Seis Arquitectos Mexicanos:

Seis arquitectos mexicanos Jorge Glusberg, 1983 *Seis antropólogos mexicanos* María de la Soledad Alonso, Marta Baranda, 1984 **Arquitectos Españoles Exiliados en México** Juan Ignacio del Cueto Ruiz-Funes, 2021-12-22 En 1996 cuando se cumplían 65 años de la proclamación de la Segunda República Española 1931 y 60 del inicio de la Guerra Civil 1936 presenté en la Escuela Técnica Superior de Arquitectura de Barcelona de la Universidad Politécnica de Cataluña mi tesis doctoral *Arquitectos españoles exiliados en México Su labor en la España republicana 1931-1939 y su integración en México* dirigida por Josep Maria Montaner y aprobada cum laude por un jurado presidido por Oriol Bohigas El trabajo obtuvo el Premio Extraordinario de Doctorado en Arquitectura curso 1995-96 Hoy cuando se cumple el 75 aniversario del final de aquella guerra y del inicio de la dictadura republicana 1939 se convierte en el libro que tiene el lector en sus manos A sugerencia de varios colegas que la conocen acepté publicarla admitiendo la opinión de que tiene plena vigencia como aportación a la historia de la arquitectura del siglo XX en ambos países y que podrá servir como base a trabajos posteriores que aborden temáticas similares **Encyclopedia of Twentieth Century Architecture** R. Stephen Sennott, 2004 For more information including the introduction a full list of entries and contributors a generous selection of sample pages and more visit the Encyclopedia of 20th Century Architecture website Focusing on architecture from all regions of the world this three volume set profiles the twentieth century's vast chronicle of architectural achievements both within and well beyond the theoretical confines of modernism Unlike existing works this encyclopedia examines the complexities of rapidly changing global conditions that have dispersed modern architectural types movements styles and building practices across traditional geographic and cultural boundaries *Modernity and the Architecture of Mexico* Edward R. Burian, 2010-06-28 Since the mid 1970s there has been an extraordinary renewal of interest in early modern architecture both as a way of gaining insight into contemporary architectural culture and as a reaction to neoconservative postmodernism This book undertakes a critical reappraisal of the notion of modernity in Mexican architecture and its influence on a generation of Mexican architects whose works spanned the 1920s through the 1960s Nine essays by noted architects and architectural historians cover a range of topics from broad based critical commentaries to discussions of individual architects and buildings Among the latter are the architects Enrique del Moral Juan O'Gorman Carlos Obregón Santacilia Juan Segura Mario Pani and the campus and stadium of the Ciudad Universitaria in Mexico City Relatively little has been published in English regarding this era in Mexican architecture Thus *Modernity and the Architecture of Mexico* will play a groundbreaking role in making the underlying assumptions ideological and political constructs and specific architects' agendas known to a wide audience in the humanities Likewise it should inspire greater appreciation for this undervalued body of works as an important contribution to the modern movement **Arquitectos mexicanos III** Fernando de Haro Lebrija, Omar Fuentes Elizondo, 2000 Celebrating Mexico's bright residential architecture from old palaces and lordly haciendas to homes and state of the art apartment

buildings this book details how architects have managed to integrate and balance proportion functionality and materials in a variety of spaces Highlighted is the idea that if one loses the concept of human scale warmth is lost spaces become too confined and lighting and nature are forgotten Individuals learn that the selection of materials the notion of dimensions and the use of light that Mexicans have made part of their roots generate a cleaner and more luminous residential architecture
