hypoxia

Anaerobic  
metabolism  
in cells

Cells yield  
2ATP + Lactic acid

Bodywide  
lactic acidosis

- Condition in which vital tissues and organs are not receiving enough blood flow to function properly; medical emergency
- Two main outcomes: tissue hypoxia and cellular dysfunction

## Shock can be caused by:

- Decreased cardiac output (cardiogenic)
- Maldistribution of blood flow (distributive)
- Reduced blood oxygen content (hypovolemic)

## Results in cellular hypoxia, which causes:

- Anaerobic metabolism
- Free radical production
- Macrophage induction

- Failure of microcirculation to autoregulate blood flow can lead to activation of coagulation

=

Tissue hypoxia  
and  
cellular dysfunction

Irreversible organ  
damage +  
**death**

## Compensatory Stage= Sympathetic Nervous System (SNS) & RAAS

- Homeostatic mechanisms are sufficient to maintain adequate tissue perfusion despite a reduction in cardiac output
- Sympathetic nervous system (SNS) activation attempts to maintain blood pressure even though cardiac output has fallen
  - Baroreceptor reflex increases heart rate and contractility to increase cardiac output**
  - RAAS= vasoconstriction and volume expansion to increase preload and systemic vascular resistance**

## Progressive Stage= Hypotension & Hypoxia

- Marked by hypotension and marked tissue hypoxia
  - Lactate production increases with anaerobic metabolism
  - Lack of ATP leads to cellular swelling, dysfunction, and death
  - Cellular and organ dysfunction result from oxygen-free radicals, release of inflammatory cytokines, and activation of the clotting cascade
- Clinical manifestations: **MOOST COMMON= Hypotension & Tachycardia**
  - Low blood pressure, SBP < 90 mmHg
  - Narrow pulse pressure (systolic & diastolic numbers close together)
  - Tachycardia
  - Acute renal failure
    - Oliguria
    - Increased BUN and Cr
  - Decreased level of consciousness (↓/↑ lactic acid and decreased Oxygen)
  - Increased respiratory rates (↓/↑ hypoxemia)
  - Metabolic and respiratory acidosis with hypoxemia
