

A man with a shaved head, wearing dark sunglasses and a black t-shirt, is in the foreground. He has a green backpack strap visible over his right shoulder. Behind him is a large, ornate, light-colored stone building with classical architectural features like columns and a pediment. A pink and white tour bus is parked on the street in front of the building. To the left, a person on a scooter is partially visible. The sky is clear and blue.

Playgrounds David J. Amelang, 2022-12-30 This book compares the theatrical cultures of early modern England and Spain and explores the causes and consequences not just of the remarkable similarities but also of the visible differences between them An exercise in multi focal theatre history research it deploys a wide range of perspectives and evidence with which to recreate the theatrical landscapes of these two countries and thus better understand how the specific conditions of performance actively contributed to the development of each country's dramatic literature This monograph develops an

innovative comparative framework within which to explore the numerous similarities as well as the notable differences between early modern Europe's two most prominent commercial theatre cultures. By highlighting the nuances and intricacies that make each theatrical culture unique while never losing sight of the fact that the two belong to the same broader cultural ecosystem, its dual focus should appeal to scholars and students of English and Spanish literature alike as well as those interested in the broader history of European theatre. Learning from what one playground that is the environment and circumstances out of which a dramatic tradition originates reveals about the other will help solve not only the questions posed above but also others that still await examination. This investigation will be of great interest to students and scholars in theatre history, comparative drama, early modern drama, and performance culture.
