Seeds And Sovereignty:

Globalisation and Seed Sovereignty in Sub-Saharan Africa Clare O'Grady Walshe, 2019-04-16 It is my expectation that respect for the critical importance of seed sovereignty will in due course be recognised by member states of the United Nations to be as critical to global peace and security as the UN Charter demands in respect of State sovereign equality justice human rights and economic and social wellbeing for all peoples Denis J Halliday UN Assistant Secretary General 1994 98 A constructive contribution to our understanding of what is going wrong and what can go right in the complex area of seed sovereignty Dervla Murphy renowned travel writer and adventurer Keeping seed diversity alive is the secret ingredient not just for the good nutrient dense food that every cook gardener and farmer producer needs but for strengthening our resilience in the face of multiple environmental threats This compelling and timely book helps us to understand what we are up against and how we can overcome it Darina Allen internationally renowned cook founder of Ballymaloe Cookery school and President of the East Cork Convivium of Slow Food This book studies the relationship between globalisation and seed sovereignty in Sub Saharan Africa It provides comparative case studies of the most recent Kenyan and Ethiopian seed laws as well as a study of seed sovereignty on the ground in a locality within Ethiopia Based on extensive fieldwork it identifies the interests and motivations of transnational seed corporations global philanthropic organisations state actors and local farmers It finds significant differences in the wording of seed laws and the exercise of seed sovereignty applying theories of globalisation to help us better understand these varied outcomes It shows that seed sovereignty has the potential to be shared between local national regional and global authorities but in different ways in different countries and localities In the face of what might sometimes appear to be unstoppable global forces these findings suggest that the exercise of seed sovereignty can be transformed even in a highly globalised world

Seed Sovereignty, Food Security Vandana Shiva, 2016-02-02 In this unique anthology women from around the world write about the movement to change the current industrial paradigm of how we grow our food As seed keepers and food producers as scientists activists and scholars they are dedicated to renewing a food system that is better aligned with ecological processes as well as human health and global social justice Seed Sovereignty Food Security is an argument for just that a reclaiming of traditional methods of agricultural practice in order to secure a healthy nourishing future for all of us Whether tackling the thorny question of GMO safety or criticizing the impact of big agribusiness on traditional communities these women are in the vanguard of defending the right of people everywhere to practice local biodiverse and organic farming as an alternative to industrial agriculture Contents Seed Sovereignty Food Security VANDANA SHIVA Fields of Hope and Power FRANCES MOORE LAPP ANNA LAPP The Ethics of Agricultural Biotechnology BETH BURROWS Food Politics the Food Movement and Public Health MARION NESTLE Autism and Glyphosate Connecting the Dots STEPHANIE SENEFF The New Genetics and Dangers of GMOs MAE WAN HO Seed Emergency Germany SUSANNE GURA GM Soy as Feed for Animals Affects Posterity IRINA ERMAKOVA ALEXANDER

Redclift, Delyse Springett, 2015-03-02 This Handbook gives a comprehensive international and cutting edge overview of Sustainable Development It integrates the key imperatives of sustainable development namely institutional environmental social and economic and calls for greater participation social cohesion justice and democracy as well as limited throughput of materials and energy The nature of sustainable development and the book's theorization of the concept underline the need for interdisciplinarity in the discourse as exemplified in each chapter of this volume The Handbook employs a critical

framework that problematises the concept of sustainable development and the struggle between discursivity and control that has characterised the debate. It provides original contributions from international experts coming from a variety of disciplines and regions including the Global South. Comprehensive in scope, it covers amongst other areas: Sustainable architecture and design, Biodiversity, Sustainable business, Climate change, Conservation, Sustainable consumption, De-growth, Disaster management, Eco-system services, Education, Environmental justice, Food and sustainable development, Governance, Gender, Health, Indicators for sustainable development, Indigenous perspectives, Urban transport. The Handbook offers researchers and students in the field of sustainable development invaluable insights into a contested concept and the alternative worldviews that it has fostered.

Contract Farming, Capital and State Ritika Shrimali, 2021-08-24. The book argues that an increasing corporatisation of agriculture in India that is enabled by its neoliberal State in the name of development is contributing towards deepening of inequality in the rural India. It says that Contract Farming (CF) acts as a conduit that enables the coming together of myriad production relations: mercantile finance, productive to sell agri-commodities to the capitalist peasant. It is an accumulation strategy that brings together various factions of domestic and foreign capital together. It shows that CF as an accumulation strategy is enabled by an active interventionist state and this neoliberal Indian state mediates the relation between the agri-capital and Indian peasantry. The book further analyzes contract farming as a part of the totality of the capitalist mode of production in context of developing countries with a large agrarian base, asking three fundamental questions: what is CF, how and why is it done and what are the implications of it.

Farm to Fingers Kiranmayi Bhushi, 2018-03-09. Enquires into the ways in which food and its production and consumption are enmeshed in aspects of human existence and society, taking India and its interaction with food as its focal point.

Contesting Africa's New Green Revolution Jacqueline A. Ignatova, 2021-05-20. Genetically modified crops have become a key element of development strategies across the Global South despite remaining deeply controversial. Proponents hail them as an example of pro-poor innovation while critics regard them as a threat to food sovereignty and the environment. The promotion of biotechnology is an integral part of new Green Revolution for Africa interventions and is also intimately linked to the rise of philanthrocapitalism which advances business solutions to address the problem of poverty. Through interviews with farmers, policymakers and agricultural scientists, Jacqueline Ignatova shows how efforts to transform the seed sector in northern Ghana, one of the key laboratories of this new Green Revolution, may serve to exacerbate the inequality it was notionally intended to address. But she also argues that its effects in Ghana have been far more complex than either side of the debate has acknowledged, with local farmers proving adept at blending traditional and modern agricultural methods that subvert the interests of global agribusiness.

The World-System as Unit of Analysis Roberto Patricio Korzeniewicz, 2017-09-22. World system analyses have recast the study of between and within nation-country inequality as constituent aspects of a single field of inquiry: the study of inequality and social stratification as processes that always have been global in their very

essence World system analyses maintain that global social stratification pivots around institutional arrangements that render distributional outcomes as simultaneously national gendered racialized and global processes This book takes stock of some of the enduring theoretical and empirical contributions of a world system perspective and identifies promising directions for future inquiry and discussion Some chapters reassess the scope and methodologies of world system analysis around several key problems e g the spatial and temporal boundaries of global commodity chains the construction and challenge of various dimensions of social inequality systemic and antisystemic social movements Others take stock of areas in which world systems are promoting methodological innovation and or generating useful global data and identify questions that demand additional methodological and empirical attention for future research In different ways this book help us to critically reconsider some of the enduring legacies within a world system perspective such as Karl Polanyi s concept of the double movement or the distinction drawn by Giovanni Arrighi or Immanuel Wallerstein between systemic and antisystemic movements As argued by many of the authors in this book a world historical approach calls for greater sensitivity to the manifold ways in which conceptual boundaries change over time and space Taking seriously the issue of unit of analysis this book explores critically productive ways for better understanding global patterns of continuity and change
