From Machinery to Mobility Jeffrey Roy,2013-06-01 The Westminster stylized model of Parliamentary democratic governance is out of step with today's digitally and socially networked world. The resulting context for public sector governance brings both promise and peril with profound consequences for public servants, elected officials and citizens alike. This book presents a timely and thorough examination of the main sources of tension between the political and administrative foundations of the traditional state apparatus commonly referred to as machinery and newly emerging alternative governance mindsets and mechanisms driven by the advent of mobility. Consistent with the emergence of Government 2.0, some of the critical technological and organizational dimensions of mobility include openness, cloud computing, privacy and security, and social media. Furthermore, a more informed, educated and connected citizenry creates new pressures and opportunities for public engagement, particularly online. Blending conceptual and empirical perspectives from Canada and many other jurisdictions around the world, this book aims to provide scholars, students and practitioners of democratic and public sector governance with fresh insight into both the prospects for reform and the critical choices that lie ahead for governments and citizens in an increasingly mobile and participative age. The Routledge Handbook of Tourism Marketing Scott McCabe,2014-01-03 Tourism has often been described as being about selling dreams, tourist experiences being conceptualized as purely a marketing confection, a socially constructed need. However, the reality is that travel for leisure, business meetings, sports or visiting loved ones has grown to be a very real sector of the global economy requiring sophisticated business and marketing practices. The Routledge Handbook of Tourism Marketing explores and critically evaluates the current debates and controversies inherent to the theoretical, methodological and practical processes of marketing within this complex and multi-sector industry. It brings together leading specialists from a range of disciplinary backgrounds and geographical regions to provide reflection and empirical research on this complex relationship. The Handbook is divided into nine inter-related sections. Part 1 deals with shifts in the context of marketing practice and our understanding of what constitutes value for tourists. Part 2 explores macromarketing and tourism. Part 3 deals with strategic issues. Part 4 addresses recent advances in research. Part 5 focuses on developments in tourist consumer behaviour. Part 6 looks at micromarketing. Part 7 moves on to destination marketing and branding issues. Part 8 looks at the influence of technological change on tourism marketing and Part 9 explores future directions. This timely book offers the reader a comprehensive synthesis of this sub-discipline, conveying the latest thinking and research. It will provide an invaluable resource for all those with an interest in tourism and marketing, encouraging dialogue across disciplinary boundaries and areas of study. This is essential reading for Tourism students, researchers and academics as well as those of Marketing, Business Events Management and Hospitality Management.
