*Literary Societies Of Republican China* Kirk A. Denton,Michel Hockx,1955-01-01

Literary Societies in Republican China provides a new and comprehensive perspective on the fascinating literary world of the most turbulent period in recent Chinese history the Republican era of 1911 1949 Wedged between the fall of the Empire and the founding of the Communist state the Republican period witnessed enormous social political and cultural changes Traditionally the period is seen as one of transition from the country being partially colonized and occupied to being an independent nation state from Confucianism to socialism from writing in classical Chinese to writing in the everyday vernacular Modern scholarship however has become suspicious of such attempts to analyze history including cultural history as a journey from A to B via C Instead attention has turned to the thick description of complex historical phenomena without

worrying about whether or not they fit into some neat linear scheme Inevitably such scholarship benefits from collaboration and teamwork from the juxtaposition of different insights and different materials in order to gain in overall breadth Literary Societies in Republican China represents such teamwork and such breadth The thirteen essays by eleven scholars from North America Europe and Asia present detailed discussions of particular literary groups active on the Republican era literary scene Some of these groups are familiar representatives of what used to be considered the mainstream while others represent literary styles that have hitherto been considered marginal or that have been ignored altogether Each of the essays in this volume looks in detail at literary societies both as producers of literary views and texts and as organizations with sometimes very complex social structures The result is a unique blend of literary cultural and social history unrivalled in any English language scholarship on China to date
