In the Dust of This Planet Eugene Thacker, 2011-08-26 1 Amazon Best Seller in Philosophy Criticism The world is increasingly unthinkable a world of planetary disasters emerging pandemics and the looming threat of extinction In this book Eugene Thacker suggests that we look to the genre of horror as offering a way of thinking about the unthinkable world To confront this idea is to confront the limit of our ability to understand the world in which we live a central motif of the horror genre In the Dust of This Planet explores these relationships between philosophy and horror In Thacker's hands philosophy is not academic logic chopping instead it is the thought of the limit of all thought especially as it dovetails into occultism demonology and mysticism Likewise Thacker takes horror to mean something beyond the focus on gore and scare tactics but as the under appreciated genre of supernatural horror in fiction film comics and music This relationship between philosophy and horror does not mean the philosophy of horror if anything it means the reverse the horror of philosophy those moments when philosophical thinking enigmatically confronts the horizon of its own existence For Thacker the genre of supernatural horror is the key site in which this paradoxical thought of the unthinkable takes place The cover of In the Dust of this Planet can be seen in a New York gallery on a banner at the 2014 Climate Change march in New York and on Jay Z's back promoting Run The book influenced the writers of the US TV series True Detective and has been lambasted by ex Fox News broadcaster Glenn Beck in this podcast https://www.youtube.com/watch?v=2IW8OK4_1gQ
