Seikagaku Jiten Biochemistry Dictionary:

Milk Culture in Eurasia Masahiro Hirata, 2020-03-16 The invention of milking and milk use created a new mode of subsistence called pastoralism On rangelands across Eurasia pastoralists subsist by extensive animal husbandry and by processing their animals milk Based on the author s fieldwork over more than two decades this book details the processing systems and uses of milk observed in pastoralist and farm households in West Asia South Asia North Asia Central Asia the Tibetan Plateau and Europe and the Caucasus Milk culture in each region is characterized by its processing technology and use of milk and characteristics common to wider geographical spheres are identified Inclusion of case studies from the literature expands the continent wide perspective and provides further indications of how milk culture developed and diffused historically The inferences drawn are expressed in the author s monogenesis bipolarization hypothesis of Eurasian milk culture that milking and milk processing had a single center of origin in West Asia and that the technology involved the spread from there across the continent developing distinct characteristics in northern and southern spheres Finally because milk culture underpins pastoralism as a mode of subsistence the typology and theory of pastoralism are re examined from the standpoint of milk culture
