**Seeking the Welfare of the City** Naomi Noguchi Reese, 2025-01-27 In the history of public theology the Holy Spirit s role in creation has been underexplored If the Holy Spirit is the agent of transformation in creation why have so many theologians neglected the Spirit s activity in the context of public theology One of the causes of such neglect derives from a long held belief in dualism or its assumption As a result generally speaking theologians have neglected the eschatological aspect of the Spirit s work over creation and instead have devoted much of their attention to the immanent spiritual aspect of the Spirit s work Hence a theology is needed that recaptures the eschatological aspect of the Spirit s work over creation and Colin E Gunton s pneumatology that is trinitarianly formulated and eschatologically conceived brings a fresh approach to public theology and moves us toward a full bodied holistic and trinitarian public theology that takes into account the triune God This study attempts to draw upon the resources uncovered in Gunton s pneumatology to outline applications for Christian engagement of the public square for the twenty first century The book concludes with criteria for discerning the Spirit s work in the public square to give us practical ways to see how the Spirit may be working in the public square for transformation

*Resident Aliens* Stanley Hauerwas, Bishop William H. Willimon, 2014-04-15 Only when the Church enacts its scandalous Jesus centered tradition will it truly be the Body of Christ and transform the world Twenty five years after its first publishing Resident Aliens remains a prophetic vision of how the Church can regain its vitality battle its malaise reclaim its capacity to nourish souls and stand firmly against the illusions pretensions and eroding values of today's world Resident Aliens discusses the nature of the church and its relationship to surrounding culture It argues that churches should focus on developing Christian life and community rather than attempting to reform secular culture Hauerwas and Willimon reject the idea that America is a Christian nation instead Christians should see themselves as residents aliens in a foreign land Stanley Hauerwas and William H Willimon maintain that instead of attempting to transform government the role of Christians is to live lives which model the love of Christ Rather than trying to convince others to change their ethics Christians should model a new set of ethics which are grounded in the life death and resurrection of Christ

**Christian Origins and the Ancient Economy** David A. Fiensy, 2014-07-22 What does economics have to do with Christian origins Why study such a connection First of all the New Testament makes many direct references to economic issues But second the economy affects every other aspect of life family religion community work health and politics To understand what it was like to live in a society one must understand what the economy was doing The study of the economy includes not only the goods and services of a society but also human labor and its control For one it entails the size of the pie of goods How prosperous was first century Galilee But the study of economy also takes account of the slice of the pie that each family obtained How fair was the economy to each family Those involved in the quest for the historical Jesus have discovered that the ancient economy is a major point of dispute among various interpreters Was the early Jesus movement a socioeconomic protest Or was it primarily a religious reform These two approaches understand Jesus in remarkably different ways This volume seeks to guide readers through some of the most controversial issues raised in the last twenty years on this important topic

*Acts of the Apostles and the Rhetoric of Roman Imperialism* Drew W. Billings, 2017-07-25 Acts of the Apostles is normally understood as a historical report of events of the early church and serves as the organizing centerpiece of the New Testament canon In this book Drew W. Billings demonstrates that Acts was written in conformity with broader

representational trends and standards found on imperial monuments and in the epigraphic record of the early second century. Bringing an interdisciplinary approach to a text of critical importance, he compares the methods of representation in Acts with visual and verbal representations that were common during the reign of the Roman emperor Trajan (98–117 CE). Billings argues that Acts adopts the rhetoric of Roman imperialism as articulated in the images and texts from the period. His study bridges the fields of classics, art history, gender studies, Jewish studies, and New Testament studies in exploring how early Christian texts relate to wider patterns in the cultural production of the Roman Empire.
