Shock Shock Shock:

Computation of Viscous Shock/shock Hypersonic Interactions with an Implicit Flux Split Scheme Datta V. Gaitonde, 1990
The interaction of an impinging shock with the bow shock generated by a blunt geometry is examined numerically for hypersonic Mach 8 perfect gas flows with modified Steger Warming flux split scheme. The modifications are designed to reduce numerical dissipation in the boundary layer thus improving the resolution and accuracy of the resulting algorithm. The full 2 D Navier Stokes equations are solved in finite volume formulation with central differencing for viscous terms and residual driven line Gauss Seidel relaxation for time advancement. Grid resolution studies are performed. For a Type IV interaction, comparison with surface pressure and heat transfer rates display good overall agreement with experimental values. For a Type III interaction, a detailed comparison is made with experimental surface quantities and a computation with Van Leer's flux splitting algorithm. The peak amplification of pressure is modestly overpredicted with the current algorithm. The computed peak heat transfer is comparable to that obtained in previous research with Van Leer's splitting, although anomalous behavior is observed in the vicinity of the stagnation point. This behavior may be eliminated with appropriate corrections. The Shock and Vibration Bulletin, 1986. Shock Waves - Proceedings Of The 20th International Symposium (In 2 Volumes) Hans G. Hornung, Joseph E. Shepherd, Bradford Sturtevant, 1997-01-22. The symposia take place every two years. They are the forum at which scientists concerned with shock waves present their research. They USE shock waves for chemical kinetics studies, for materials studies, and for smashing kidney stones. They STUDY the phenomena associated with flows involving shock waves such as supersonic flow, explosions, detonations, volcanic eruptions, and in this symposium even such with it topics as impact of Shoemaker Levy on Jupiter and blast waves in the World Trade Center. They also discover new bigger and better ways of generating flows at hypervelocity speeds and develop their technological tools further. The international exchange of information is documented in the proceedings volumes which have become a storehouse of information on the subject, documenting the history of this peculiar branch of science that involves chemists, physicists, engineers, geophysicists, material scientists, and biologists. Shock Waves Kazuyoshi Takayama, 2012-12-06. Shock wave research covers important interdisciplinary areas which range from basic topics on gasdynamics, combustion, and detonation, physico chemistry of high temperature gases, plasma physics, astro and geophysics, materials science, astronautics, and space technology to medical and industrial applications. This book includes 202 papers presented at the 18th the International Symposium on Shock Waves which describe the research frontier of shock wave phenomena and 14 plenary lectures which show the state of the art of various fields of shock wave research. This proceedings is a unique collection of most important and updated shock wave research. We Are All In Shock Dr. Stephanie Mines, 2003-06-04. could further undermine core profitability and weaken capital buffers Supervisors should continue to be proactive in monitoring these risks Japan's external position is assessed as broadly in balance compared to moderately undervalued last year because of structural changes in the external sector including from the offshoring of production and sustained high energy imports which have become more apparent Launching all three arrows will create benefits for the region and the global economy Spillovers via the trade channel and capital flows are expected to increase in coming years with uncertain net effects higher exports and capital outflows in the short term As long as Japan continues to proceed with its reforms incomes will rise and fiscal risks decline which will be positive for the global economy *El Salvador* International Monetary Fund. Costa Rica International Monetary Fund. Western Hemisphere Dept.,2019-04-13 This 2019 Article IV Consultation highlights that Costa Rican government recognizes the challenges and is planning a broad array of measures although the political and social environment remains difficult The Consultation focused on policies that would help restore fiscal sustainability strengthen the inflation targeting framework enhance resilience of the financial system and boost potential and inclusive growth The fiscal reform constitutes a critical step towards restoring fiscal sustainability but full and timely implementation is key Further frontloaded fiscal consolidation based largely on revenue measures should be implemented to further reduce debt and financing pressures while taking measures to protect the poor It is also recommended that monetary policy should continue to remain data dependent and balance downside risks to inflation stemming from slower activity and upside risks to inflation arising from tighter global financial conditions Structural reforms including those planned under the Organisation for Economic Co operation and Development accession process should be implemented to improve competitiveness and foster inclusive growth

France International Monetary Fund. European Dept.,2016-07-12 This 2016 Article IV Consultation highlights that economic recovery in France is solidifying The economy is projected to expand by 1.5 percent in 2016 primarily driven by strong consumer spending There are also signs of a cyclical recovery in investment and the slump in residential construction appears to be bottoming out By contrast net exports are declining as demand from trading partners has slowed Private sector job creation has remained lackluster and the unemployment rate has hovered at about 10 percent The government has continued to advance important reforms to help create the conditions for improved economic performance As for budget policies there are ongoing efforts to contain spending growth at all levels of government while easing taxes

Turkey International Monetary Fund. European

Dept.,2019-12-26 This 2019 Article IV Consultation with Turkey discusses that economic growth has since resumed buoyed by expansionary fiscal policy rapid credit provision by state owned banks and more favorable external financing conditions The lira also recovered as market pressures abated Import compression and a strong tourism season have contributed to a remarkable current account adjustment Inflation has fallen sharply and the central bank cut policy rates by 1000 basis points since July 2019 Inflation peaked at around 25 percent five times the target in October 2018 due in large part to high exchange rate passthrough and rising inflation expectations However strong base effects relative lira stability and a negative output gap have since contributed to a steep inflation decline although inflation expectations remain well above target State owned banks are supporting rapid credit growth While private banks have cut back on their lending state owned banks have engaged in a major credit expansion which picked up pace in early 2019 **Pakistan** International Monetary Fund. European Dept.,2018-11-14 The United Kingdom is set to exit the European Union in

March 2019 It is now in the process of negotiating its withdrawal from the EU Once an agreement is reached there will be an implementation period through the end of 2020 Complex issues still remain to be resolved including the future status of the land border with Ireland Growth over the past year has been moderate The post referendum depreciation caused an increase in inflation depressing private consumption Business investment growth has been constrained by protracted uncertainty about the future trade regime and potential increases in trading costs Nonetheless slack in the economy is limited as weaker demand is matched by slower supply growth Growth is expected to continue at a moderate pace conditional on a smooth Brexit transition and some recovery in labor productivity A key downside risk is an exit

Spain International Monetary Fund. European Dept.,2018-11-21 Spain s economy has continued to grow strongly reflecting its improved fundamentals However especially the young generation still faces daunting economic challenges In the meantime several downside risks are clouding the medium term outlook Externally they comprise sudden changes in investors global risk appetite escalating global protectionism and weakening conditions in emerging economies Domestically they include pressure to reverse reforms continued procyclical fiscal policy and prolonged uncertainty related to Catalonia These could hurt the economy particularly in an environment of high public debt and structural unemployment as well as sluggish productivity growth which is set to slow Spain s income convergence

Morocco International Monetary Fund. Middle East and Central Asia Dept.,2015-07-30 EXECUTIVE SUMMARY The economy is recovering and the outlook is favorable but still subject to significant risks After slowing to below 2.1 percent in 2014 growth is expected to be close to 5 percent in 2015 boosted by a strong agricultural output and a gradual acceleration of activity in other sectors Fiscal policy is on track to achieve the annual deficit objective of 4.3 percent of GDP The external position has improved rapidly benefiting from lower oil prices and strong export performance Inflation remains low However more remains to be done to reduce unemployment especially among the youth Assuming steadfast implementation of reforms growth should gradually accelerate over the medium term However the outlook remains subject to the risks of a structurally weak growth in key advanced economies tighter or more volatile global financial conditions and increased volatility of energy prices Important progress has been made on key reforms sustaining these efforts will be important to foster higher and more inclusive growth Significant progress was made in reforming the subsidy system thereby reducing its costs and associated fiscal risks At the same time social programs on health and education were expanded The adoption of the new organic budget law in May 2015 was a crucial step in improving the fiscal framework while progress has also been made in upgrading the financial policy framework Timely reform of the pension system is needed to ensure its viability while extending its coverage Sustaining efforts to improve the business environment competition governance and transparency as well as the functioning of the job market and the quality of education and vocational training will also be important for increasing competitiveness growth and employment The program remains on track and Morocco continues to meet the PLL qualification criteria Both March 2015 quantitative indicative targets were met

comfortably Morocco continues to perform strongly in three out of the five PLL qualification areas while not substantially underperforming in the fiscal and external areas Staff recommends the completion of the second review under the arrangement Iraq International Monetary Fund. Middle East and Central Asia Dept.,2016-07-14 This paper discusses Iraq's First and Second Reviews of the Staff Monitored Program SMP and Request for a Three Year Stand By Arrangement The oil price decline has resulted in a massive reduction in Iraq's budget revenue pushing the fiscal deficit to an unsustainable level The authorities are responding to the crisis with a mix of necessary fiscal adjustment and financing maintaining their commitment to the exchange rate peg The authorities started an SMP in November 2015 to establish a track record of policy credibility and pave the way to a possible IMF financing arrangement Their performance under the SMP has been broadly satisfactory
