**Medway & Swale Shipping Through Time** Geoff Lunn, 2012-09-15 This fascinating selection of photographs traces some of the many ways in which Medway Swale Shipping has changed and developed over the last century **Particulars, Actuality, and Identity over Time, vol 4** Michael Tooley, 2013-10-08 Volume 4 in the 5 volume series titled Analytical Metaphysics The essays in this volume are concerned with three main issues First what account can be given of the nature of a particular Second is identity over time a basic and irreducible relation or can it be analysed If so what is the correct analysis Third what account can be offered of what it is to be actual The final account of this volume involves the claim that actuality is a special property that is possessed by one and only one possible world **Manchester Ship Canal Through Time** Steven Dickens, 2017-02-15 This fascinating selection of photographs traces some of the many ways in which Manchester Ship Canal has changed and developed over the last century **Particulars, Actuality, and Identity Over Time** Michael Tooley, 1999 First Published in 1999 Routledge is an imprint of Taylor Francis an informa company

**Archaeology and the Social History of Ships** Richard A. Gould, 2000-04-13 Maritime archaeology deals with shipwrecks and is carried out by divers rather than diggers But this is by no means a marginal branch of archaeology It embraces maritime history analysing changes in ship building navigation reconstructing the infrastructure of waterborne commerce and offers fresh perspectives on the cultures and societies that produced the ships and sailors Drawing on detailed and recent case studies Richard Gould provides an up to date review of the field and a clear exposition of new developments in undersea technologies He also argues for the careful management of underwater cultural resources **Leap Through Time** Harold Leonard, 2016-04-27 Imagine if you were given the chance to step into a machine and journey through the barriers of time toward any moment in the past Where would you go What would you want to find out After a lifetime of apprenticing under a professor and father figure whose theories made building such a device possible Ben Stone was suddenly presented with the opportunity His choice was one that many would make to travel back to the crucifixion of Jesus and finding himself sealed in the tomb What he experiences is not at all what he expected This is just the beginning of his adventures Join Ben as he leaps through time to discover some of life's biggest mysteries **Practical Design of Ships and Other Floating Structures** Tetsuo Okada, Katsuyuki Suzuki, Yasumi Kawamura, 2020-10-05 This book gathers the peer reviewed proceedings of the 14th International Symposium PRADS 2019 held in Yokohama Japan in September 2019 It brings together naval architects engineers academic researchers and professionals who are involved in ships and other floating structures to share the latest research advances in the field The contents cover a broad range of topics including design synthesis for ships and floating systems production hydrodynamics and structures and materials Reflecting the latest advances the book will be of interest to researchers and practitioners alike **Mathematics Education as a Research Domain: A Search for Identity** Anna Sierpinska, Jeremy Kilpatrick, 2014-02-19 **The Lucretian Renaissance** Gerard

Passannante,2024-05-31 With *The Lucretian Renaissance* Gerard Passannante offers a radical rethinking of a familiar narrative the rise of materialism in early modern Europe Passannante begins by taking up the ancient philosophical notion that the world is composed of two fundamental opposites atoms as the philosopher Epicurus theorized intrinsically unchangeable and moving about the void and the void itself or nothingness Passannante considers the fact that this strain of ancient Greek philosophy survived and was transmitted to the Renaissance primarily by means of a poem that had seemingly been lost a poem insisting that the letters of the alphabet are like the atoms that make up the universe By tracing this elemental analogy through the fortunes of Lucretius's *On the Nature of Things* Passannante argues that long before it took on its familiar shape during the Scientific Revolution the philosophy of atoms and the void reemerged in the Renaissance as a story about reading and letters a story that materialized in texts in their physical recomposition and in their scattering From the works of Virgil and Macrobius to those of Petrarch Poliziano Lambin Montaigne Bacon Spenser Gassendi Henry More and Newton *The Lucretian Renaissance* recovers a forgotten history of materialism in humanist thought and scholarly practice and asks us to reconsider one of the most enduring questions of the period what does it mean for a text a poem and philosophy to be reborn

*Early Modern Shipping and Trade* ,2018-08-07 Early modern trade and shipping through the Danish Sound has attracted the interest of many historians since a long time A prominent reason for this is that the route via the Sound connected Europe's main economies with the economically important Baltic Sea region The other reason why trade and shipping through the Sound attracted the attention of so many scholars is the fact that they are so very well documented by the Sound Toll Registers STR the records of the toll levied by the king of Denmark on the passage of ships through the Sound Although the Sound Toll Registers have always been widely known as crucial their sheer volume and detail make them virtually impossible to handle To make the STR fully and quickly accessible to researchers the online database Sound Toll Registers Online STRO has been called into existence Since 2010 STRO has been becoming gradually available The articles collected in this volume are examples of the kind of research that can be done with STRO how it boosts the writing of the history of European maritime transport and trade and how its use contributes to our knowledge of that history Contributors are Lo c Charles Ana Crespo Solana Guillaume Daudin Maarten Draper Jari Eloranta Katerina Galani Lauri Karvonen Yuta Kikuchi Sven Lilja Maria Cristina Moreira Jari Ojala Pierrick Pourchasse Magnus Ressel Klas R nnb ck Werner Scheltjens Siem van der Woude Jerem van Duijl and Jan Willem Veluwenkamp

**California, Oregon, and Washington Archaeological Resource Study: History** ,1990 *Ships And Maritime Landscapes* Jerzy Gawronski,André van Holk,Joost Schokkenbroek,2017-09-25 This volume gathers 88 contributions related to the theme Ships and Maritime Landscapes of the Thirteenth International Symposium on Boat and Ship Archaeology ISBSA 13 held in Amsterdam on the 7th to 12th October 2012 The articles include both papers and poster presentations by experts in the field of nautical archaeology history of ships and shipbuilding and naval architecture The contributions deal not only with the theme of

maritime landscapes but also with a variety of ship related subjects like regional watercraft construction and typology material applications and design outfitting reconstruction and current research Canal Tolls and Route Studies United States. Congress. House. Merchant Marine and Fisheries,1967

**Soldiers' Lives through History - The Ancient World** Richard A. Gabriel,2006-11-30 Once warfare became established in ancient civilizations it s hard to find any other social institution that developed as quickly In less than a thousand years humans brought forth the sword sling dagger mace bronze and copper weapons and fortified towns The next thousand years saw the emergence of iron weapons the chariot the standing professional army military academies general staffs military training permanent arms industries written texts on tactics military procurement logistics systems conscription and military pay By 2 000 B C E war was an important institution in almost all major cultures of the world This book shows readers how soldiers were recruited outfitted how they fought and how they were cared for when injured or when they died It covers soldiers in major civilizations from about 4000 B C E to about 450 C E Topics are discussed cross culturally drawing examples from several of the cultures armies and time periods within each chapter in order to provide the reader with as comprehensive an understanding as possible and to avoid the usual Western centric perspective too common in analyses of ancient warfare

**The Double Lives of Objects** Thomas Sattig,2015-02-19 Thomas Sattig develops and defends a novel philosophical picture of ordinary objects such as persons tables trees and mountains His theory carves a middle way between the two accounts that have dominated traditional metaphysics of material objects namely classical mereology and Aristotelian hylomorphism It answers metaphysical semantical and psychological questions in a unified framework What is the nature of ordinary objects How do we speak about such objects And how do we conceive of them The core thesis is that ordinary objects lead double lives they are compounds of matter and form and since their matter and form have different qualitative profiles ordinary objects can be described differently from different conceptual perspectives A philosophical theory of ordinary objects faces the hard task of saving our common sense conception of objects from a wide range of hard problems that present our familiar worldview as internally inconsistent and as incompatible with plausible metaphysical principles The book argues that the proposed theory does a better job than its rivals in saving the appearances The key that unlocks each problem is that seemingly inconsistent judgements about objects are really consistent because they manifest different perspectives on the same double layered objects Many long standing philosophical mysteries about ordinary objects dissolve once we realize that they lead double lives The theory contributes to a wide variety of philosophical debates including those about parts and composition persistence coincidence and constitution personal identity modality de re the grounding problem determinism vague objects the problem of the many and relativistic metaphysics
