

KIBES® – Key to integrated onboard electronic system.

Increasing requirements for efficiency, comfort and functionality affect the development of modern vehicles. The KIBES® hardware and software package from Continental can meet the challenge to fulfill them.

The KIBES® system will help to optimize the OEM application – by reducing wirings, connectors, relays and fuses the vehicle will become more reliable. The costs for wiring up the vehicle, as well as the expenses for documentation service and maintenance, will significantly drop.

With our KIBES® product portfolio, we provide an efficient development tool chain that offers a

scalable and flexible network system at a reasonable price, making buses, trucks and special vehicles more powerful, efficient and reliable.

Thanks to the KIBES®-32 / KIBES®-5 software the integration and testing of application software is easy to handle and it supports flexible business models.

Advantages and base systems

The flexible network system of KIBES® allows an easy addition or removal of several components and it also simplifies the maintenance and troubleshooting of the vehicle. Vehicles can be operated more safely and reliably due to built-in diagnostic features like short-circuit protection, open-load, and over-temperature detection.

The minimized amount of wirings, connectors, relays and fuses allow for the vehicle weight and installation time to be significantly reduced, as well as the fuel consumption, documentation service and maintenance costs. At the same time, the vehicle reliability can be improved through high quality components that are carefully tested and validated not only on a component basis, but also on system level.

The system with central computer ZRS-A provides a solution to almost every possible requirement. Up to 18 nodes can be connected to ZRS-A for all types of in- and output signals. It offers a complex CAN network connectivity with powertrain CAN, customer generic CANs, instrument CAN, body CAN and three multiplex CANs. It is also possible to connect different instrument clusters and driver's workplace solutions with a ZRS-A.

Systems with a control unit of the CBCU3 family provide powerful solutions that are optimized to meet any customer requirement. Up to four nodes can be connected to CBCU3-E via multiplex CAN. Beyond that, control units of the CBCU3 family offer a network of powertrain CAN and instrument CAN, with the latter providing a direct connection to several possible instrument cluster solutions.

The family of MUX5 provides a water protected system with the multiplex node MUX4-Pn for general purposes controlled by the master unit MUX5-Pcu. Up to four MUX4-Pn nodes per multiplex CAN can be connected to MUX5-Pcu. The system also provides four generic CANs, as well as the installation outside of the cabin. LIN as interfaces for intelligent switches, as well as separate intelligent sensor interfaces, round up the connectivity features for inside the vehicle.

Safety relevant functions compliant to ISO 26262 can be supported up to ASIL B. The customer enjoys high flexibility and will be able to program these functions on his own by using the KIBES tool chain and the KIBES®-5 safety manual.

before June 1797 to September 1798 is the most famous year in English poetry Out of it came Samuel Taylor Coleridge s The Rime of the Ancient Mariner and Kubla Khan as well as his unmatched hymns to friendship and fatherhood and William Wordsworth s revolutionary songs in Lyrical Ballads along with Tintern Abbey Wordsworth s paean to the unity of soul and cosmos love and understanding In The Making of Poetry Adam Nicolson embeds himself in the reality of this unique moment exploring the idea that these poems came from this particular place and time and that only by experiencing the physical circumstances of the year in all weathers and all seasons at night and at dawn in sunlit reverie and moonlit walks can the genesis of the poetry start to be understood The poetry Wordsworth and Coleridge made was not from settled conclusions but from the adventure on which they embarked thinking of poetry as a challenge to all received ideas stripping away the dead matter looking to shed consciousness and so change the world What emerges is a portrait of these great figures seen not as literary monuments but as young men troubled ambitious dreaming of a vision of wholeness knowing they had greatness in them but still in urgent search of the paths toward it The artist Tom Hammick accompanied Nicolson for much of the year making woodcuts from the fallen timber in the park at Alfoxden where the Wordsworths lived Interspersed throughout the book his images bridge the centuries depicting lives at the source of our modern sensibility a psychic landscape of doubt and possibility full of beauty and thick with desire for a kind of connectedness that seems permanently at hand and yet always out of reach
