Shoot Apical Meristem Its Growth And Development:

The Shoot Apical Meristem R. F. Lyndon, 1998 The shoot apex although tiny and enclosed in the apical bud forms the whole of the shoot system of plants and has a key role in producing leaves and flowers An appreciation of how it functions is essential to an understanding of plant growth In this book the questions of the manner and the speed at which the shoot apex grows and the likely cellular processes that are involved in the formation of leaves and flowers are examined at the biochemical physiological biophysical molecular and genetic levels This book is the only one currently available that is wholly devoted to the growth and physiology of the shoot apex and its key role in the formation of leaves and flowers
