Hastings,2019-03-13 This book presents attitudes information and tools for a holistic approach to medicine health and mental health In our discussions among ourselves and with the contributing authors we defined three aspects of a holistic approach First such an approach involves expanding our focus to include the many personal familial social and environmental factors that promote health prevent illness and encourage healing Second a holistic approach views the patient as an individual person not as a symptom bearing organism This attitude emphasizes the self responsibility of the person for his or her health and the importance of mobilizing the person s own health capacities rather than treating illness only from the outside Third the holistic approach tries to make wise use of the many diagnostic treatment and health modalities that are available in addition to the standard materia medica including alternative medical and healing systems as well as psychological techniques and physical modalities Some of these methods of treatment and health practices are already accepted others are accepted but not applied in practice and still others need further research to explore the range of their uses A History of Australia's Early Cosmopolitan Naturopathic Osteopathy Shirley Murray Strachan,2025-05-30 Revealing the forgotten ideas and philosophy behind early naturopathic osteopathy Shirley Murray Strachan presents a reoriented historical view of Thomas Ambrose Bowen and his work breaking from the prevailing twentieth century legitimization narrative of mainstream chiropractic and osteopathy and exploring the contributions and practices of Australia s early cosmopolitan naturopathic osteopathy pioneers FG Roberts and Maurice Blackmore Viewing Bowen s practice and symbolism through a historical lens the book examines the forgotten world

of early cosmopolitan Australian osteopathy debunking popular posthumous commercialised claims about Bowen's work and asserts the importance of traditional approaches in naturopathic osteopathy. Though an interrogation of conflicting origin stories and myths about Bowen's work, it highlights the important contributions of naturopathic pioneers FG Roberts and Maurice Blackmore. The background narrative is the struggle of mainstream chiropractic and osteopathy seeking professional recognition and forged from fighting between overseas and Australian chiropractic and osteopathic political interests. Counterposed is the posthumous popular interpretations that orphaned Bowen's work from its wellsprings in naturopathic osteopathy. This is an accessible book for historians and practitioners of early osteopathy, chiropractic and naturopathy, especially to the large international community of accredited Bowen therapists.
