respected historians employs a nuanced knowledge of history literature and politics in tracing the evolution of American power. Far reaching and ambitious in scope the book combines accounts of the changing relationship between Native Americans and the white population with readings of the works of key cultural figures such as Melville and Whitman as well as an analysis of the way in which money and politics became so closely intertwined in American democracy. Also included is a preface by Eric Hobsbawm providing insight into his own views on American imperialism as well as a valuable introduction to Victor Kiernan's work. Together they shed useful light on such issues as the uses and misuses of American military might, its lack of respect for international agreements and the right to pre-emptive defence issues which remain just as urgent today.

**Cinema and Radio in Britain and America, 1920-60** Jeffrey Richards, 2019-01-04 Cinema and radio in Britain and America 1920-60 charts the evolving relationship between the two principal mass media of the period. It explores the creative symbiosis that developed between the two including regular film versions of popular radio series as well as radio versions of hit films. This fascinating volume examines specific genres: comedy and detective stories to identify similarities and differences in their media appearances and in particular issues arising from the nature of film as predominantly visual and radio as exclusively aural. Richards also highlights the interchange of personnel such as Orson Welles between the two media. Throughout the book runs the theme of comparison and contrast between the experiences of the two media in Britain and America. The book culminates with an in-depth analysis of the media appearances of three enduring mythic figures in popular culture: Sherlock Holmes, Tarzan and The Scarlet Pimpernel. Students, scholars and lay enthusiasts of cinema history, cultural history and media studies will find this an accessible yet scholarly read. **United States of America V. Killian**, 1957

**America's Film Legacy** Daniel Eagan, 2010-01-01 Collection of the five hundred films that have been selected to date for preservation by the National Film Preservation Board and are thereby listed in the National Film Registry. **America's Rifle** Stephen P. Halbrook, 2022-11-28 There are over forty-four million AR 15s and similar semiautomatic rifles owned by Americans. Popular adoption on such a monumental scale is indicative of more than a passing fad: only proven utility through long history creates such lasting, indeed growing demand. Since the founding of the American republic, rifles beginning with muzzleloaders and later semiautomatics have been at the center of American history and pre-history. This book by renowned historian and attorney Stephen Halbrook is the definitive account of this centrality of repeating rifles to the American story from its conception to the present day. Some factions of state and national politicians now seek to remake America in a different novel image by rushing to ban and restrict access to firearms that have long been our heritage. As Halbrook decisively shows, theirs is a war against the Second Amendment and the tradition of freedom and self-sufficiency that has sustained our storied past. Our rights hang in the balance, not as lone pillars but history shows as dominos ready to fall in quick succession. Halbrook comprehensively reviews the historical, legal and policy arguments advanced by gun prohibitionists and demonstrates that these bans are deeply antagonistic to our history, our interests and our Constitution.
