Issues in Health and Health Care Related to Race/Ethnicity, Immigration, SES and

Gender Jennie Jacobs Kronenfeld, 2012-09-03 The 30th Anniversary volume of *Research in the Sociology of Health Care* looks at the important links between major social factors and health and health care The four main factors analysed in the book are race ethnicity immigration Socioeconomic Status SES and gender Handbook of African American Health Jessica M. Ramos, 2011-03-18 With a focus on how to improve the effectiveness and cultural competence of clinical services and research this authoritative volume synthesizes current knowledge on both the physical and psychological health of African Americans today In chapters that follow a consistent format for easy reference leading scholars from a broad range of disciplines review risk and protective factors for specific health conditions and identify what works what doesn't work and what might work i.e. practices requiring further research in clinical practice with African Americans Historical sociocultural and economic factors that affect the quality and utilization of health care services in African American communities are examined in depth Evidence based ways to draw on individual family and community strengths in prevention and treatment are highlighted throughout Winner American Journal of Nursing Book of the Year Award *Social Epidemiology* Lisa F. Berkman PhD, Ichiro Kawachi MD, PhD, Maria Glymour ScD, 2014-07-09 Social epidemiology is the study of how the social world influences and in many cases defines the fundamental determinants of health This link was substantiated in the first edition of *Social Epidemiology* and the generation of research that followed has fundamentally changed the way we understand epidemiology and public health This much awaited second edition elevates the field again first by codifying the last decade of research then by extending it to examine how public policies impact health The new edition includes 11 fully updated chapters including entries on the links between health and discrimination income inequality social networks and emotion Four all new chapters on the role of policies in shaping health including how to translate evidence into action with multi level interventions Updated references detailing the best research over the last two decades The result is a bold brilliant text that will serve the new world of epidemiology in which scientists both observe health and design interventions to improve it *Social Epidemiology* again sets an intellectual agenda and provides an essential foundation for those interested in social determinants of health around the world Embodying Inequality Nancy Krieger, 2016-12-05 To advance the epidemiological analysis of social inequalities in health and of the ways in which population distributions of disease disability and death reflect embodied expressions of social inequality this volume draws on articles published in the *International Journal of Health Services* between 1990 and 2000 Framed by ecosocial theory it employs ecosocial constructs of embodiment pathways of embodiment cumulative interplay of exposure susceptibility and resistance across the lifecourse and accountability and agency to address the question and who and what drives current and changing patterns of social inequalities in health **America Becoming** National Research Council, Commission on Behavioral and Social Sciences and Education, 2001-01-25 The 20th Century has been marked by enormous change in terms of how we define race In large part we have thrown out the antiquated notions of the 1800s giving way to a more realistic sociocultural view of the world The

United States is perhaps more than any other industrialized country distinguished by the size and diversity of its racial and ethnic minority populations. Current trends promise that these features will endure. Fifty years from now there will most likely be no single majority group in the United States. How will we fare as a nation when race based issues such as immigration, job opportunities and affirmative action are already so contentious today? In *America Becoming*, leading scholars and commentators explore past and current trends among African Americans, Hispanics, Asian Americans and Native Americans in the context of a white majority. This volume presents the most up to date findings and analysis on racial and social dynamics with recommendations for ongoing research. It examines compelling issues in the field of race relations including: Race and ethnicity in criminal justice; Demographic and social trends for Hispanics, Asian Americans and Native Americans; Trends in minority owned businesses; Wealth, welfare and racial stratification; Residential segregation and the meaning of neighborhood; Disparities in educational test scores among races and ethnicities; Health and development for minority children, adolescents and adults; Race and ethnicity in the labor market including the role of minorities in America's military; Immigration and the dynamics of race and ethnicity; The changing meaning of race; Changing racial attitudes. This collection of papers compiled and edited by distinguished leaders in the behavioral and social sciences represents the most current literature in the field. Volume 1 covers demographic trends, immigration, racial attitudes and the geography of opportunity. Volume 2 deals with the criminal justice system, the labor market, welfare and health trends. Both books will be of great interest to educators, scholars, researchers, students, social scientists and policymakers.

Encyclopedia of Anthropology H. James Birx, 2006. Focuses on physical, social and applied anthropology, archaeology, linguistics and symbolic communication. Topics include: hominid evolution, primate behaviour, genetics, ancient civilizations, cross cultural studies and social theories.

Gender, Ethnicity, and Health Research Sana Loue, 2007-05-08. Health researchers routinely evaluate health and illness across subgroups defined by their sex, gender, ethnicity and race. All too often these classifications are proffered as an explanation for any differences that may be detected, for example, in access to care, frequency of disease or response to treatment. Relatively few researchers, however, have examined what these classifications mean on a theoretical level or in the context of their own research. Assume, for example, that a researcher concludes from his or her data that African Americans utilize certain surgical procedures less frequently than whites. This conclusion may mean little without an examination of the various underlying issues. Is there such a construct as race at all? How were whites and African Americans classified as such? Does this finding reflect inappropriate overutilization of the specific procedures among whites or inappropriate underutilization among African Americans? To what extent are socioeconomic status and method of payment related to the less frequent use? Are there differences in the manner in which health care providers present the various treatment options to whites and to African Americans that could account for these differences in utilization? Are there differences in health care seeking and health care preferences between the two groups that would explain the difference in utilization? Is the racial classification a surrogate

measure for another variable that has remained unidentified and unmeasured All too often unfortunately such issues are ignored or lightly dismissed with an entreaty for additional research *Reducing Adolescent Risk* Daniel Romer, 2003-04-01

What an extraordinary volume This book brings together current research integrating adolescent risk and protection across a wide range of topics and disciplines It is a major contribution to the field Robert Wm Blum MD MPH PhD Professor and Director Center for Adolescent Health and Development University of Minnesota This book is clearly the best source now available on the topic of adolescent risk taking and its prevention With chapters written by the very best people in the field describing the latest thinking and findings it is an essential guide and resource for prevention researchers and program developers Bruce Simons Morton EdD MPH Chief Prevention Research Branch Division of Epidemiology Statistics and Prevention Research National Institute of Child Health and Human Development This report shines a bright light on the road our nation has taken to improve adolescent health the approaching fork and the path most likely to attain our destination Lloyd J Kolbe PhD Director Division of Adolescent and School Health U S Centers for Disease Control And Prevention

Reducing Adolescent Risk Toward an Integrated Approach weaves together current research findings with prevailing prevention strategies to shed further light on the developmental pathways leading to a variety of interrelated adolescent risk behaviors In doing so the authors skillfully make the case for more integrated policy approaches and for comprehensive programming at the community level that both recognizes the connections between risk behaviors and maximizes young people s positive potential Karen Pittman Executive Director The Forum for Youth Investment President Impact Strategies Inc Many risk behaviors have common developmental pathways However most prevention strategies approach adolescent risk behaviors as individual problems requiring separate solutions This policy of treating one behavior at a time encourages a fractured approach to adolescent health *Reducing Adolescent Risk Toward an Integrated Approach* focuses on common influences that result in a number of interrelated risk behaviors in order to design more unified comprehensive prevention strategies Edited by Daniel Romer this book summarizes presentations and discussions held at the Adolescent Risk Communication Institute of the University of Pennsylvania Annenberg Public Policy Center Concentrating on common causes for varied risk behaviors a group of leading researchers and intervention specialists from different health traditions synthesize current knowledge about risks to adolescent health in several areas including drugs and alcohol tobacco unprotected sex suicide and depression and gambling Promoting healthy adolescent development this innovative volume includes Results of the National Risk Survey Contributions from experts on adolescent decision making and problem solving Research agendas for programs that reduce multiple risks Potential intervention strategies to reduce more than one risk at a time Major findings from the conference that should be pursued in future research Primarily intended for graduate students scholars and researchers in psychology sociology social work and public health *Reducing Adolescent Risk* is also an extraordinary resource for policy makers in government organizations and foundations **The Heart of Long Term Care**

Rosalie A. Kane, Robert L. Kane, Richard C. Ladd, 1998 Long term care in the United States has taken the nursing home as its benchmark but the monetary social and psychological costs of nursing home care are all too high This book challenges the current dominance of nursing homes as the principal institution of long term care It offers a series of alternative models where both services and housing can be provided in a way that allows long term consumers to enjoy dignified normal lifestyles It addresses the political and economic consequences of making this decision The authors start with the premise that long term care is designed to assist people who lack the capacity to function fully independently They argue that no disabled person of any age should be required to forsake his her humanity in exchange for care The book rejects the artificial dichotomy between social and medical care asserting that both play important roles in psychological and physical well being of long term care patients The authors consider the need for competent and compassionate medicine and discuss the methods for improving both its coordination of care and its effectiveness The book redefines the meaning of safety and protection in long term care and how this goal can be accomplished without sacrificing quality of living As the new millennium and the aging of baby boomers approaches more creative approaches to providing better long term care are required This volume outlines a useful framework for the provision of effective and humane community based programs that are both feasible and affordable It will be an invaluable guide for geriatricians public health professionals family physicians nurses and others who care for elderly patients Passed On Karla FC Holloway, 2002-01-30 Passed On is a portrait of death and dying in twentieth century African America Through poignant reflection and thorough investigation of the myths rituals economics and politics of African American mourning and burial practices Karla FC Holloway finds that ways of dying are just as much a part of black identity as ways of living Gracefully interweaving interviews archival research and analyses of literature film and music Holloway shows how the vulnerability of African Americans to untimely death is inextricably linked to how black culture represents itself and is represented With a focus on the death care industry black funeral homes and morticians the history of the profession and its practices Holloway examines all facets of the burial business from physicians hospital chaplains and hospice administrators to embalming chemical salesmen casket makers and funeral directors to grieving relatives She uses narrative photographs and images to summon a painful history of lynchings white rage and riot medical malpractice and neglect executions and neighborhood violence Specialized caskets sold to African Americans formal burial photos of infants and deathbed stories unveil a glimpse of the graveyards and burial sites of African America along with burial rituals and funeral ceremonies Revealing both unexpected humor and anticipated tragedy Holloway tells a story of the experiences of black folk in the funeral profession and its clientele She also reluctantly shares the story of her son and the way his death moved her research from page to person In the conclusion which follows a sermon delivered by Maurice O Wallace at the funeral for the author s son Bem Holloway strives to commemorate through observation ceremony and the calling of others to remembrance and celebration Promoting Health Institute of Medicine, Division of Health Promotion

and Disease Prevention, Committee on Capitalizing on Social Science and Behavioral Research to Improve the Public's Health, 2000-03-01 At the dawn of the twenty first century Americans enjoyed better overall health than at any other time in the nation's history Rapid advancements in medical technologies breakthroughs in understanding the genetic underpinnings of health and ill health improvements in the effectiveness and variety of pharmaceuticals and other developments in biomedical research have helped develop cures for many illnesses and improve the lives of those with chronic diseases By itself however biomedical research cannot address the most significant challenges to improving public health Approximately half of all causes of mortality in the United States are linked to social and behavioral factors such as smoking diet alcohol use sedentary lifestyle and accidents Yet less than five percent of the money spent annually on U S health care is devoted to reducing the risks of these preventable conditions Behavioral and social interventions offer great promise but as yet their potential has been relatively poorly tapped Promoting Health identifies those promising areas of social science and behavioral research that may address public health needs It includes 12 papers commissioned from some of the nation's leading experts that review these issues in detail and serves to assess whether the knowledge base of social and behavioral interventions has been useful or could be useful in the development of broader public health interventions

Community Health Nursing Karen Saucier Lundy, Sharyn Janes, 2009 Historically community health nursing has responded to the changing health care needs of the community and continues to meet those needs in a variety of diverse roles and settings *Community Health Nursing Caring for the Public's Health* Second Edition reflects this response and is representative of what communities signify in the United States a unified society made up of many different populations and unique health perspectives This text provides an emphasis on population based nursing directed toward health promotion and primary prevention in the community It is both community based and community focused reflecting the current dynamics of the health care system The Second Edition contains new chapters on disaster nursing and community collaborations during emergencies The chapters covering Family health ethics mental health and pediatric nursing have all been significantly revised and updated

Social Epidemiology Lisa F. Berkman, Ichiro Kawachi, 2000-03-09 The authors of this groundbreaking text define social epidemiology as the study of the social determinants of health implying that an important goal of public health is to identify and address factors in the social environment that may be related to health outcomes In the first systematic account of this field they focus on the major social variables that influence health including socioeconomic position income distribution race ethnicity gender social networks social support social capital and community cohesion work environment life transitions and affective psychological states Individual chapters describe the conceptualization and measurement of each social variable as well as the empirical evidence linking them to a broad range of mental physical and behavioral health outcomes The volume draws on the expertise of an internationally renowned group of scholars representing the diversity of disciplines relevant to this emerging field from sociology and psychology to physiology

and medicine The approaches covered by the chapters span the range from formulating and testing hypotheses about the links between social conditions and health to designing and implementing interventions and social policies to improve population health The challenge of persistent social inequalities in health across the globe makes this a timely publication The book will be an indispensable introduction to the field for students researchers practitioners and policy analysts

Neighborhoods and Health Ichiro Kawachi, Lisa F. Berkman, 2003-03-20 Do places make a difference to people's health and well being The authors of this groundbreaking textbook demonstrate convincingly how the physical and social characteristics of a neighborhood can shape the health of its residents Drawing on the expertise of a renowned cast of researchers this book presents a state of the art account of the theories methods and empirical evidence linking neighborhood conditions to population health Represented in the volume are contributions from the world's leading investigators in the field including social epidemiologists demographers medical geographers sociologists and medical practitioners This comprehensive textbook lays out for the first time the methodological approaches to conducting neighborhood research including multi level and contextual analysis geocoding and the use of small area based measures of deprivation as well as the evolving science of ecometrics Substantive chapters present the case for the relevance of neighborhood effects on health outcomes throughout the life cycle from infant mortality and low birthweight to childhood asthma adult infectious diseases and disability in old age The approaches covered in the book range from testing the linkages between community level variables such as social capital and residential segregation and population health to designing and implementing community interventions and policies to improve the health of the public The book is a timely companion volume to *Social Epidemiology* Oxford University Press 2000 edited by the same authors and an indispensable manual on neighborhood research for students researchers and practitioners

Health and Health Care Concerns among Women and Racial and Ethnic Minorities Jennie Jacobs Kronenfeld, 2017-08-31 This volume covers macro and micro level issues involving health and health care concerns for women and racial and ethnic minorities The book includes an examination of health and health care issues of patients providers of care especially those related to concerns for women and for racial and ethnic minorities in different countries
