Ewert, 2021-02-08 Do you have an uneasy sense that you are being manipulated every day and being misled You are and you aren't alone Every day we're bombarded by statements questionable reasoning emotional pleas and very selective data These are employed by the media politicians public figures and marketers in an effort to draw you to their side of the argument At times you may want to wave the white flag of surrender in the war for truth Maybe there is no truth Maybe there are many sometimes contradictory truths It doesn't feel like that could be possible but how else do you reconcile these very articulate but diametrically opposing viewpoints and data By developing critical analytical skills and learning what it means to be rational you'll be able to weigh the merits of the opposing viewpoints and more easily see gaps in others' arguments Being rational requires honesty and a sincere effort to determine what is true and what is not as a basis for making decisions What are you going to do about being manipulated and misled Learn what being rational means how to think rationally and develop skills to determine valid data and to have a truly rational discussion Seeing Through the Bumpf will help you become an informed and thoughtful analyst of the daily bombardment that comes your way

The Science Spell Chris Spark, 2021-04-07 His father was a scientist and atheist his mother a spiritual seeker As a boy he could sense magic even God in the woods that surrounded their rural New Hampshire home in the music of the Beatles and in the mystery of dreams But how could any of that really be real Surely the science his father believed in told us what was really real Our sense of having a soul is just chemicals Our presence in the universe is just the result of impersonal laws and natural selection And all our hopes are ultimately doomed in the eternal extinction of death That last one was the biggest gut punch As a boy Chris would sometimes lie in bed and contemplate that awful and seemingly certain fate until it became unbearable and with a shudder he pushed it from his mind But over the years as he read contemplated and experienced more he began to see things differently He began to realize that you could be intelligent and open minded like scientists are supposed to be and also embrace the reality of realms beyond In fact he came to see that the more intelligence and open mindedness we bring to the question of ultimate reality the less our conventional science looks like an authority on the topic The essays in The Science Spell don't question the value of science In fact they push its critical thinking further than most scientists are used to In easy playful prose these essays go where our most educated and well respected citizens generally don't In doing so they explore a paradox The idea of a universe devoid of magic may itself be a kind of spell Want to wake up Essays include The Science Fiction How Scientific Are Scientists Who Should We Ask About God Do Scientists Know What Reality Is What You See Is What You See Common Sense Ultimate Truth Where Scientists Fear to Tread Science Taboos Magic Meaning The Science Spell Science the Big Picture Summa cum laude Harvard graduate comedy screenwriter math and science teacher philosopher and published poet Chris Spark has been a lifelong seeker of truth without regard for the conventional ways our culture tends to divide up reality The Science Spell is the first collection of essays in the series Making Belief Essays Towards a Natural Magical Intelligent Faith In these essays Spark explores deep life changing ideas in lively down to earth prose What are the hidden connections between geometry and Jesus reason and revelation the paranormal and the pedestrian Is there a boundary between the impish and the important Between the sensual and the spiritual Between the everyday and the exalted Refusing to stop at border crossings or check points Chris Spark roams coyote like through the terrain of science philosophy sociology anthropology psychology history myth religion the supernatural and our own direct experience of the world By blending what we tend to keep separate
