

million+ evidence to the Science and Technology Committee Inquiry examining the impact of spending cuts on SET and scientific research

1. Introduction

The university think-tank million+ is pleased to submit evidence to the Committee's Inquiry into the impact of spending cuts on science, engineering and technology and scientific research. In particular, this submission

- assesses the overall implications of the Pre-Budget Report
- identifies issues with policies of concentration adopted by the Research Councils
- outlines the threat to postgraduate provision throughout the sector if budget reductions are used to concentrate the funding of postgraduate doctoral students
- outlines the implications of the 2008 RAE, associated QR settlement and the Secretary of State's annual grant letters to the Higher Education Funding Council for England for STEM, other science programmes and the future funding of excellent research
- comments on proposals to apply economic impact assessments in future Research Council decisions and in the Research Excellence Framework
- assesses increases in applications and enrolments for STEM students and invites the Committee to consider further the reasons why some STEM graduates do not progress to STEM focused careers
- analyses the impact of the decision to provide an additional 10,000 STEM student places in 2009 and the issues arising in respect of the hefce unit of resource
- identifies the disadvantages of the switch of £14m from other Research Councils to support the Science and Technology Facilities Council's re-prioritised budget and the consequences of the STFC's own proposals to reduce by 25% the number of funded scholarships and fellowships.

million+ would be pleased to appear before the Committee as part of its Inquiry.

2. Impact of Pre-Budget Report on Universities

In the Pre-Budget Report, the Chancellor of the Exchequer announced

- a 10p rate of corporation tax on income derived from British patents as incentive for companies to exploit British scientific discoveries
- £200m for new innovative industrial projects and
- a reduction of £600m by 2012-13 "from higher education and science and research budgets from a combination of changes to student support within existing arrangements; efficiency savings and prioritisation across universities, science and research; some switching of modes of study in higher education; and reductions in budgets that do not support student participation."

and Technology Committee,2006-08-04 This report focuses upon the Home Office s identity cards scheme which uses various
technologies including biometrics information and communication technology ICT and smart cards It explores the ways in
which scientific advice risk and evidence are being managed in relation to technologies that are continually developing The
Home Office has followed good practice by the establishment of advisory committees the use of Office of Government
Commerce OGC Gateway Reviews and the development of risk management strategies along with a policy of gradual
implementation But the Committee has identified weaknesses in the use of scientific advice and evidence There has been a
lack of transparency surrounding the incorporation of scientific advice the procurement process and the ICT system
Consultations have been limited in scope and their objectives have been unclear Only some aspects of the scheme such as the
biometrics have been determined The Home Office s decisions demonstrate an inconsistent approach to scientific evidence
and the Committee is concerned that choices regarding biometric technology have preceded trials With extensive trialling
still to take place the Committee is sceptical about the validity of projected costs The Committee recommends that the Home
Office seeks advice on ICT from senior and experienced professionals and establishes an ICT assurance committee It is
crucial that the Home Office increases clarity and transparency across the programme not only in problem areas The
programme should also be flexible enough to change should evidence emerge that contradicts existing assumptions
