field
