*Gun Rights Activists and the US Culture War* Joe Anderson, 2024-02-23 Gun Rights Activists and the US Culture War is a political anthropology book which explores how firearms can become associated with processes of identity formation as well as acting as symbols of national belonging and embodied safety In the years following Donald Trump's election an increasingly polarised population is taking up arms against each other more often than ever before Based on 12 months of participant observation at gun ranges activist meetings handgun courses and political events as well as interviews with gun rights activists in San Diego County this book argues that US conservative identity is saturated with concerns about ethics gender and who can wield violence legitimately The book focuses on two gun rights organisations the first a conservative predominantly white and male political action committee the second a pro LGBTQ firearms training group run by trans women This book demonstrates how gun ownership gives Americans the perceived means to enact their political will through the threat of or actual organized violence and that this perceived capacity explains why guns remain objects that continue to inspire such devotion and debate Gun Rights

Activists and the US Culture War will be of interest to scholars and students in anthropology gender studies ethnic studies sociology and politics as well as a general audience of narrative non fiction readers

**Gun Violence and Prevention - Connections, Cultures, and Consequences** Jack Eller,2024-06-05 People are dying or suffering all over the world from the plague of gun violence and countries and entire regions are reeling from the damage instability and insecurity that gun violence causes Taking a global perspective on the problem and identifying correlates such as drug trafficking gun trafficking state failure ethnic and political conflict terrorism and war and the consequent rise of personal fear and insecurity leading to more citizens arming themselves or hiring armed security forces the chapters in this volume look far beyond the United States which monopolizes public and scholarly attention to include India Latin America and the Caribbean and Africa The chapters explore and compare histories of causes of correlates of and responses to gun violence across this broad region predominantly in the Global South identifying commonalities and differences in the character incidence and attempted prevention of gun violence The volume aims to inform readers about gun violence in these often overlooked places and to encourage intensified quantitative and qualitative research into the geographical and historical diversity of such violence and the steps taken by various countries to curb it Only with a cross cultural and transhistorical perspective can we hope to lower the personal and social cost that gun violence inflicts on populations around the globe

**The Palgrave Handbook of Fashion and Politics** Karen M. Kedrowski,Candice D. Ortobals,Lori Poloni-Staudinger,J. Cherie Strachan,2024-10-15 This book examines how fashion intersects with political expression in the United States and across the globe The chapters cover a diversity of perspectives including experiences of men minoritized people and women and LGBTQ persons as well as examining strategic choices by political actors ranging from dictators to elected officials and from protesters to mothers Perhaps more importantly this handbook allows chapters written about the US by mainly US based academics to be in dialogue with scholarship about other regions of the world largely written by non US and non European scholars Several chapters address regions of the world often understudied by political scientists including Africa Kenya Ethiopia Uganda Sudan Liberia Nigeria and Cameroon Asia North Korea Turkmenistan Indonesia and Pakistan and Latin America Argentina and Mexico This work goes beyond the usual analyses that cast clothing choices as trivial or constraining and shows how political actors from dictators to elected officials and from citizen activists to social movement leaders incorporate strategic choices about their clothing ranging from uniforms and business attire to hijab and traditional ethnic attire in order to advance their political agendas

**Democratic Education in an Armed Society** Samantha Deane,2023-11-21 Democratic Education in an Armed Society Learning to Live with Guns examines the points of intersection between school gun violence and democratic education Samantha Deane explores the connection between how we teach children to think of themselves as democratic actors and the unceasing plague of gun violence Juxtaposing two images of political agency Deane connects an essentialized view of humans as masters of themselves objects and history with discourses that aim to train individuals to be

autonomous and rational users of objects like guns This liberal view gives us no way to think about how objects narratives and norms contour the selves we claim to be Deane suggests that we must learn to attend to the ways in which our ability to act in the world is shared and distributed In a society shot through with guns and enamored with individualism the future of associational life depends on whether we learn to do democracy with the objects we hold dear *On Target* Noah S. Schwartz,2022-08-31

The National Rifle Association NRA is an important actor in the American gun debate While popular explanations for the group s influence often focus on the NRA s lobbying and campaign donations it receives lesser attention for the mass mobilization efforts that make these political endeavours possible *On Target* explores why the NRA is so influential and how we can understand the group s impact on firearms policy in the United States The book looks at how the NRA both draws upon and shapes historical meta narratives regarding the role of firearms in America s national identity and how this is part of a larger effort to expand the community of gun owners Noah S Schwartz demonstrates how the NRA portrays a vision of the past through events such as its annual meeting communications such as *American Rifleman* magazine and NRA TV and points of contact including the National Firearms Museum Based on fieldwork in Indiana and Virginia including participant observation at NRA events and firearm safety classes thematic analysis of audio visual material and interviews with NRA executives and members *On Target* sheds light on the ways in which the NRA tells stories to build and mobilize a politically motivated network of gun owners *The Lives of Guns* Jonathan Obert,Andrew Poe,Austin Sarat,2018-09-03

Guns have never been as prevalent in American culture as they are at this moment Most contemporary conversations on guns either highlight the gun as just a tool used in mass killings or a right to be fiercely defended eventually whatever progress these debates foster in the public conversation tend to halt altogether once the old clich guns don t kill people people kill people is trotted out These gun control and gun violence discussions take the gun as passive object ignoring the changing effects and the very agency that guns may deploy as politicized objects What happens if we reset the conversation and admit that guns and not the people behind them kill people *The Lives of Guns* offers a new and compelling way of thinking about the role of the gun in our social and political lives In gathering ideas from law science studies sociology and politics each chapter turns the stale standard gun conversations around by investigating the gun as an object with agency In approaching guns from a technological perspective down to the very science of how they are created and how they fire *The Lives of Guns* takes up a number of questions such as How does the presence of these objects shape civic ideology What does it mean to develop and care for gun and gun accessories technology What do guns mean to those who build them versus those who fight for and against them What could happen when drone technology meets gun technology In bringing together fresh perspectives from leading lawyers political scientists and historians *The Lives of Guns* promises to move the gun debate forward by opening up new ways of thinking about these issues and broadening the scope of these perennial debates **Crime and Punishment in America** Laura L. **Guns and Values** Dylan S. McLean, Anthony K. Fleming, 2023-07-24 The American gun control debate is best understood as a battle in a war over the influence of individualism on American culture politics and policy This book demonstrates that the gun debate is fundamentally about values Specifically it is about what we value most private rights or the public good This helps explain why the technical empirical or legalistic arguments we hear aren't persuasive A review of scholarly literature on both the politics of gun control and American political culture finds an American bias toward an individualism that embraces personal rights We argue that this bias stacks the deck against gun control Interviews we conducted with activists show that support for or opposition to gun control is linked to concern for the public or private good Finally we trace the federal gun control debate in Washington from the 1960s to 2010s to show the ebbs and flows of individualism's influence

Gender and Firearms Peter Squires, 2024-04-01 Private gun ownership for self defense remains a major personal and public issue in the United States driven by concerns about crime vulnerability and a range of ideological factors including race and gender As media attention centres upon the extent to which women are taking up firearms with the gun lobby and firearms manufacturers celebrating the new armed woman and guns being promoted as Rape Prevention Kits this book explores the changing gendered aspects of gun ownership Can ownership of firearms by women be considered as some have claimed the embodiment of what might be termed pioneer feminism as women resist male violence in a dangerous world or are different stories told by the prominence of women in firearms control campaigns or the fact that women remain frequent victims of male gun ownership Analysing representations of the armed woman in firearm and gun lobby marketing and advertising campaigns together with television and popular music forms Gender and Firearms My Body My Choice My Gun examines the directions taken in the public debate on weaponisation in the United States considering the role of women in the politics of gun safety and gun control The book draws on statistical evidence in order to shed light on trends in gun ownership whilst engaging with feminist scholarship on the relationship between gender violence risk and vulnerabilities thus opening up critical new debates surrounding identity performance gender and risk in contemporary societies As such the book will be of likely interest to sociologists and scholars of sociology criminology and cultural and media studies with interests in gender embodiment risk crime and violence

*Mass Shootings and Civilian Armament* Alexei Anisin,2021-11-18 Mass Shootings and Civilian Armament provides the first comprehensive multi methodological analysis of the relationship between mass shootings and firearm purchases as proxied by background checks in the US on national level data from 1999 2020 Since 1994 the number of civilian owned firearms in the US has doubled to around 398 million while the population only grew by 70 million On average mass shootings have occurred once every two weeks over the last decade which is a major factor behind why social scientists have started to ask whether mass shootings

play a causative role in civilian decisions to purchase guns Utilizing a multi methodological approach featuring quantitative comparative configurational and qualitative methods this book puts forward a theoretical framework and argues that mass shootings do increase civilian armament but that this repetitious effect is historically contingent asymmetric and non linear Particular types of mass shootings are hypothesized to have driven and continue to bring about increased levels of civilian firearm purchases through different pathways and combinations of variables those that feature high fatality counts arise in areas of cultural importance are ideologically motivated First inquiry into background check data 1999 2020 and data on 213 mass shootings and attempted mass shootings is carried out to find out which shootings as well as controls are significantly correlated with background check increases Second the findings are utilized in a theoretically driven comparative configurational assessment to test if the noted theoretical pathways are associated with the outcome of increased post shooting armament Third the empirical analyses are complimented by three case studies the 2011 Gabrielle Giffords shooting illustrative of the high fatality pathway the 2012 Colorado movie theater shooting illustrative of the cultural pathway and the 2015 Charleston Church shooting illustrative of the ideologically driven pathway Interdisciplinary in nature Mass Shootings and Civilian Armament will not only be of great interest to scholars of Criminology but will also speak to sociologists economists public policy scholars political scientists historians as well as cultural studies and American studies scholars
