M. Chambers, 1911 [The Parliament of England, 1559-1581](#) Geoffrey Rudolph Elton, G. R. Elton, 1989-08-25 This is a comprehensive account of the parliament of early modern England at work written by the leading authority on sixteenth century English constitutional and political history Professor Elton explains how parliament dealt with bills and acts discusses the many various matters that came to notice there and investigates its role in political matters In the process he proves that the prevailing doctrine developed by the work of Sir John Neale is wrong that parliament did not acquire a major role in politics that the notion of a consistent body of puritan agitators in opposition to the government is mere fiction and although the Commons processed more bills than the House of Lords the Lords occupied the more important and influential role Parliament's fundamental function in the government of the realm lay rather in the granting of taxes and the making of laws The latter were promoted by a great variety of interests the Crown the Privy Council the bishops and particularly by innumerable private initiators A very large number of bills failed most commonly for lack of time but also because agreement between the three partners Queen Lords and Commons could not be reached

Faculty of Arts and Science,1925 The Governments of Europe William Bennett Munro,1925 **Images of a Constitution** William E. Conklin,2024-07-01 Originally published in 1989 in this remarkable conjunction of constitutional theory jurisprudence literary theory constitutional law and political theory William Conklin first tells us what a constitution is not it is not a text nor a compendium of judicial and legislative decisions interpreting a text nor a set of doctrines nor moral political values nor customs nor a priori conceptions A constitution he argues is an image which exists through the legal consciousness of a community Using a wide range of Canadian judicial decisions as examples Conklin shows that the classic cases have been those where the boundaries of two conflicting images clashed In each instance the subject matter itself collapses into a search for a coherent image of what a constitution is all about The dominant image of a constitution in Canadian judicial discourse has been a rationalist one emanating from the Enlightenment understanding of knowledge Turning to academic writings on Canadian federalism law Conklin goes on to identify clearly the boundaries of three versions of rationalism and to show that Canadian scholars have shared with judges the dominant image of rationalism In the third part of his essay the author makes a prescriptive claim namely that a text such as the Canadian Charter of Rights and Freedoms arguably raises issues which the rationalist image of a constitution precludes as legitimate inquiries He identifies a further general image of a constitution in Canadian legal discourse a teleological one which is rooted in the writings and judgments of Ivan Rand Finally he uses the contours of the Rand image to work out a further image of constitution an image that allows lawyers to entertain issues of both theory and social cultural practice thereby placing them in a position to alleviate the pain and suffering of those in need **A History of the British People** Edward Maslin Hulme,1924 **Essentials in English History** Albert Perry Walker,1905 *Report of the Minister of Education* Ontario.
